

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-334 and 50-412]

Pennsylvania Power Company, Ohio Edison Company, the Cleveland Electric Illuminating Company, the Toledo Edison Company, FirstEnergy Nuclear Operating Company; Notice of Withdrawal of Application for Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of FirstEnergy Nuclear Operating Company (the licensee) to withdraw its March 11, 2003, application for proposed amendments to Facility Operating License Nos. DPR-66 and NFP-73 for the Beaver Valley Power Station, Unit Nos. 1 and 2 (BVPS-1 and 2), located in Beaver County, Pennsylvania.

The proposed amendment would have revised the BVPS-1 and 2 Technical Specifications (TSs) to include listing of the Westinghouse best-estimate large-break loss-of-cooling accident (LOCA) methodology in TS 6.9.5, "Core Operating Limits Report (COLR)," thereby approving its use in the LOCA accident analysis.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on May 27, 2003 (68 FR 28853). However, by letter dated September 5, 2003, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated March 11, 2003, and the licensee's letter dated September 5, 2003, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams/html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, or 301-415-4737 or by email to pdrc@nrc.gov.

Dated at Rockville, Maryland, this 22nd day of September 2003.

For the Nuclear Regulatory Commission.
Timothy G. Colburn,
Senior Project Manager, Section 1, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-2253]

Removal of the GSA Watertown, MA, Property From the Site Decommissioning Management Plan

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of site release and finding of no significant impact.

I. Introduction

This notice is to inform the public that the United States Nuclear Regulatory Commission (the Commission) is releasing the General Services Administration (GSA) Property in Watertown, MA, for unrestricted use and is removing the site from the Site Decommissioning Management Plan (SDMP) list. The site is managed by the U.S. Army Corps of Engineers (USACE), New England District. The property was formerly a part of the Watertown Arsenal used by the U.S. Army for munitions operations. In 1990, the Commission developed the SDMP program for sites that warranted special attention to ensure timely decommissioning. This list included the GSA Watertown site. Since being placed on the SDMP, large amounts of contaminated soil have been removed from the site. The USACE has supplied, and the Commission has reviewed, site characterization and dose assessment information, and the Commission has prepared an Environmental Assessment (EA).

II. EA Summary

The purpose of the proposed action is to release the GSA property in Watertown, MA, for unrestricted use and remove it from the SDMP. The USACE provided a final radiological status survey and performed a site-specific dose analysis to demonstrate the site meets the license termination criteria in subpart E of 10 CFR part 20. In addition, NRC staff conducted independent measurements of residual contamination remaining at the site.

III. Finding of No Significant Impact

The NRC staff has evaluated the USACE request, has reviewed the

results of the final radiological survey, has performed confirmatory measurements throughout the site property, and has determined that the unrestricted release dose criteria in 10 CFR 20.1402 have been met. On the basis of the Environmental Assessment, the Commission concludes that the site is suitable for release for unrestricted use, and the GSA Watertown, MA, property is being removed from the SDMP. The staff has prepared the attached EA to support the proposed action. The NRC staff has concluded that the environmental impacts from the decision are expected to be insignificant and has determined not to prepare an Environmental Impact Statement for the proposed action.

IV. Further Information

The EA and documents related to the proposed action are available for inspection at NRC's Public Electronic Reading Room at <http://www.nrc.gov/reading-rm/adams.html> (ADAMS Accession No. ML032601000). These documents are also available for inspection and copying for a fee at the USNRC Region I Office, 475 Allendale Rd., King of Prussia, PA 19406. Any questions with respect to this action should be referred to Craig Z. Gordon, Decommissioning and Laboratory Branch, Division of Nuclear Material Safety, USNRC Region I, 475 Allendale Rd., King of Prussia, Pennsylvania 19406, telephone (610) 337-5216, fax (610) 337-5269.

Dated at King of Prussia, Pennsylvania, this 18th day of September, 2003.

For the Nuclear Regulatory Commission.

Ronald R. Bellamy,
Chief, Decommissioning & Laboratory Branch, Division of Nuclear Materials Safety, Region I.
