satisfied. The NRC thus concludes that: (1) Radioactive material above release limits has been properly disposed; (2) reasonable effort has been made to eliminate residual radioactive contamination; and (3) surveys and associated documentation, demonstrate that the site meets the requirements for unrestricted release set forth in 10 CFR Part 20, Subpart E.

Draft Regulatory Guide: Issuance, Availability

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Issuance and Availability of Draft Regulatory Guide, DG–1187.

FOR FURTHER INFORMATION CONTACT:

Jacob Philip, U. S. Nuclear Regulatory Commission, Washington, DC 20555– 0001, *telephone:* (301) 415–6211 or email to *Jacob.Philip@nrc.gov*. **SUPPLEMENTARY INFORMATION:**

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) has issued for public comment a draft regulatory guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

¹The draft regulatory guide (DG), titled, "Concrete Radiation Shields and Generic Shield Testing for Nuclear Power Plants," is temporarily identified by its task number, DG–1187, which should be mentioned in all related correspondence. DG–1187 is proposed Revision 1 of Regulatory Guide 1.69.

This guide describes a method that the staff of the NRC considers acceptable for use in complying with the regulations for concrete radiation shields for nuclear power plants.

As stated in Title 10, Section 20.1201, "Occupational Dose Limits for Adults," of the Code of Federal Regulations (10 CFR 20.1201), licensees shall control the occupational dose to individual adults to the limits stated therein. Furthermore, 10 CFR 20.1101(b) provides that licensees shall use, to the extent practicable, procedures and engineering controls based upon sound radiation principles to achieve occupational doses and doses to members of the public that are as low as reasonably achievable. General Design Criterion 1, "Quality Standards and Records," of Appendix A, "Quality Design Criteria for Nuclear Power Plants," to 10 CFR part 50, "Licensing of Production and Utilization Facilities," requires that structures, systems, and components important to safety be designed, fabricated, erected, and tested to quality standards commensurate with the importance of the safety function to be performed. Appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants," to 10 CFR part 50 requires that measures be established to ensure design control and inspection and test controls. Appendix B also requires that activities affecting quality be accomplished under suitably controlled conditions. This guide describes some bases acceptable to the NRC staff for implementing the above requirements with regard to the design and construction of concrete radiation shields in nuclear power plants.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–58897; File No. SR– NASDAQ–2008–018]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Order Approving Proposed Rule Change as Modified by Amendment Nos. 1 and 2 Thereto to Remove from Rule 7019 the Fees for Receiving Index Values

November 3, 2008.

On March 12, 2008, The NASDAQ Stock Market LLC ("Nasdaq") filed with the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b–4 thereunder,² a proposed rule change to remove from the Nasdaq rulebook references to the fees charged by Nasdaq for receiving index values. On September 5, 2008, Nasdaq filed Amendment No. 1 to the proposed rule change. On September 25, 2008, Nasdaq filed Amendment No. 2 to the proposed rule change. The proposed rule change, as amended, was published for comment in the Federal Register on October 3, 2008.³ The Commission received no comments regarding the proposal. This order approves the proposed rule change, as modified by Amendment Nos. 1 and 2.

Nasdaq distributes values for indexes and exchange traded funds ("ETFs") through an index dissemination service. Through this service, Nasdaq calculates and disseminates the values of Nasdaq indexes, such as the Nasdaq-100, and, on occasion, non-Nasdaq indexes. Nasdaq also distributes information related to ETFs, including intra-day asset values. All market participants may subscribe to the index dissemination service.

Nasdaq Rule 7019(b) sets forth the fees paid by distributors to receive various Nasdaq Market Center data feeds. Nasdaq proposes to delete the portion of Rule 7019(b) that relates to fees for the index dissemination service.

The Commission has carefully reviewed the proposed rule change and finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.⁴ The Commission believes that it is reasonable for Nasdaq
