GET YOUR DOCUMENTS FASTER!

Electronic Delivery gets articles to you within hours, not days!

The National Library of Medicine offers the following electronic delivery methods for interlibrary loan at no extra cost:

- ## Post to Web
You or your patron can receive an email message containing a hyperlink to the requested document on our web site.

- ## Email Attachment
Documents can be sent as email attachments to you or your patron.

- ## Ariel Transmission
Ariel is a document transmission system that delivers files to your institution via the Internet.

- ## Fax (includes surcharge)
Documents can be faxed to you or your patron.

For interlibrary loan service from NLM, **the preferred methods of delivery are Post to Web (PDF file) and Email Attachment (PDF file)**. These are the quickest and most reliable forms of delivery.

See other side for more information!

How do I ask for one of these delivery methods?

DOCLINE Users:
For electronic delivery, change your institution's "NLM Delivery Method" default:
Log into DOCLINE. Click on the Institutions tab, and choose "Update (your LIBID)". In the toolbar on the left, click "DOCLINE Options". Change the "NLM Delivery Method" field to your preferred form of delivery. Click the Save button.

Non-DOCLINE Users:
Indicate on your request which of the four methods you want for delivery of your document from NLM. Or change the default delivery preference for your institution by emailing custserv@nlm.nih.gov or faxing (301) 496-2809.

More information on electronic delivery methods:

- **Post to Web** Documents can be sent as PDF or TIFF* files. You or your patron will receive an email message containing a hyperlink to the requested document. Documents can be viewed and printed from the referenced hyperlink up to seven days after delivery. NOTE: The web link is recommended for users who have size limitations on their email system.

- **Email Attachment** Documents can be sent as PDF or TIFF* files. The document will be sent to you or your patron as an email attachment.

- **Ariel Transmission** Ariel is a document transmission system that delivers files to your institution via the Internet. These files can then be printed, emailed or posted to the Web for your patrons. In order to receive Ariel transmissions, your institution needs to install Ariel software. Information on the installation and purchase of Ariel software is available from Infotrieve, Inc. at http://www4.infotrieve.com/ariel/index.html .

    Preferred methods of delivery are Post to Web (PDF) and Email Attachment (PDF).

Federal Libraries	Please read the charges section of NLM's Interlibrary Loan fact sheet at http://www.nlm.nih.gov/pubs/factsheets/ill.html#charges

---

*What is the difference between PDF and TIFF?

PDF (Portable Document Format) preserves the formatting of the original document. PDF documents can be viewed with Adobe Acrobat Reader, available free from www.adobe.com.

The multi-page **TIFF** (Tagged Image Format File) also preserves formatting and requires a TIFF image viewer. File sizes for TIFF images tend to be large.
