The amendment is effective as of the date of issuance.

By application dated January 31, 2005, as supplemented, DOE submitted a request to the NRC, in accordance with Title 10 of the Code of Federal Regulations (10 CFR) 72.56, "Application for amendment of license," to amend the license for the TMI–2 ISFSI to revise the technical specification corrective actions if the 5 year leak test on the dry shielded canisters (DSC) fails.

# R.E. Ginna Nuclear Power Plant, LLC, R.E. Ginna Nuclear Power Plant; Notice of Receipt and Availability for Comment of Request Regarding Release of Part of Site for Unrestricted Use

**AGENCY:** U.S. Nuclear Regulatory Commission. **ACTION:** Notice of receipt and availability for comment.

**DATES:** Comments must be provided in writing by August 10, 2005.

#### FOR FURTHER INFORMATION CONTACT:

Patrick D. Milano, Senior Project Manager, Section 1, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone: 301–415–1457; fax no.: 301– 415–2102; e-mail: pdm@nrc.gov.

# SUPPLEMENTARY INFORMATION:

# I. Introduction

The Nuclear Regulatory Commission (NRC) has received, by letter dated May 20, 2005, an application filed by R. E. Ginna Nuclear Power Plant, LLC (Ginna LLC) requesting the release of a part of the site for unrestricted use at its R. E. Ginna Nuclear Power Plant (Ginna Plant), located in Wayne County, New York. An NRC administrative review. documented in a letter to Ginna LLC dated June 29, 2005, found the request acceptable to begin a technical review. Before approving the proposed partial site release, the NRC will need to determine that the licensee has met the criteria set forth in Section 50.83, "Release of part of a power reactor facility or site for unrestricted use," of Part 50 of Title 10 of the Code of Federal Regulations (10 CFR 50.83). The tract of land proposed for release consists of two adjacent parcels, comprising a total of approximately 15 acres located along the western edge of the Ginna Plant site boundary, and is entirely outside of the Exclusion Area. The release of the part of the site would allow Ginna LLC to convey the tract of land under a Purchase and Sale Contract dated September 10, 2002, that was assumed from the former licensee of the Ginna Plant. Pursuant to this contract agreement, the land would be sold to a real estate developer for the purpose of developing the land for residential use. No physical changes to the Ginna Plant facility or operational changes are being proposed in the application.

The NRC will approve an application for partial release of a non-impacted area, if it determines that the licensee has adequately evaluated the effect of releasing the property and has adequately justified the classification of any release areas as non-impacted.

#### **II. Opportunity To Provide Comments**

The NRC is providing notice to individuals in the vicinity of the facility that the NRC is in receipt of this request, and will accept written comments concerning this proposal by August 10, 2005. The comments must be submitted to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, and should cite
