

thereto, are mandatory and applicable according to their terms following approval by the Commission and shall remain in effect until withdrawn, disapproved or superseded by standards issued by the Electric Reliability Organization. Standards in effect pursuant to the transitional provisions of this subsection shall be enforceable by the Commission.

“(k) Coordination with Canada and Mexico.--The Electric Reliability Organization shall take all appropriate steps to gain recognition in Canada and Mexico. The United States shall seek to enter into international agreements with the governments of Canada and Mexico to provide for effective compliance with standards and to provide for the effectiveness of the Electric Reliability Organization in carrying out its mission and responsibilities.

(b) Sections 316 and 316A of the FPA are amended by striking “or 214” each place it appears and inserting “214, or 218”.

SEC. 2. APPLICATION OF ANTITRUST LAWS

Notwithstanding any other provision of law, the following activities are rebuttably presumed to be in compliance with the antitrust laws of the United States:

(1) activities undertaken by the Electric Reliability Organization under section 218 of the FPA or delegated person operating under an agreement in effect under section 218(i) of the FPA, and

(2) activities of a member of the Electric Reliability Organization in pursuit of organization objectives under section 218 of the FPA undertaken in good faith under the rules of the organization.

CORE PRINCIPLES FOR RELIABILITY LEGISLATION

Accreditation of a single North American SRRO

- FERC to approve a single SRRO.
- Procedures for an applicant to apply for SRRO status, and the procedures and requirements for FERC to approve such an application.
- Requires that all system operators be members of the SRRO.
- Provides procedures for the SRRO to modify its procedural, governance and funding rules.

Authority for that SRRO to set and enforce standards

- Specifies the procedures for the SRRO to file with FERC for approval of reliability standards.
- Provides that such proposed standards are to be approved unless FERC finds that they are unjust, unreasonable, unduly discriminatory or preferential, or otherwise not in the public interest.
- Provides that FERC is to give due weight to the technical expertise of the SRRO.
- Provides for the optional filing with FERC of existing standards by NERC and regional councils prior to approval of an SRRO, which FERC could approve and enforce.
- Gives the SRRO the authority to enforce its standards, subject to FERC review.

Allowance for the SRRO to delegate authority for implementation of standards and enforcement of compliance to regional organizations

- Permits the SRRO to delegate certain authority to regional entities by agreement.
- Such agreements would be filed with FERC for approval.

Funding authority

- Provides for the assessment and allocation of SRRO and regional entity costs to system operators, to be recovered from system users, through a non-bypassable charge.

International arrangements

- Governs international agreements and recognition of the SRRO.

Anti-trust protections

- Provides for a rebuttable presumption that activities undertaken under the Act are in compliance with the antitrust laws.

Subject: Core Principles and Short Form Bill

Hi Joe,

I enjoyed lunch. Hope it was of some help as you try to sort things out. Per your request, attached is an earlier, shorter (sorry, it is 12 pages, not 6) version of the NERC reliability legislation, and a list of the key principles on which it is built. I will forward separately to you a paragraph that we have sent to Andrew Lundquist and Bob McNally for possible use in describing Administration support for the concept of this legislation.

Please let me know if you have any questions.

Thanks,
Linda

Subject: Wall Street's Views On the Energy Crisis -- And How You Should Pitch Your Plan To Investors

Memo to Cesar Conda and Jim Sims

From Jim Lucier

Wall Street's views on the energy crisis

From my daily conversations with institutional investors around the country, I believe the investment community is ready-in principle-to enthusiastically embrace a sound national energy strategy. There is only one important proviso, which is that investors and the investing public have to see a clear connection between the "top-line" policy proposals and the "bottom-line" issues of economic growth and value creation.

Having worked with Wall Street investors for two years now, I have come to realize that investors see the fundamental problem of an energy crisis in ways that are fundamentally different from those of an energy industry CEO or those of a strictly Washington-based policy analyst, such as I used to be.

Wall Street filters everything through market cap and growth potential. They want to know where the value is, and where new value is being created. That is part of the business of allocating capital to the most efficient uses. Wall Street investors are not interested in the fate of a particular industry per se - even an industry that seems big to Washington, such as "coal," "oil," or "nuclear."

Rather, what they will find most attractive about the national energy strategy is 1) moving the whole domestic economy to a higher state of efficiency and 2) creating a new generation of energy companies that will meet the nation's needs in hitherto unrealized ways.

An efficient economy is good for stock valuations across the board. Ending restrictions that inhibit today's energy companies from combining, operating, and deploying new concepts in ways that meet market demand could unleash an enormous new round of value creation.

The Wall Street mindset implies a set of do's and don'ts in presenting the National Energy Strategy to institutional investors. I will start with the don'ts, before getting to the more obvious do, which is the absolute mandate of explaining how a coherent set of policies, maintained over an extended

period of time, will in fact open the door to significant - if not enormous - new investment opportunities.

1. First, don't forget that Wall Street cares about large publicly traded companies. This may seem obvious, but Washingtonians may not realize its full import. Wall street defines large in terms of market cap. Coal companies may be large employers, large in significance to regional economies, and large in their importance as fuel suppliers to electric utilities, but they are not large in terms of market cap. Likewise, independent oil producers may be important as a group, but most IPAA companies have near-zero presence on Wall Street. The integrated oil companies do have a large presence on Wall Street, but it is much diminished from their days of glory, plus the sense from investors is that they are so large, and so exposed to global markets, that domestic U.S. policies won't have a major impact on them. The U.S. refining industry is enjoying an Indian summer of sorts, with a brief period of high margins and favorable prices in what is normally a low-margin business with little potential, due to regulatory constraints, to attract and reward new investments in the longer term.

2. Second, investors dislike anything that looks like direct intervention in the marketplace with a potential to distort market outcomes. Tax incentives and subsidies for uneconomic activities are especially unpopular. There is a sense that with natural gas prices, in particular, at the current levels, companies should have all the incentives to produce they need. Investors worry that too much reliance on tax preferences will lead to a classic boom and bust cycle in the subsidized industries, in which overbuilding ultimately leads to a collapse in valuation.

3. Taking points one and two together, you have a very serious problem in perceptions of what the National Energy Strategy is all about. In the press, investors read only about oil and the Arctic National Wildlife Refuge. When investors look at the legislation in Congress, they see their lights, mostly a hodge-podge of special interest legislation from the oil-patch states operating in cooperation with the coal states. In other words, investors see what appears to them as a confusing mass of junk that isn't directly relevant to the energy problem as they define it, which is creating 1) a fully integrated, deregulated, diversified national market for energy; 2) the infrastructure necessary to support such a market; and 3) growth opportunities for firms that produce and distribute energy, which is implied in the possibility these firms can offer new services and site new facilities.

4. Investors would welcome opening ANWR to drilling in an environmentally

responsible way. However, they are much more concerned with drilling for natural gas in the continental U.S. There is a sense of confusion about how much land is off-limits for drilling and why, which you could profitably address. However, there is a definite sense that reserves are not growing, and that new wells being drilled are not as productive as the older wells were in the prime, largely because the new wells are not in the most promising areas. Making some kind of coherent statement about federal lands irrespective of ANWR would serve you well.

5. Another theme that resonates with investors is the need to reverse thirty years' chronic under-investment in facilities and infrastructure of all kinds. Investors want to know what you are going to do about the pipelines and electric transmission lines needed to support the national marketplace they look forward to. No one I have ever talked to has the slightest sympathy for the fecklessness of the state of California; they can't believe Davis won't do the obviously right thing (as far as they are concerned) and let retail electricity prices float. You have an opportunity to make a powerful case that some kind of long term, market oriented plan is needed to allow private investment flows to build the new facilities.

6. Now you can see we are getting to some of the do's. A key variable in the equation for stock valuations is the potential for future growth. The way the equation works, even a little increased growth can mean sharply higher price-multiples. But the energy industry has had to deal with physical constraints on growth (no new drilling, siting allowed, etc.) and financial constraints on growth due to regulatory costs. Though companies have consistently increased their efficiency over time, and grown earnings (despite limited upside in revenues) by cutting costs and increasing productivity, these incremental cash flows have been eaten up by higher regulatory costs. As a result, the "g" factor in the P/E equation has been near zero. The investment community will therefore take note if you can make a credible case that 1) you will permit the industry to build out and expand capacity subject to undistorted market forces over an extended period of time and 2) you will do something about regulatory cost creep, so that companies which can meet or exceed environmental standards while cutting costs and improving productivity can actually return that increased "delta" to their shareholders. Our analysts believe that such a policy shift would allow a rise in energy industry P/E's across the board.

