

UNFORGETTABLE VISIT

For quenching my thirst of getting live experience of science, I visited the Sciencicity on 14th October 2008 along with my friends and teachers. It was my good luck that much of mine for visiting and experiencing the live science fictions was accomplished through the initiation of project CLOUD SAT in our school. Being part of prestigious project, I along with my friends and teachers entered the Pushpa Gujral Sciencicity, which is 15km from our school, at 9:30 am. Pushpa Gujral Sciencicity is located on Jalandhar to Kapurthala road and is half an hour bus journey from Jalandhar.

Right from the start i.e., stepping into Pushpa Gujral Sciencicity and till we stepped out in the evening, experiences of wonderful science fiction.

had-filled a new confidence and brighter hope for science in my mind. During the 6 hour stay at Science city, I felt aderable enjoyment and gaint scope of science in future. I not only enjoyed the Movie 'THE STARS OF PHAROS' at DOME theatre but also wondered that how beautifully Science has made Exploration of Vast sky possible. My mind was twimbed with a quotion repeatedly. How far the Science has developed?. How far it has reached?. Really to an Adorable height. The Amazing Mirror Magic Amazed me when I saw through my Illusion in the Astonishing mirrors like Half u and half me. My doubts regarding the 'Theory of Gravitation' were satisfied through a model 'How Gravity Point'. The Natural Disaster management plans for security of mankind's future have also been the part of this gripping experience through Earthquake chamber. The message for taking safeguard measures at the time of Natural Disaster is taken very well by me. The link shown between present day life and Dinasaure Era amazed me and has converted

my biological base. The Darwin theory of mutations regarding Development of Homocaprens has enhanced by knowledge regarding history of biological science. Keeping pace with today's need of awareness regarding conservation of energy resources. Kishpa Goyal Sciencecity has created a Solar Power Chamber. This has really helped me and my team mates in gathering information about the use of enormous Solar energy. We also had a Quiz at 4:00pm regarding our main Navas Cloudsat Project. Me and my teammates with our extensible Hardwork were successful in making to Third Position.

Although achievements and learning in ones life is a continuous process, but sometimes one with God Grace can have such experiences which make permanent mark in ones life. Similar situation emerged in my life when I had wonderful visit to Kishpa Goyal Sciencecity. It's a place which supplements education demonstrates emerging technologies entertainingly. The confidence and

Belief in Science will always encourage me to
be a frequent visitor of this Scientific Paradise
