Subject Comments Regarding FEC Proposed Changes

Dear Sir/Madam:

In attempting to follow the instructions printed in the Record, with small, hard to read print and ambiguously placed within the Notice in same, I offer the following comments regarding the proposed sua sponte and other changes in regulations, forms, and proceedings concerning the FEC. While I know that most of you can not and will not read nor understand this email communication, I feel it is my duty to express my opinion, even though the lack of hundred dollar bills and/or affidavits of voters will render my comments null and void. While I wish I had enough money to make you people perform your duties to the best of your abilities, I realize now that it would be a waste of time, energy and money, as you puppets were implanted for a reason.

To want to change your rules so that you can, without recourse, arbitration or any formal appeal, sua sponte dismiss cases is almost as much of a joke as Scalia and Thomas not relieving themselves from the Gore v Bush decision (i.e., conflict of interest) and the whole inane idea that even the Appearance of Impropriety is best avoided. Then again, such logic and common sense must have been abolished from the USG as a whole, and your agency, in particular. Having had the opportunity to simply revote in Florida in 2000 and to de-certify certain voting machines THAT HAVE BEEN PROVEN to be not only vulnerable, but at times, PROGRAMMED, to erroneously count votes, the FEC officially sold its soul, not to any particular faction, but to corruption in and of itself.

My comments on your proposals are as follows: please, each and every one of you, resign immediately. Testify to all that you know before the Assitant US Attorney of your choice. Write all to the formerly free American press, and finally bring some integrity back into the USG. I'd go into specifics about your policy changes and such, but as said changes are so ambiguously worded as to effectively make no sense, I feel the greater urge to comment on your agency as a whole. With the three branches of the USG acting independently, your agency is purposefully under-funded, staffed and estimated. We now know why. Regardless of party affiliation, the FEC is nothing but a bookkeeper.

Fining a company that took in over 20 million dollars a mere \$300,000.00 may shed the FEC in a better light,

at least to the sheep minded and the cronies you guys must kiss up to, evidences a lot to people like me. Regardless of democrap or repukelican, if their Election committees, friends or families ignored standard rule of law, then the FEC will collect from them. Is there a set limit as to how much money I must make before I become untouchable in Criminal Proceedings, as well as FEC proceedings? One wonders how much "grease" it took to get the wheels of "FEC" justice to turn the way one chooses?

Thank you for shirking your duty, for being corrupt, unethical, stupid or some other combination of the three. Keep up the crappy work, and maybe, by mistake, we may actually have an election where the man with the most votes wins this time. Then again, if the FEC has anything to do with it, then there will continue to be no democratic process for the pseudo-democracy called the United States.

Please, keep up the crappy work.

Sincerely,

Michael Himes
