

Appendix 4

SELECTED PUBLICATIONS

This appendix lists examples of publications of research findings supported in whole or part by the Special Statutory Funding Program for Type 1 Diabetes Research. These examples were identified through the survey of FY 1998-2000 grantees of the program and by a search of the PubMed database of scientific literature (<http://www.ncbi.nlm.nih.gov/>). This list does not represent an exhaustive accounting of all research results attributable to the special funds. Due to the multi-year nature of most research projects and the relatively recent completion of early grants, publication of scientific discoveries from this program is an ongoing process. Indeed, over half of the respondents to the survey of grantees supported in the early years of the special funding program reported additional publications that were in preparation, in review, or in press at the time of the survey.

- Abel, E. D., H. C. Kaulbach, R. Tian, J. C. Hopkins, J. Duffy, T. Doetschman, T. Minnemann, M. E. Boers, E. Hadro, C. Oberste-Berghaus, W. Quist, B. B. Lowell, J. S. Ingwall, and B. B. Kahn. 1999. Cardiac hypertrophy with preserved contractile function after selective deletion of GLUT4 from the heart. *J Clin Invest* 104:1703-14.
- Abiru, N., A. K. Maniatis, L. Yu, D. Miao, H. Moriyama, D. Wegmann, and G. S. Eisenbarth. 2001. Peptide and major histocompatibility complex-specific breaking of humoral tolerance to native insulin with the B9-23 peptide in diabetes-prone and normal mice. *Diabetes* 50:1274-81.