In summary, claiming that P/E's should go up or attempting to jawbone their increase is something the White House should absolutely not do on its own. But if you provide reasonable, credible, and reliable basis that your policies will allow capacity growth, earnings growth, and efficient new combinations, Wall Street analysts can connect the dots and perform the requisite calculations on their own.

So cut through the clutter. Don't make us think the entire energy policy is about ANWR, stripper wells in Texas, and employment in Appalachia. These are all important concerns, but things which investors consider to be second tier elements of a package that should properly focus on capacity and distribution, natural gas and electricity, and ending unjustified constraints on growth.

PS-It wouldn't hurt to tell us more about what a "hemispheric" energy policy means, because if an integrated national marketplace is a good thing, an integrated hemisphere would seem to be even better.

FPS-We would like to hear about the "comprehensiveness" of your energy policy in terms that recall the way businesses have undergone comprehensive restructurings and reorganizations in the context of a six-sigma or total quality management plan.

Subject: RE: TVA

I am handling electricity and energy policy at DOE. Andrew Lundquist and Karen Knutson are handling energy policy for the Task Force. We could sit down next week. With respect to Andrew and Karen, I suggest you call John Fenzel, emphasize that the Valley delegation strongly supports the TVA title, mention that we are meeting, ask for a meeting with Andrew and/or Karen (Andrew is the head, Karen is number #2). John's number is 456-7983. If the direct approach does not work, let me know and I will recommend they meet with you. If that does not work, then have a member of the delegation request the meeting.

Importance: High

Joe,

This is a business matter. As you know, I represent Memphis and Knoxville on TVA matters. Also, and of course, Mr. Murkowski has now introduced the Republican energy policy bill, actually two bills with one being a tax bill; Mr. Bingaman has introduced a Democrat alternative; and there is the Administration -- DOE and the Vice President's energy policy task force. So, my simple-minded question is who should I be talking to in either DOE or the VP's task force to at least present my most persuasive arguments as

to
why there should be a TVA title in whatever is proposed?
Any guidance you can give me would be greatly appreciated.

Hi, Joe. As we discussed, attached are a set of papers on national energy policy recommendations. Much of it is designed to be self-explanatory. The last document is a suggested executive order to ensure that energy implications are considered and acted on in rulemakings and other executive actions. This draft has DOE as the coordinator. Probably also need to make energy a major portfolio item for a senior White House aide.

Let me know if you have questions or additional info needs. Thanks.

The Honorable Richard Cheney
Vice President of the United States
The Old Executive Office Building
Washington, DC 20501

Dear Mr. Vice President:

I am disturbed by early reports that the Energy Task Force recommendations fail to recognize the need to include a path forward for assuring that this country is capable of providing a reliable and economic source of nuclear fuel for commercial nuclear reactors. As you know, nuclear power is the second largest supplier of electricity generation in the country. Unfortunately, it is not unreasonable to expect that the U.S. could have an OPEC-like dependency on foreign sources of nuclear fuel supplies in the near future. To prevent such a situation, the U.S. needs to deploy cost competitive uranium enrichment technology or we will rely on foreign supplies to meet nearly one quarter of our electricity needs.

There have been adverse consequences to the nation's energy security as a result of the privatization of the United States Enrichment Corporation (USEC) in July 1998. USEC is the only domestic supplier of uranium enrichment services in the U.S. When it was privatized, USEC operated two gaseous diffusion plants located in Piketon, Ohio and Paducah, Kentucky. However, last June, USEC made the decision to cease operations at the Piketon Gaseous Diffusion Plant (GDP) ignoring the advice of the Departments of Energy and Treasury. The targeted date for turning the key to the "off position" is June 1, 2001.

A Department of Energy report issued on January 19, 2001 describes the need for the U.S. "to be able to reliably meet the continuing demand for approximately 11 million separative work units (SWU) per year." However, the Paducah plant can only produce approximately 4.5 million SWU per year in an economic manner. The balance of requirements comes from 5.5 million SWU derived from blended down weapons grade uranium imported from Russia under the U.S.-Russia HEU Agreement and some European supplies. It is evident that the operation of a single enrichment plant in the country, coupled with a history of five interruptions in the delivery of enriched uranium under the Highly Enriched Uranium Purchase Agreement with Russia, raises questions about the vulnerability of the U.S. to a disruption in the supply of enriched uranium.

DOE016-1744

The Honorable Richard Cheney
May 15, 2001
Page Two

This supply mix may change even further to the detriment of energy security. First, an August 2000 Nuclear Regulatory Commission report on USEC's viability suggests that USEC is unlikely to enrich uranium profitably at the Paducah plant beyond 2003. Second, USEC is trying to expand U.S. dependency on Russian nuclear fuel supplies beyond the 5.5 million separative work units (SWU) that it imports each year as Executive Agent under the U.S.-Russia HEU Agreement. USEC has been proposing additional imports of commercial enriched uranium through Tenex, the Russian export agent. One interim solution to maintain insurance against nuclear fuel supply disruptions from Russia is through a cold standby operation for the Piketon, Ohio enrichment plant. I am pleased that Secretary Abraham has taken the steps to provide for cold standby through fiscal year 2002. However, this standby plan must be linked to deployment of cost-competitive technology, such as gas centrifuge technology, and must be extended until the new technology is fully deployed. I fear there has not been adequate attention given to what happens beyond fall 2002 and this is particularly troubling because the Department of Energy's testimony before the Energy and Air Quality Subcommittee on March 27, 2001 indicates that after five or six years of cold standby there would be significant degradation to the Piketon plant.

I am aware that the Europeans have competitive centrifuge technology, and I understand that the Oak Ridge National Laboratories have a plan to develop cost-competitive U.S.-origin centrifuge technology within a three year time period. However, at present, there is virtually no effort toward domestic self-sufficiency in enrichment services, no clear path forward for deployment from the private sector, and no government policy in effect to address the matter. Privatization has failed to deploy the advanced laser enrichment technology (AVLIS) that received nearly \$2 billion in federal R&D. Indeed, two years have passed since USEC announced it was terminating the AVLIS Program and nothing has emerged to replace the WW-II era gaseous diffusion plants in the next decade. Indeed, USEC's impaired credit ratings make it unlikely that they could obtain financing to deploy any technology.

Given the short-term nature of the Administration's cold standby plan and the absence of any long-term strategy to utilize the Piketon facility and deploy next generation enrichment technology, the plan for Piketon presently falls well-abort of the commitment made by President Bush during the campaign. In an enclosed October 4, 2001 letter to Ohio Governor Bob Taft, then-Governor Bush expressed his concern about USEC's decision to cease operations at the Piketon plant. He stated, "I am concerned that the closure of the Piketon site, which would leave only one uranium enrichment plant operational in the United States, would compromise our long-term national security interest in a continued safe supply of enriched uranium for our defense and energy needs." He further committed in that letter, "If I am elected President, my Administration will aggressively explore how the workforce and facilities at the Piketon site can continue to serve our national interest. I believe that our nation must continue to pursue research and development of new technologies for use in uranium enrichment." Release of the Energy Task Force report is the best opportunity for the Administration to follow through on its commitment to the Piketon community and our nation's nuclear energy security.

11993

DOE016-1745

The Honorable Richard Cheney
May 15, 2001
Page Three

The need for a secure, domestic uranium enrichment supply is underscored by the fact that nuclear power is enjoying improved operating economics and increased average efficiency of reactors. Demand is likely to remain stable or grow, as approximately 40% of the domestic nuclear reactors are currently seeking license renewals. During a hearing on nuclear power before the Energy and Air Quality Subcommittee on March 27, 2001, there was discussion about building the next generation nuclear reactors in the not-so-distant future. These next generation reactors will require 8-10% U-235 enrichment, compared with the 4-5% levels required for the current generation of boiling water reactors. It is troubling that USEC is closing the Piketon facility which is the only U.S. enrichment plant that is licensed to enrich uranium to 10% assay, when there is a trend toward higher assay fuel.

During the March 27, 2001 Energy and Air Quality Subcommittee hearing, testimony was offered which stated:

"USEC utilized only about 29% of its nameplate GDP capacity in 2000, and over the next year will supply a majority of its customers needs from Russian and U.S. HEU blending." (Testimony of John R. Longenecker, former USEC official).

Mr. Longenecker further states:

"USEC is finding it more profitable to operate as a trader of blended HEU rather than as a primary producer. This approach appears to lead inevitably to USEC exiting the market as a primary producer. As a result, constructing replacement enrichment capacity in the U.S. should be the key focus for the decade ahead."

