

initiative, grant exemptions from the requirements of 10 CFR part 50, when (1) the exemptions are authorized by law, will not present an undue risk to public health or safety, and are consistent with the common defense and security; and (2) when special circumstances are present. Section 50.12(a)(2)(v) of 10 CFR Part 50 indicates that special circumstances exist when an exemption would provide only temporary relief from the applicable regulation and the licensee has made good faith efforts to comply with the regulation.

The requested exemption is administrative and would not affect the plant equipment, operation, or procedures. The FSAR contains the analysis, assumptions, and technical details of the facility design and operating parameters. Until the FSAR is updated, the recent changes are documented in the licensee's safety analysis reports and in the Commission's Safety Evaluations for actions requiring prior approval. Changes to a facility or its operation are made through the use of processes which are defined in regulations other than 10 CFR 50.71, such as, 10 CFR 50.59 and 10 CFR 50.54. These regulations provide the basis for evaluating proposed changes and ensuring that the changes will not present an undue risk to the public health and safety and are consistent with the common defense and security. Because the FSAR update reflects changes after they have been implemented, extending the due date does not present an undue risk to the public health and safety.

While preparing the scheduled submittal, a computer failure occurred affecting the PNPP electronic data management system (EDMS) which resulted in the loss of over 11,000 electronic documents. Updates to the FSAR that were being prepared were among the documents lost. Due to the need to reconstruct the updated FSAR information that was lost, additional time is needed to complete the submittal. The requirement to reflect changes up to 6 months prior to the date of filing would still apply. The exemption is requested to allow adequate time to complete the submittal.

The licensee has made a good faith effort to comply with the regulations for filing in September 2003, in that the updated FSAR submittal was approximately 80 percent completed, however, due to circumstances beyond their control the computer supporting the EDMS failed resulting in the loss of the documents prepared for the

submittal. Therefore, the exemption would only provide temporary relief from the applicable regulation and the extension would allow the time necessary for corrective actions and would result in an improved update to the FSAR. Thus, there are special circumstances present which would satisfy the requirements of 10 CFR 50.12(1)(2)(v).

4.0 Conclusion

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), the exemption is authorized by law, will not endanger life or property or common defense and security, and is, otherwise, in the public interest. Therefore, the Commission hereby grants FirstEnergy Nuclear Operating Company, exemption from the requirements of 10 CFR part 50, § 50.71(e)(4) for PPNP.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will not have a significant effect on the quality of the human environment (68 FR 59824).

This exemption is effective upon issuance.

NUCLEAR REGULATORY COMMISSION

Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission (NRC) has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques used by the staff in its review of applications for permits and licenses, and data needed by the NRC staff in its review of applications for permits and licenses.

Regulatory Guide 3.73, "Site Evaluations and Design Earthquake Ground Motion for Dry Cask Independent Spent Fuel Storage and Monitored Retrievable Storage Installations," provides guidance acceptable to the NRC staff for (1) conducting a detailed evaluation of site area geology and foundation stability, (2) conducting investigations to identify

and characterize uncertainty in seismic sources in the site region important for the probabilistic seismic hazard analysis; (3) evaluating and characterizing uncertainty in the parameters of seismic sources; (4) conducting a probabilistic seismic hazard analysis for the site; and (5) determining the design earthquake ground motion for the site to satisfy the requirements of NRC's regulations.

SECURITIES AND EXCHANGE COMMISSION**Submission for OMB Review; Comment Request**

Upon Written Request, Copies Available
From: Securities and Exchange Commission, Office of Filings and Information Services, Washington, DC 20549.

Extension:

Rule 17Ad-15, SEC File No. 270-360,
OMB Control No. 3235-0409.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Rule 17Ad-15 Signature Guarantees

Rule 17Ad-15 requires approximately 1,093 transfer agents to establish written standards for accepting and rejecting guarantees of securities transfers from eligible guarantor institutions. Transfer agents are also required to establish procedures to ensure that those standards are used by the transfer agent to determine whether to accept or reject guarantees from eligible guarantor institutions. Transfer agents must maintain, for a period of three years following the date of a rejection of transfer, a record of all transfers rejected, along with the reason for the rejection, identification of the guarantor, and whether the guarantor failed to meet the transfer agent's guarantee standard. These recordkeeping requirements assist the Commission and other regulatory agencies with monitoring transfer agents and ensuring compliance with the rule.

There are approximately 900 registered transfer agents. The average number of hours necessary for every transfer agent to comply with the Rule 17Ad-15 is about forty hours annually. The total burden is 36,000 hours for all transfer agents. The average cost per hour is approximately \$30. Therefore, the total cost of compliance for all transfer agents is about \$1,080,000.

The retention period for the recordkeeping requirement under Rule 17Ad-15 is three years following the

date of a rejection of transfer. The recordkeeping requirement under the rule is mandatory to assist the Commission and other regulatory agencies with monitoring transfer agents and ensuring compliance with the rule. This rule does not involve the collection of confidential information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

General comments regarding the estimated burden hours should be directed to the following persons: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, D.C. 20503; and (ii) Kenneth A. Fogash, Associate Executive Director/Acting CIO, Office of Information Technology, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Comments must be submitted to OMB within 30 days of this notice.

Dated: October 29, 2003.

Margaret H. McFarland,

Deputy Secretary.
