 Commission.

 writing by August 10, 2005.

#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

The Nuclear Regulatory Commission  
 (NRC) has received, by letter dated May  
 20, 2005, an application filed by R. E.  
 Ginna Nuclear Power Plant, LLC (Ginna  
 LLC) requesting the release of a part of  
 the site for unrestricted use at its R. E.  
 Ginna Nuclear Power Plant (Ginna  
 Plant), located in Wayne County, New  
 York. An NRC administrative review,  
 documented in a letter to Ginna LLC  
 dated June 29, 2005, found the request  
 acceptable to begin a technical review.  
 Before approving the proposed partial  
 site release, the NRC will need to  
 determine that the licensee has met the  
 criteria set forth in Section 50.83,  
 "Release of part of a power reactor  
 facility or site for unrestricted use," of  
 Part 50 of Title 10 of the Code of Federal  
 Regulations (10 CFR 50.83). The tract of  
 land proposed for release consists of  
 two adjacent parcels, comprising a total  
 of approximately 15 acres located along  
 the western edge of the Ginna Plant site  
 boundary, and is entirely outside of the  
 Exclusion Area. The release of the part  
 of the site would allow Ginna LLC to  
 convey the tract of land under a  
 Purchase and Sale Contract dated  
 September 10, 2002, that was assumed  
 from the former licensee of the Ginna  
 Plant. Pursuant to this contract  
 agreement, the land would be sold to a  
 real estate developer for the purpose of  
 developing the land for residential use.  
 No physical changes to the Ginna Plant  
 facility or operational changes are being  
 proposed in the application.

The NRC will approve an application  
 for partial release of a non-impacted  
 area, if it determines that the licensee  
 has adequately evaluated the effect of  
 releasing the property and has  
 adequately justified the classification of  
 any release areas as non-impacted.

##### II. Opportunity To Provide Comments

The NRC is providing notice to  
 individuals in the vicinity of the facility  
 that the NRC is in receipt of this request,  
 and will accept written comments  
 concerning this proposal by August 10,  
 2005. The comments must be submitted  
 to the Secretary, U.S. Nuclear  
 Regulatory Commission, Washington,  
 DC 20555-0001, Attention: Rulemakings  
 and Adjudications Staff, and should cite
