SUPPLEMENTARY INFORMATION:

SRP Section 13.1.2-13.1.3

SRP Section 13.1.2–13.1.3 provides review guidance for the NRC staff to use when evaluating a licensee's or applicant's operating organization, which includes consideration of whether the organization complies with the requirements of 10 CFR 50.54(l-m). The purpose of the NRC staff's review related to SRP Section 13.1.2–13.1.3 is to ensure that adequate and clear structure, functions, roles, responsibilities, staff size, and other relevant considerations for licensed operator staffing are established to operate and maintain the plant.

Minor changes were made to Revision 4 of SRP Section 13.1.2–13.1.3 from the version that was published in November 1999. The changes include additions and language that describe the process for the review of exemption requests for numbers of excused staff along with clarification of some of the language, updating the references, and the addition of references to the staffing exemption request review process identified in the draft NUREG–1791.

Draft NUREG–1791, "Guidance for Assessing Exemption Requests From the Nuclear Power Plant Licensed Operator Staffing Requirements Specified in 10 CFR 50.54(m)"

"Guidance for Assessing Exemption Requests from the Nuclear Power Plant Licensed Operator Staffing Requirements Specified in 10 CFR 50.54(m)" provides regulatory guidance for the review of requests for exemptions from any of the staffing requirements of 10 CFR 50.54(l-m). The introduction of advanced reactor designs and the increased use of advanced automation technologies in existing nuclear power plants may change the roles, responsibilities, composition, and size of the crews required to control plant operations.