In addition, during a June 8, 2000 hearing before the Commerce Subcommittee on Energy and Power, testimony was submitted stating that the front end of the nuclear fuel cycle is endangered:

"Since 1998, expenditures for uranium exploration and mine development have declined by 59%; three uranium processing facilities have closed during 1999 (two in Texas and one in Louisiana); employment in U.S. uranium exploration, mining, milling and process has decreased by almost 30%. Last year, production at ConverDyn, the sole remaining uranium converter in the U.S. was cut back by 25% and employment was reduced by over 12%." (Testimony of Mr. James Graham, President and CEO of ConverDyn).

If this nation's energy policy is going to place a greater emphasis on nuclear power, it must do so in a comprehensive fashion. An energy policy that ignores the reliability of the front end of the domestic nuclear fuel industry falls short of assuring needed energy security in this country. I urge you to carefully consider the needs of the entire nuclear fuel cycle as you prepare

The Honorable Richard Cheney
May 15, 2001
Page Four

to issue your recommendations for a national energy strategy. I know you will agree that Americans would find it unwise and unacceptable to depend on foreign sources for the second largest supplier of U.S. electricity generation, nuclear-power.

Thank you for your attention to this important matter.

Sincerely,

Ted Strickland

Columbus, Ohio 43215-6117

Dear Governor Taft:

I am writing regarding my growing concern over the events surrounding the decision by the United States Enrichment Corporation (USEC) to shut down the Portsmouth Gaseous Diffusion Facility at Piketon. As you know, on September 29, 2000, USEC gave notice to the United States Department of Energy (DOE) to assess its contract for electric power. As the current congressional appropriations process for fiscal year 2001 comes to a close, I am further concerned that the DOE has yet to articulate a plan for future clean-up and use of the site in Portsmouth, as well as for the more than 2,000 employees at the Portsmouth facility.

I am concerned that the closure of the Piketon site, which would leave only one uranium enrichment plant operational in the United States, would compromise our long-term national security interest in a continued safe supply of enriched uranium for our defense and energy needs. The Clinton-Gore Administration has not articulated a robust and aggressive plan for the highly skilled workforce and the highly specialized equipment at the Piketon plant. This demonstrates a lack of leadership relative to a key national security issue that I will not tolerate as President.

If I am elected President, my Administration will aggressively explore how the workforce and facilities at the Piketon site can continue to serve our national interest. I believe that our nation must continue to pursue research and development of new technologies for use in uranium enrichment. Furthermore, I will ensure that the resources that have been committed by Congress for Decommissionation and Decommissioning (D&D) of the site will be available in a timely manner. Finally, I will direct the DOE to explore other research opportunities that will continue to utilize the resources at Piketon. Simply stated, if I am elected President, I will work with Congress to help the Piketon workforce remain productive, ensure federal D&D obligations are met and ensure new opportunities for R&D are explored.

I know you are actively working at the state level to ensure opportunities for the workers at Piketon and their families. I look forward to working with you on this critical Ohio issue in the future.

Sincerely,

George W. Bush

HAND DELIVERED

The Honorable Richard B. Cheney
Vice President of the United States
Washington, D.C. 20502

Dear Mr. Vice President:

The Business Roundtable strongly commends this Administration for forming a special White House energy task force that will address critical energy issues. We encourage the development of a coherent and comprehensive strategy that effectively responds to the daunting economic, technological and environmental challenges ahead.

Below, the BRT outlines the long-term goals that should shape this strategy, and we offer some short-term recommendations. We are guided by three principles. First, a diverse energy supply promotes energy security and supports economic stability. Second, the Federal Government and private sector should engage in science and technology R&D to address long-term energy and environmental concerns. Third, processes should be developed and followed to align energy and environmental policies.

National Energy Security and Economic Stability is a goal that is now at risk. The wrong policy actions, such as unnecessary federal land use restrictions, popular consumer price caps, and casual opening of national emergency energy reserves, only exacerbate the energy supply and demand problem and undermine market mechanisms. For the most part, this can, and should, be corrected through promoting diverse energy supplies; vigilantly maintaining competitive markets; avoiding price controls; and minimizing or eliminating regulatory, tax and trade disincentives to improving energy efficiency and spurring technology innovation.

An Association Of Chief Executive Officers Committed To Improving Public Policy

11997

DOE016-1749

Energy Technology Research and Development is a goal that should be actively pursued by the Federal Government. The U.S. has substantial human resources dedicated to technological innovation, public and private. Public resources should be applied to productive and diverse energy technology R&D, including broad climate change R&D of emission reductions, carbon sequestration and adaptation technologies. These resources should be deployed in collaboration with business to assure that new and existing energy supply and energy conservation technologies are accepted by global markets. However, the government should avoid "picking winners and losers;" therefore, transparent processes should be established which develop and prioritize an energy technology R&D agenda and which continually assess and improve returns on government R&D investments.

Energy and Environmental Policy Alignment is imperative in the current energy crisis. The Federal Government should better align energy and environmental policies and the associated regulatory processes with a view to optimizing the synergies between these areas in policy decision-making. Risk-based analytical methods should be used across Federal agencies to compare, assess and communicate energy technology benefits and human health and environmental risks. Furthermore, ongoing risk analysis can point to the challenges and opportunities for long-term technological innovation, and perhaps, help avoid accelerating and/or escalating, crisis-like swings and clashes.

Finally, the BRT makes the following short-term strategy recommendations.

- Review regulations and regulatory processes both to identify and remove unjustifiable barriers to bringing energy technologies and services to market and to develop incentives that will not only enhance the functioning of the marketplace for energy, but also, achieve greater environmental results. In particular, rationalize and streamline Clean Air Act new source review requirements to produce a simpler, more workable permitting program – one that will not impede the ability of businesses to apply technology to increase process and operational efficiency and improve environmental performance.
- Develop energy and environmental policies that are fully informed by our historical experience with, and understanding of the consequences of, using market interventions such as price caps, natural resource management bans and mandates.
- Establish a balanced and transparent science and technology advisory process of government, industry and academia to identify and prioritize energy and environmental risks and recommend an R&D agenda.
- Bring these actions into a realistic global perspective. National energy independence does not, and will not, exist for the foreseeable future. Such a goal would distort markets and misallocate global resources. Meeting our national energy security needs necessitates supply diversification within a global energy market. Efforts to impose unilateral trade sanctions should be avoided. Foreign direct investment by the U.S. in prospective oil producing countries will be essential to meet future U.S. energy requirements.

The Business Roundtable has long been studying these issues. We have several publications (www.brt.org) that address many of our goals. These include: "Unleashing Innovation: The Right Approach to Global Climate Change," "Environmental Blueprint 2001," "Towards Smarter Regulation," and several others on subjects such as climate change and information management. Please know that we are committed to thoughtfully and constructively engaging these issues and stand ready to participate with you in shaping and executing a strategy that addresses the serious energy problems that confront us.

follow
up on DG info.

Andrew,
We wanted to give you a head's up that we have sent the attached
embargoed
press release to Karen this morning, and we will be forwarding the whole
report over to her this afternoon. The report will be released tomorrow
morning. We are also sharing this information with the Senate and House
energy committees and Secretary Abraham's office.
Per your request, you will find that on page 8 of the report is a map of
the
major natural gas transmission lines in the United States, and those
leading
to Canada and Mexico. We can make this available to you if you would
like
to use it in your report.
You may also note on page 66 & 67, reference access restrictions and the
impact of Clinton's roadless initiative. A study showed that
"modifications
of less than 5% of the designated roadless areas would greatly reduce
the
amount of natural gas potential that would be lost."
Please let me know if the materials on distributed generation that we
provided were adequate for your purposes??? We can make any
modifications
or provide additional information.

**Potential Gas Report Shows Ample Natural Gas Resources –
But America Must Develop Infrastructure to Produce and Deliver It,
American Gas Association Says**

Washington, D.C. – The U.S. natural gas resource base is estimated to be even larger than previously thought, but the size of the resource base is immaterial unless the nation can access supplies and can build the infrastructure needed to deliver it, the American Gas Association (AGA) said today. AGA's comment followed the release of the Potential Gas Committee's (PGC) biennial report on long-range supplies of natural gas, released today.

The Potential Gas Committee's report showed 1,258 trillion cubic feet (Tcf) in total natural gas resources in the United States at the end of 2000, the equivalent of a 63-year supply of natural gas at current rates of production. The size of the resource base actually increased since the committee's last report at year end 1998, even though 38 Tcf of natural gas have been drawn down through production of natural gas since that time. The PGC has increased its estimate of the U.S. natural gas resource base with each successive report over the last 10 years. This year's increase is attributable to 4 percent growth in traditional reservoirs and 10 percent growth in coal bed methane resources.

