NWCG Data Standard
WILDLAND URBAN INTERFACE INDICATOR
Standard Data Values
January 9, 2008

Standard data values are provided when a data attribute has a pre-determined set of terms, codes, and/or numbers that must be used in order for the data to be valid. The purpose of standard data values is to ensure consistency and accuracy within a system and across multiple systems.

The following list provides NWCG's standard data values for this data attribute:

Value	Description
N	No
Y	Yes