"These figures are a testament to the sustainability of future natural gas production at even greater annual rates," said Roger Cooper, executive vice president of AGA. "That's great news, since more homes, businesses and power facilities are looking to natural gas because it is cleaner-burning, efficient, reliable and available in abundance here in the United States."

Cooper praised the natural gas provisions of Sen. Murkowski's energy policy bills (S.399/389) and Sen. Bingaman's Energy bills (S.597/597), as well as the effort currently underway by the Administrations' energy task force. "All the increases in the world don't add up to much if we can't transport those supplies to market," Cooper said. "It's vital to gain greater access to our tremendous resource base, expand our pipeline delivery system and support development of energy-efficient technologies," he said. Cooper said that AGA supports the passage of a comprehensive balanced energy bill this year, one that uses all energy sources to the best advantage.

12002

DOE016-1754

The Potential Gas Committee consists of more than 170 volunteer members from the natural gas industry, government agencies and academic institutions. The committee functions independently, but with the guidance and technical assistance of the Potential Gas Agency of the Colorado School of Mines. The committee receives financial support from AGA, the Gas Technology Institute and other companies, organizations and individuals.

For information on purchasing the full report by the Potential Gas Committee, please call (303) 273-3886, fax (303) 273-3574. Information about the Potential Gas Committee's previous publications can be found at www.mines.edu/research/pgc.

The American Gas Association represents 185 local natural gas utilities that provide natural gas to nearly 50 million homes and businesses in all 50 states. Additional information is available on the AGA web site at www.aga.org.

- AGA -

Potential Gas Committee Natural Gas Resource Estimates
(as of December 31, 2000)

The Potential Gas Committee (PGC) reports gas resource estimates biennially in categories of decreasing certainty: Probable, Possible and *Speculative*. For each category, a minimum, most *likely*, and *maximum* resource volume is estimated for each of 89 geological provinces. The mean values shown on the following table were calculated by statistical aggregation of the *minimum*, most *likely* and maximum values for each category of potential resource. This procedure allows for direct comparison of PGC's estimates with gas resource assessments made by other organizations.

	(Mean Values, Tcf)		Change 1998- 2000
	2000	1998	
Traditional Resources:			
Probable resources (current fields)	207.0	216.0	
Possible resources (new fields)	332.2	293.0	
Speculative resources (traces)	<u>397.6</u>	<u>385.7</u>	
Subtotal Traditional	936.8	896.1	+4.4%
Coalbed Methane:			
Probable resources	16.3	14.4	
Possible resources	54.3	43.5	
Speculative resources	84.6	<u>83.6</u>	
Subtotal Coalbed Methane	155.2	141.4	+9.7%
Proved Reserves (DOE estimates)	167.4	<u>167.0</u>	
Grand Total	1254.4	1204.5	+4.5%

Note: Totals subject to rounding and slight differences due to statistical aggregation of distributions.

More

The PGC reports these estimates in three categories: Probable, Possible and *Speculative* for 89 assessed provinces that are grouped into seven geographic areas for traditional resources and coalbed methane.

The comparison of the statistically aggregated mean values for these seven areas for 1998 and 2000 are as follows:

Area	(Mean Values, Tcf)		Change 1998-2000
	2000	1998	
Atlantic.....	103.9	103.9	0
North Central	22.2	22.2	0
Gulf Coast.....	259.4	265.5	-2.3%
Mid-Continent	124.4	122.1	+1.9%
Rocky Mountain.....	176.6	150.0	+17.7%
Pacific.....	55.0	37.2	+47.8%
Alaska.....	193.8	193.8	0
Coalbed Methane (all areas).....	155.2	141.4	+9.7%
Proved Reserves (DOE Estimates).....	167.4	167.0	
Total U.S.....	1284	1204.5	+4.5%

Note: Totals subject to rounding and slight differences due to statistical aggregation of distributions.

The Potential Gas Committee today also released the latest in a series of reports comparing five sets of natural gas resource estimates published by various U.S. natural gas industry and government organizations. The report, *A Comparison of Estimates of Ultimately Recoverable Quantities of Natural Gas in the United States (Gas Resources Studies No. 8, March, 2001)*, examines the results, assumptions and methodologies of each of the sets of estimates. The report concludes that, while different organizations do not estimate the same precise categories of natural gas under the same set of assumptions, there is a consensus that a large, accessible potential gas resource exists which backs up the current inventory of U.S. proved reserves and is available to make a larger contribution to our Nation's energy supply.

The PGC report, *Potential Supply of Natural Gas in the United States (December 31, 2000)* and the estimates comparison report are now available and may be ordered as a set from the Potential Gas Agency, Colorado School of Mines, Golden, CO 80401-1887, for \$295 (\$315 for foreign shipment), if payment accompanies the order.

For additional information about ordering these and previous reports, contact John B. Curtis, Director, jbcurtis@mines.edu or Linda D'Epagnier, ldepagni@mines.edu Program Assistant, at the Potential Gas Agency, telephone 303-273-3886, fax 303-273-3574.

 Subject: NEPD Principals Meeting, 11 April, 4:00-5:30pm

The next NEPD Principals Meeting will be held in the Vice President's Ceremonial Office on Wednesday, April 11, 2001 from 4:00-5:30pm.

Due to space constraints, one agency representative may accompany their principal to this meeting.

An agenda for this meeting is forthcoming.

Sincerely,

John Fenzel

Subject: Change to Next Week's NEPD Principal's Meeting

Next Week's NEPD Principals Meeting will now be held in the Vice President's Ceremonial Office on Wednesday, April 18th, 2001 from 10:00-11:30am.

Due to space constraints, one representative per agency may accompany their principal to this meeting.

An agenda for this meeting is forthcoming.

This week's NEPD Principal's Meeting remains scheduled for this Wednesday, 11 April at 4.00pm.

Sincerely,

John Fenzel

I wanted to thank you again for coming by today and discussing area of possible areas of research. The timing was perfect, following up on the NEP release, for identifying areas of analytical need and opportunity. I apologize again for having to leave a bit early, but I am pleased we finally got a chance to have everyone in the room together. Phil Tseng and I would like to get back to you soon regarding Planning office analysis needs. I would also like to get copies of the quarterly reports from the work that Molly Macauley is doing for us from the competitive solicitation so we can discuss that in more detail. I have concerns about describing the approach as a budget decision tool at its apparent current point of application to these programs and technologies, but I'll need to learn more. I hope you got a good sense of the items we are most interested in. The way EERE is structured, we can fund analysis through my office (Planning, Analysis, and Evaluation), or through any of the sector offices. The lead analysts for each sector are: Buildings: Jerry Dion (586-9470) Industry: Ken Friedman (586-0379) or Peggy Podolak (586-6430) Power: Tina Kaarsberg (586-3802) [at the meeting] Transportation Phil Patterson (586-9121) [at the meeting] Federal Ellyn Krevitz (586-4740) Phil Tseng, Darrell Beschen, and Mike York are in the Planning office. Tim Kimbis is from TMS and on-site with us full time for on-the-spot analysis. For your information, I've cc:ed everyone from EERE & NREL who were present.

promote the initiatives as they apply to the plan. For each one, please give a short description of the program, and include any helpful details (such as technological accomplishments) or budget figures. We don't need a lengthy description (3-4 sentences at the most - kind of like the descriptions in the Budget Highlights document) but do need enough plain English detail to explain it to lay people. We are hoping to complete this task for the entire department by COB Friday; so would like to get as much information from the programs as possible by 1 p.m. Friday. Call if there are any questions. I can be reached at 586-5806. Many thanks, Lisa Cutler

My apologies, the language below is directly out of one of the recommendations in the NEP. So, we could use this... New language to use instead of saying we are awaiting the NEP: The just released National Energy Plan (NEP) provides a blueprint for how the Administration will increase energy supplies, including renewable energy. The NEP recommends that the President the Secretary of Energy to conduct a review of current funding and historic performance of renewable energy and alternative energy research and development programs in light of the recommendations of this report. Based on this review, the Secretary of Energy is then directed to propose appropriate funding of those research and development programs that are performance-based and are modeled as public-private partnerships.

(6)5

CN=MaryBeth Zimmerman/OU=EE/O=DOE>---<Margot Anderson@HQMAIL @ HQDOE>---<NEP

Message body

Thanks, in return, for your efforts to pull everything together for us on the NEP. For our purposes, I've asked Tom Kimbis to go through the full report to identify any other errors/misprints (we've found a couple already). I wanted to let you know we are doing this in case you get any questions.

NEPMASTER

ons on these items. Will be glad to cc: you when we are done.

----- Message body -----

John, I would like to be in the loop as well to review the material. In case you didn't see it, here is the message Lisa Cutler sent to Wendy describing what they are looking for. Wendy et al, Thanks in advance for your help on this assignment. We are trying to go through all 100+ recommendations in the NEP and identifying DOE programs and/or initiatives that already exist and are supportive of each initiative so we can promote the initiatives as they apply to the plan. For each one, please give a short description of the program, and include any helpful details (such as technological accomplishments) or budget figures. We don't need a lengthy description (3-4 sentences at the most - kind of like the descriptions in the Budget Highlights document) but do need enough plain English detail to explain it to lay people.

(b)5

Michael John Sullivan 05/18/2001 08:08 AM To: #EE-DAS, #EE-ADAS, Douglas Kaempf/EE/DOE@DOE cc: Randy Steer/EE/DOE@DOE, Abe Haspel/EE/DOE@DOE, Marybeth Zimmerman/EE/DOE@DOE, Michael McCabe/EE/DOE@DOE Subject: National Energy Policy Recommendations of Particular Interest to EERE

By the way, the deadline to Public Affairs is 12:00. But, we'll keep your 11:00 deadline. Marybeth's group will work with all the DAS organizations to ensure consistency of response. Think about a tiered response that would keep our oar in the water in as much as possible. Think classes such as "primary responsibility", "significant contributor to...", "important participant", etc. There have been some misassignments or "confused" assignments with other agencies that we need to "reappropriate the action". The deadline is absurd. We'll do the best noon time job as possible but we know the limitations.

----- Forwarded by John Sullivan/EE/DOE on 05/18/2001 07:53 AM ----- Darrell.Besche n@ee.doe.gov on 05/17/2001 09:30:25 PM To: Abe Haspel/EE/DOE@DOE, Mark Ginsberg/EE/DOE@DOE, Tom Gross/EE/DOE@DOE, Robert Dixon/EE/DOE@DOE, Denise Swink/EE/DOE@DOE, Elizabeth Shearer/EE/DOE@DOE, #RODirectors cc John Sullivan/EE/DOE@DOE, Joan Glickman/EE/DOE@DOE, William Parks/EE/DOE@DOE, Richard Moorer/EE/DOE@DOE, Robert Brewer/EE/DOE@DOE, Jerry Dion/EE/DOE@DOE, Gail MCKinley/EE/DOE@DOE, Edward Pollock/EE/DOE@DOE, Marybeth Zimmerman/EE/DOE@DOE, Nancy Jeffery/EE/DOE@DOE, Buddy Garland/EE/DOE@DOE, Wendy Butler/EE/DOE@DOE, #ROdeputy_Directors, Darrell Beschen/EE/DOE@DOE Subject: National Energy Policy Recommendations of Particular Interest to EERE

Per John's instructions in staff meeting to prepare for the Public Affairs request and the expected follow-ups we have prepared an excel spreadsheet containing all the NEP recommendations in which we have a principal responsibility and opportunity. We have also included recommendations in which we believe you will have at least an informational interest (labeled informational). You can respond to these at your own volition. Specific files are attached for each EERE sector/group. To the recommendations for your sector and those labeled EERE (of interest to all sectors) please add your really brief and layman response to the Public Affairs request (included in Wendy Butler's e-mail note earlier this evening): Existing programs or initiatives addressing the recommendation Brief program/initiative description And if germane, helpful details such as recent accomplishments Bearing in mind the original request, you may want to be figuring out what budget categories would be involved in addressing the recommendations. Please return your file to me and a copy to Tom Kimbis by 11 am Friday 5/18 (as of this writing) so we can put it together by the 1 pm deadline. I would like to allow the power office til noon should they need it, recognizing they have the largest number of recommendations to prepare. If anything changes between now and the due time... I will call the DAS. ----- Message body -----

From today's Washington Post re: NEP: "The recommendations' greater long-term impact will be presented in two weeks by the administration's energy task force, a Cabinet-level group headed by the vice president. A senior White House official said yesterday that the report will have five components. The most important, increasing supply, will lighten its emphasis on fossil fuels and nuclear power by including a goal of tripling renewable fuels by 2020. There will be tax incentives for research and development for technologies related to solar, biomass, methane gas and other energy sources. Other components will be a "modernizing conservation" section arguing for increasing energy efficiency through technology; modernizing infrastructure; enhancing the environment; and increasing energy security -- a combination of reducing reliance on foreign supply and keeping energy prices low and stable for low-income consumers. The task force is considering a number of conservation efforts, including tax incentives for the purchase of energy-efficient hybrid cars that run on gasoline and electricity and voluntary national targets for conserving energy, according to an administration source."

----- Message body -----

All, As drafts roll in (I've contacted most of you), I will combine and send out (by 6:00). We will be meeting Monday (2/19) at 10:00 to go over the NEP draft. We have to meet in PO's conference room (7B-040) so we don't have to go through the OSEC guards on a holiday (requires a list and pre-notification). If you are gone by 6:00 and can't access your DOE e-mail from home, leave me a fax number. Again, only sending to primary points of contact, not sub-section authors. Margot

----- Message body -----

All, Several of you may still have a wednesday 2/21 NEP meeting on your calendar (3:30). This is leftover from last week's tentative NEP schedule, which has changed slightly as many of you heard at yesterday's meeting. As of 10:00 today, no NEP meeting is scheduled for later today. However, you are not off the hook as new assignments may come at any time for text and/or review. I'll keep you posted. Thank you very much for your inputs (and patience) over the last several days. Margot

All, Joe has now received hard copies of chapters 4, 5, and 10 for our review (the ones we didn't do). Sorry but I only had e-copies of 10, rest are hard, so you have to stop by to collect. I'll out them on the PO 7C-034 open area credenza for pick up. Need your comments by Thursday COB - please e-mail me a comments page. I'll compile for Joe. Joe delivered our DOE-led chapters 1, 2, 3, 6, 7, 8 and we will await comments. I'm working on collecting figures and charts. By my calculations, we are still missing chapter 9 (DOT). The revised outline: chapter 1 -- energy supply and demand overview chapter 2 -- "problems" chapter 3 -- "consumer impact" chapter 4 -- environmental considerations of energy development (EPA lead) chapter 5 -- economic impact (Treasury lead) chapter 6 -- "energy efficiency" chapter 7 -- development of renewable energy and alternative energy chapter 8 -- "increased production" chapter 9 -- infrastructure chapter 10 -- energy security/international Margot

----- Message body -----

All, Attached is the latest draft of the energy situation section of the NEP plus the regional section. Comments from the CEA, OMB, EPA, Interior, USDA, etc. were incorporated. Your comments are welcome. Not quite sure what the schedule is but sooner is always better. As in Tuesday, I passed along your comments on chapters 4,5,9, and 10 (except EE's comments on chapter 9, which I just received this a.m.) They will go to DOT. Margot

Revised goal list. As we discussed, I am continuing to compile and order (by goal). E-me any more ideas. In WORD, please. I can't figure out how to get your the file list of ideas to date, but you have the package with the original filenames as headers. If you rewrite one, just rename so it will write over automatically when I save it. One file per idea is great but don't fret about it now - clearly, not all these ideas will move forward
Page 37

WHITE HOUSE

NEPMASTER

Task Force Charlie: can you distribute to Task Force? DOE Offices: Attached in the latest Chapter 6 - energy efficiency (initially drafted by EE). Draft went through inter-agency review process and this is the result (many favorable comments, by the way). I think I addressed the comments from CEA, Treasury, EPA and the Task Force leaders. EE - can you add sources where I indicated? Please suggest some graphics to put in. A text box list our efficiency program would be helpful - where can I find such a thing? EIA - fact check? Please let me know if you are going to comment (specific text inserts, please). Soon. Margot

CN=MaryBeth Zimmerman/OU=EE/O=DOE>---<Lisa Cutler@HQMAIL @ HQDOE;Christina Kielich@HQMAIL @ HQDOE>---<Re: Public Affairs Request -- NEP Recommendations

----- Message body -----

Attached is a draft response to your requests regarding EERE program activities and their relationship to the NEP recommendations. The lack of time available, and the multiple requests received, made it difficult to process this request. Much of this information should be revised and we will try to do that early next week. Please give me a call if you have any questions. I am at 6-7249. Wendy Butler 05/17/2001 05:22 PM To: Abe Haspel/EE/DOE@DOE, John Sullivan/EE/DOE@DOE, Michael McCabe/EE/DOE@DOE, Robert Dixon/EE/DOE@DOE, William Parks/EE/DOE@DOE, Mark Ginsberg/EE/DOE@DOE, Gail Mckinley/EE/DOE@DOE, Edward Pollock/EE/DOE@DOE, Denise Swink/EE/DOE@DOE, Robert Brewer/EE/DOE@DOE, Tom Gross/EE/DOE@DOE, Richard Moorer/EE/DOE@DOE, Elizabeth Shearer/EE/DOE@DOE, Joan Glickman/EE/DOE@DOE, MaryBeth Zimmerman/EE/DOE@DOE, Darrell Beschen/EE/DOE@DOE, Nancy Jeffery/EE/DOE@DOE, Buddy Garland/EE/DOE@DOE cc: Subject: Public Affairs Request -- NEP Recommendations

/2001 04:39:07 PM To: Wendy Butler/EE/DOE@DOE@HQMAIL cc: Subject: FW: Energy Plan wendy et al, Thanks in advance for your help on this assignment. We are trying to go through all 100+ recommendations in the NEP and identifying DOE programs and/or initiatives that already exist and are supportive of each initiative so we can promote the initiatives as they apply to the plan. For each one, please give a short description of the program, and include any helpful details (such as technological accomplishments) or budget figures. We don't need a lengthy description (3-4 sentences at the most - kind of like the descriptions in the Budget Highlights document) but do need enough plain English detail to explain it to lay people. We are hoping to complete this task for the entire department by COB Friday; so would like to get as much information from the programs as possible by 1 p.m.

NEPMASTER

Friday. Call if there are any questions. I can be reached at 586-5806.
Many thanks, Lisa Cutler

the entire article, go to [http://www.washingtonpost.com/wp-dyn/articles/
A48847-2001Mar23.html](http://www.washingtonpost.com/wp-dyn/articles/A48847-2001Mar23.html) Energy Crisis May Not Be Such a Bad Thing America ne
eds a real energy crisis, something packed with pain. That's the only way t
he country will speed up the introduction of needed fuel-saving technologi
es. A genuine crisis would do something else. It would end the illusory, s
elf-defeating search for the one and only perfect answer, exemplified by C
alifornia's insistence that automakers start building electric cars and tru
cks – zero-emission vehicles – for a mass market that doesn't wa
nt them. That's a heck of a mandate for a state that barely has enough elec
tric power to turn on its lights. Pain invites compromise. It renders myop
ia a luxury. People are more willing to consider the previously unthinkable
– such as the proliferation of diesel-powered vehicles in the Unite
d States. Consider: Diesel fuel contains more power per unit than gasoline,
compressed natural gas, or liquefied natural gas. Diesel engines, dependi
ng on models compared, use 30 percent to 60 percent less fuel than gasolin
e engines. Diesel-electric hybrid vehicles, large and small, generally get
better mileage than gasoline-electric hybrids. Yet, automakers are loath
to introduce large volumes of diesel-powered passenger vehicles in the Uni
ted States. That's because diesel has a bad reputation here. Environmental
sts, such as those at the Union of Concerned Scientists and the Public Int
erest Research Group, see "diesel" and "dirty" as being the same thing. If
the auto industry's sampling of public opinion is accurate, most American
motorists view diesel the same way. Diesel-powered passenger vehicles are
barely a blip on the statistical screen in this country. But 25 percent o
f all new passenger vehicles sold in Europe are diesel, according to resea
rch by the Diesel Technology Forum, a Virginia group representing the dies
el fuels industry. Why do Europeans and, for that matter, Japanese rely so
much on diesel? It's simple. They're feeling more pain in terms of high ga
soline prices and fuel availability. Presumably, Europeans and Japanese ca
re as much about breathing clean air as Americans. So, they've come up wit
h ways to take the dirt out of diesel – which is why American compani
es such as General Motors Corp. are relying on Japanese partners like Isuz
u Motor Co. to produce a new generation of diesel engines that could start
showing up in passenger vehicles sold here – eventually. It doesn't
have to be an either-or thing. Big problems such as energy conservation an
d clean air invite multiple solutions. Take the matter of electric vehicle
s. The California Air Resources Board seems to think that is the only way t
o go to end mobile-source pollution. And in keeping with the flawed logic
of "technology forcing" regulation, it is demanding that automakers start
selling certain percentages of those vehicles in the state, even though, a
fter repeated trials, consumers have demonstrated that they don't want the
m. The reason is that the current generation of battery-powered cars still
have problems that make them unacceptable to the mass market. One is price
. Even with state and local subsidies, they could cost at least \$5,000 mor
e than comparable vehicles powered by internal combustion engines. There i
s also the matter of driving range – still too short. And, of course,
there is the business of recharging – still too long in comparison t
o refueling times needed for internal combustion models. Does that mean el
ectrics should be dumped? No. It simply means that they should be develop
ed and marketed with common sense, as opposed to mandates. For example, pur
e electrics would make perfect sense in a community such as South Padre Is
land, Texas. It's a strip of a place, about six miles long and one mile wi
de. There is really no need for conventionally powered vehicles in a place
like that. Bicycles work fine. Battery-powered bikes work even better; and
Page 55

12844

b(5) + b(6)

NEPMASTER

battery-powered cars would be ideal for moving groups of four or more around the island. Similarly, battery-powered vehicles make sense in other communities, such as large college campuses and retirement villages. Otherwise, consumers should be given the opportunity to drive hybrids. That's gasoline-electric and diesel-electric hybrids. Currently, in the United States, Toyota Motor Corp. and Honda Motor Co. offer only gasoline-electric hybrids; the Toyota Prius sedan and Honda Insight coupe. These are wonderful little cars; great gas mileage. (The Prius averaged 52 miles per gallon and the Insight pulled about 54 mpg in Washington Post test drive.) Both are low-emission vehicles, and both have a remarkable amount of pep. Essentially, they have two power systems; fossil fuel and electric; that work in tandem, or in parallel with one another depending on power demands. Hybrid driving range is comparable to that of conventional models; and there is no need to plug them in; which means they can be used in California even during one of its now-famous "rolling blackouts." Also, there's this. All major car companies are developing hydrogen fuel-cell vehicles in which hydrogen is converted into electricity through an electrochemical process. The idea is to come up with a pure electric vehicle that matches or does better than conventional models in terms of cost, driving range, and cargo and passenger capacities; but that emits no pollutants and requires no plug-in for recharging. This is not wishful thinking. Billions of dollars are being poured into fuel-cell research efforts at places such as GM's Global Alternative Propulsion Center in Rochester, N.Y. Similar facilities are being operated by Ford Motor Co., Honda, Toyota, DaimlerChrysler Ag and Nissan/Renault. Also, the federal government, through its Partnership for a New Generation of Vehicles, is funding fuel-cell research. Some companies plan to introduce their first marketable fuel-cell models by 2004. GM, however, says it won't meet that schedule. "We could have a car ready by then," said Byron McCormick, director of GM's Alternative Propulsion Center. But he said that GM's primary goal is to have fuel-cell vehicles that have a market future. "We want to be the first company to sell one million fuel-cell vehicles annually," he said. That sounds good. But I've got my doubts. Reaching that kind of goal requires some kind of incentive, like, maybe, a do-or-die energy crisis.

Importance: High
Sensitivity: Confidential

Jay and John,

I have now officially gone crazy. This just in from DOT asking for help on their infrastructure chapter. EIA sent in some citations yesterday but DOT needs more, specifically to #1, 3, 44-45, 69-86. I know longer know who wrote what. Can we help? 69-86 are on electricity.

Let each of us know (by responding to all) which questions you can do, so we don't duplicate effort.

Margot

URGENT - DEADLINE 3:00 PM TODAY

Per message below from Office of the Vice President, we need citations to support the statements being developed for the National Energy Policy Report.

Please provide your information directly to Elena Melchert's email address (see below) with a cc to michelle.poche@ost.dot.gov and linda.lawson@ost.dot.gov

Margot/Joe (DOE): I understand you already addressed #31-43. Please also address #1, 3, 44-45, 69-86. I assume you might want to coordinate some of those w/EPA, so I've included Jacob Moss on the list of addressees for this email as well.

We'll see what might be doable on questions 69-86 but it seems to me that John Conti would be a good source for alot of the policy-like statements with no numbers.

Andy

Bill,

Confirmed. PO 21 sent in answers to 31-44. EIA took a crack at several scattered throughout. (Both sent to WH yesterday)

Please respond to all when answering so each of knows what has been covered.

Tom/Sue Ellen (DOI): Please address #88-91.
Kevin (DOC): Please address #93-94.

In addition to the attachment listing the numbered statements from which we are working, I am attaching a second document which is an old, outdated version of the chapter in question. This for the sole purpose of providing you with additional context, should you need it. However, keep in mind the statements you're working from reflect edits to the older document. Make no edits to the attachments. Send your citations separately, directly to Elena.

As always, please treat this information as CONFIDENTIAL.

Thanks,
Michelle

Subject: Presentation of the NEPD Group Report to the President

The Final Report of the National Energy Policy Development Group will be presented to the President during a Cabinet Meeting at 4:00pm on Wednesday, May 16th, in the Cabinet Room. Participants for this meeting are provided below.

Please do not hesitate to contact me if you have any questions: 456-7953

John Fenzel

PARTICIPANTS

The Cabinet

Vice President Richard Cheney
Secretary Paul O'Neill, Secretary of the Treasury
Secretary Gale Norton, Secretary of the Interior
Secretary Ann Veneman, Secretary of Agriculture
Secretary Don Evans, Secretary of Commerce
Secretary Norman Mineta, Secretary of Transportation
Secretary Spencer Abraham, Secretary of Energy
Secretary Colin Powell, Secretary of State
Secretary Donald Rumsfeld, Secretary of Defense
Secretary Tommy Thompson, Secretary of Health and Human Services
Secretary Roderick Paige, Secretary of Education
Secretary Mel Martinez, Secretary of Housing and Urban Development

Secretary Elaine Chao, Secretary of Labor
Secretary Anthony Principi, Secretary of Veterans Affairs
Mr. John Ashcroft, Attorney General
Ms. Christie Whitman, Administrator, Environmental Protection Agency
Mr. Joe Albaugh, Director, Federal Emergency Management Agency

Key Staff:

Andrew Card, Chief of Staff to the President
Karen Hughes, Senior Counselor to the President
Karl Rove, Senior Advisor to the President
Lewis Libby, Assistant to the President and Chief of Staff to the Vice President
Ari Fleischer, Assistant to the President and White House Press Secretary
Mary Matalin, Assistant to the President and Counselor to the Vice President
Mr. Mitchell Daniels, Director, Office of Management and Budget
Mr. Josh Bolten, Deputy Chief of Staff to the President
Mr. Lawrence Lindsey, Director, National Economic Council
Mr. Ruben Barrales, Assistant to the President for Intergovernmental Affairs
Dean McGrath, Deputy Chief of Staff to the Vice President
Andrew Lundquist, Executive Director, National Energy Policy Development Group
Cesar Conda, Assistant to the Vice President for Domestic Policy
John Howard, Director, Council on Environmental Quality
Karen Knutson, Deputy Director, National Energy Policy Development Group
Bob McNally, Special Assistant to the President for Economic Policy
Kyle McSarrow, Chief of Staff, Department of Energy
Jim Sims, Director of Communications, National Energy Policy Development Group
Dr. Glenn Hubbard, Chairman-Designate of the Council of Economic Advisors

Martin, Adrienne

I spoke with Randy Steer, who indicated he had a conversation with you on this topic. As you can see in the spreadsheet the \$277 million for wx included in the FY 2003 EERE budget proposal compares with the previously negotiated stream of requests. A request amount of \$281.2 million is scheduled for FY 2004 in this spreadsheet. Of course, this stream of requests assumes that Congress fully funds each year's Presidential request. I am unaware of any agreed to contingency funding request stream, or an agreed to method of adjusting the request stream, should Congress not appropriate the full amount of the request. As you are aware the funding request stream results in a cumulative additional funding amount of \$1.4 billion over ten years, which is consistent with President Bush's campaign website, and exceeds the \$1.2 billion figure included in the National Energy Policy. If you have an alternative stream of requests for wx, please forward that to Tom Heavey, who will investigate and reconcile the streams with you. (See attached file: wxadds2002-2011.xls) Jerry Dion Building Technology, State & Community Programs U.S. Department of Energy 202-586-9470 (V) 202-586-5145 (F) Robert_Sandoli@omb.eop.gov

Hi Jerry - Pleasure to meet you last week. Thanks for all the great info that you and Tom provided. Well Jerry, it's time for me to tap you as a resource already! I think I mentioned to you that your weatherization funding request (\$277 mil) was short of what I thought it was supposed to be (\$281 mil). I may have to wrong numbers, though. Ca

Subject: Re: Weatherization funding(Document link: Jerry Dion) Some important information with respect to the matter of \$1.4 billion vs. \$1.2 billion. The \$1.4 billion is stated in the NEP, not just in the President's campaign website! In the NEP Overview, page xv, there is a bullet which says "Double funding for the Department of Energy's weatherization Assistance Program, increasing funding by \$1.4 billion over 10 years." Furthermore, it is the \$1.4 billion figure which is consistent with the NEP statement here and also in the text of the recommendation section, that the projected increase "will roughly double the spending during that period on weatherization." It is the \$1.4 billion figure which does roughly double the Program, per the following calculation: when the President first made his statement of intention, the weatherization Program's funding level (i.e. for Program Year 2000) was \$135 million. Another \$135 million each year for ten years would be an increase of \$1.35 billion. Rounds to \$1.4 billion. So, when you star

Brad, Thanks for the invitation, however I will regretfully be unable to attend. Jerry Dion Building Technology, State & Community Programs U.S. Department of Energy 202-586-9470 (V) 202-586-5145 (F) "Brad Ashton" <bashton@xenergy.com> 09/12/2001 11:42 AM To: jerry.dion@ee.doe.gov
cc: Subject: Washington DC Meeting on Electricity Restructuring
Dear Jerry; I am writing to draw your attention to an upcoming late September energy meeting in Washington, D.C. on topics of current interest to energy and environmental policy leaders. Since I was formerly at PNNL, some of our mutual colleagues there suggested that you might appreciate hearing about the XENERGY Executive Forum conference. I especially want you to be aware that Mr. David Garman, DOE Asst Sec for EERE is a speaker on the first day of the event. As part of XENERGY's continuing Retail Energy Markets studies, the meeting focuses on national energy policies that affect the opening and development of competitive power markets. The attached brochure provides more detailed information on the agenda and location (the conference is on Monday, September 24, 2001 at the Crowne Plaza Hotel. If you would like to attend, please contact me below for more information and a pass to get in. Also, feel free to provide this information to your colleagues.
Regards, Brad Brad Ashton Director, Washington DC Consulting XENERGY, Inc 4400 Fair Lakes Ct Fairfax, VA 22033 tel: 703-633-6186 (direct) 703-633-6180 (receptionist) fax: 703-631-4119 email: bashton@xenergy.com web: http://www.xenergy.com (See attached file: dchappen.pdf) - dchappen.pdf

CN=James Fremont/OU=EE/O=DOE>-----<DL-ALLEE>-----<09/17/2001 11:48:41 AM>-----<Oct. 11 lecture - Slaying the Electricity Vampires in Your Home

----- Message body -----
The October 11 Buildings for the 21st Century lecture -- to which you are cordially invited -- will feature Alan Meier of Lawrence Berkeley National Laboratory (LBNL) discussing electricity vampires, household appliances which continuously draw power even when they are switched off, and collectively cost American households about \$4 billion every year. Mr. Meier will explain which appliances consume standby power, how you can reduce standby power consumption, large-scale measures to reduce standby power use, new technologies that cut standby power by 90 percent, and LBNL's international proposal for reducing standby power requirements. Date: Thursday, October 11, 2001 Time: 12:30 - 1:30 p.m. Location: The National Building Museum, 401 F Street NW, Washington, DC (Judiciary Square Metro Station on the Red Line) Speaker: Alan Meier, Lawrence Berkeley National Laboratory Topic: Slaying the Electricity Vampires in Your Home The Buildings for the 21st Century lectures, sponsored by the Department of Energy and the National Building Museum, are free and no registration is necessary. AIA members receive one hour of continuing education credit for attending. Future lectures: November 15, 2001 - David Garman, Assistant Secretary for Energy Efficiency and Renewable Energy, U.S. Department of Energy - What do Buildings Have to do with The National Energy Policy? No lecture is scheduled for December. Lectures will resume in January 2002. Information on DOE's efficient buildings programs is posted on: www.eren.doe.gov/buildings. For information on the National Building Museum, visit: www.nbm.org. To add someone to the lecture e-mail or flyer mailing list, contact Jim Fremont at james.fremont@ee.doe.gov or at 202-586-5735.

The speaker, Buddy Garland, is Director of EERE's Office of Planning, Budget and Outreach and is leading the Strategic Program Review. In September, the Office of Energy Efficiency and Renewable Energy (EERE) will complete a Strategic Program Review of all current EERE programs to assess past and present program strategies, performance, and benefits. The brown-bag seminar will take place at 12:00 p.m. on Thursday, September 13, 2001 in Conference Rooms A&B at the NREL Washington DC office. Please see below for an abstract of the talk. Our office is located in the Aerospace Center at 901 D Street, SW, Suite 930, Washington, DC 20024. We are across D Street from L'Enfant Plaza. We are accessible on the Blue, Orange, Yellow, and Green Metro lines through the L'Enfant Plaza Metro station. Parking is also available in the Aerospace Center. Soft drinks will be provided. We hope you will be able to attend this talk. Please feel free to pass this invitation on to a colleague who might be interested in attending. PLEASE LET US KNOW IF YOU WILL BE ATTENDING. Please RSVP to wanda_addison@nrel.gov, or call 202-646-5278 by Wednesday, September 12, 2001. If you previously

sly responded, no action is required. Abstract In September, the Office of Energy Efficiency and Renewable Energy (EERE) will complete a Strategic Program Review of all current EERE programs to assess past and present program strategies, performance, and benefits. The review will identify any programmatic activities that will need to be conducted to carry out the National Energy Policy (NEP). In addition to fulfilling NEP recommendations 4-2 and 6-3 as well as the direction of Secretary Abraham, the Strategic Program Review is an integral part of the evaluation, planning, budget formulation, and budget execution processes outlined in the EERE Strategic Management System. The review findings will serve as an integral part of an integrated baseline to produce the new EERE Strategic Plan, scheduled to be completed this fall, and the FY04 Budget request to Congress.

----- Addendum: Internet links to climate "technology profiles" can be exercised, via the following direction: Deborah Counce from ORNL posted the files for Appendix B on a web site so we can download them. The files may be accessed at <http://www.ornl.gov/~xce/> <<http://www.ornl.gov/~xce/>>. The files we are interested in begin with tp (e.g., tp_1, tp_2). She also included Page 28

DION mail

the pdf files for the appendix, which are in the folder titled "pdf files". These files were created in Word Perfect (not MS word). They are set up as tables, so they will not pull into MS word with all the pieces intact. The files do not open directly from the web site, so you need to save them to your hard drive or a zip disk. When you access the web site, double click on the appropriate folder (tp_1, tp_10, etc.). The word Perfect document file will come up (e.g., tps_1.wpd). Right click on the file and choose "save target as". Choose the destination to save the file and then click on "Save". You will get a screen showing the time it will take to save the file and that gives the progress of the save function. (Please be aware that some of the files are large [8.8 MB] so it may take a while for them to download.) If you have any questions, please let me know. Stan Bull (303) 275-3030 - C.DTF

----- Message body -----
The Rand summary report of the E-vision 2000 conference, the proceedings, and the formal papers have made their way through the compilation and peer review process (where appropriate) and are now available online. We have placed two copies of the 50 page Summary of Proceedings, Scenario Analysis, Expert Elicitation and Submitted Papers in your Interoffice Mail. The Summary of Conference Proceedings (PDF version), Session Transcripts, Formal Papers, Scenario Analyses and Delphi results and analysis are now available online at: <http://www.rand.org/scitech/stpi/Evision/index.html>. For your "quick study" I have attached a draft mini-summary of the report that I am creating for the NEP (5 pages). I am holding a hard copy of the report and formal papers should you find that more convenient to use than the electronic versions. Dave Garman has sent a copy of the summary and formal papers to Loretta and the other hill committee staff principles who supported this undertaking.

----- Message body -----

Afghanistan If you decide not to forward this, please send it to sarabande@brandeis.edu This is an actual petition, and "signatures" will be lost if you drop the line. It is outrageous..... as with the destruction of ancient artifacts of other religions.... and of course, I signed. ~ M. Dear Friends, Please do not ignore this e-mail. This is something that we as women and essentially as human beings need to support - I don't know if this is going to help but take 3 minutes out of your life to do your part: Madhu, the government of Afghanistan, is waging a war upon women. Since the Taliban took power in 1996, women have had to wear burqa and have been beaten and stoned in public for not having the proper attire, even if this means simply not having the mesh covering in front of their eyes. One woman was beaten to death by an angry mob of fundamentalists for accidentally exposing her arm(!) while she was driving. Another was stoned to death for trying to leave the country with a man who was not a relative. Women are not allowed to work or even go out in public without a male relative; professional women such as professors, translators, doctors, lawyers, artists and writers have been forced from their jobs and stuffed into their homes. Homes where a woman is present must have their windows painted so that she can never be seen by outsiders. They must wear silent shoes so that they are never heard. Women live in fear of their lives for the slightest misbehavior. Because they cannot work, those without male relatives or husbands are either starving to death or begging on the street, even if they hold PhDs. Depression is becoming so widespread that it has reached emergency levels. There is no way in such an extreme Islamic society to know the suicide rate with certainty, but relief workers are estimating that the suicide rate among women must be extraordinarily high: those who cannot find proper medication and treatment for severe depression and would rather take their lives than live in such conditions. At one of the rare hospitals for women, a reporter found still, nearly lifeless bodies lying motionless on top of beds, wrapped in their burqa, unwilling to speak, eat, or do anything, but slowly wasting away. Others have gone mad and were seen crouched in corners, perpetually rocking or crying, most of them in fear. When what little medication that is left finally runs out, one doctor is considering leaving these women in front of the president's residence as a form of protest. It is at the point where the term "human rights violations" has become an understatement. Husbands have the power of life and death over their women relatives, especially their wives, but an angry mob has just as much right to stone or beat a woman, often to death, for exposing

DION mail

g an inch of flesh or offending them in the slightest way.
Women enjoyed relative freedom to work, to dress generally as they
wanted, and to drive and appear in public alone until only 1996. T
he rapidity of this transition is the main reason for the depressio
n and suicide. Women who were once educators or doctors or simpl
y used to basic human freedoms are now severely restricted and trea
ted as subhuman in the name of right-wing fundamentalist Islam.
It is not their tradition or 'culture,' but it is alien to them,
and it is extreme even for those cultures where fundamentalism
is the rule. Everyone has a right to a tolerable human existenc
e, even if they are women in a Muslim country. If we can threaten
military force in Kosovo the name of human rights for the sake o
f ethnic Albanians, citizens of the world can certainly express
peaceful outrage at the oppression, murder and injustice committed
against women by the Taliban. STATEMENT: In signing this, we a
gree that the current treatment of women in Afghanistan is compl
etely UNACCEPTABLE and deserves action by the United Nations and
that the current situation overseas will not be tolerated. wome
n's Rights is not a small issue anywhere, and it is UNACCEPTABLE
for women in 2000 to be treated as subhuman and as so much property.
Equality and human decency is a fundamental RIGHT, not a freedom +
to be granted, whether one lives in Afghanistan or elsewhere.

MaryBeth, please check with Buddy . . . we are all tied up with a FY02 must do budget exercise. Perhaps Abe or John can intervene to get more time on NEP. CFO and policy need to find a way to accomodate each other on deadlines - it's mostly the same people who are trying to do both, as it ought to be. Jerry

Subject: new version of overview sections attached. This replaces the draft for new sections I & II you received late yesterday. 1. Please review this draft ASAP per Margo Anderson's request below. 2. Please provide Darrell Beschen with any regional information that might be helpful for a chapter on regional energy issues. Everything is due to the white House today. We will be meeting with Margo Anderson at 11:30 today, and may get further instructions at that time. We may also be sending out subsequent drafts for quick comment, if possible.
Thanks.

Thanks for all the comments I didn 't take all your suggestions. I tried to make every accommodation but had to make a judgment call about what worked and what didn't. Still to do: 1) Fact checking. Still blanks to fill in. In some cases, we need a sourc e. EIA cannot corroborate without it. 2) Please read red edits - these ar e outstanding issues that still need attention and/or discussion. 3) Plan on meeting in PO conference room (7B-040) on Tuesday 2/20 at 11:30 to dis cuss draft and get new instructions that will come out of a morning WH mee ting.

Evelyn,

Here are some comments on a previous version of chapter 10. They might still be useful.

Margot

Subject: NEPD Deadline

We made a mistake in telling you in our prior e-mail that the Friday meeting is at 1:00 in the afternoon. It's at 10:00 in the a.m. So, the earlier you can get us your comments, the better. Thank you for all your help!
