

SECTION II Offenses Reported

Violent Crime content revised 02/17/06

Definition

Violent crime is composed of four offenses: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. According to the Uniform Crime Reporting (UCR) Program's definition, violent crimes involve force or threat of force.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2003	1,383,676	475.8
2004	1,367,009	465.5
<i>Percent change</i>	-1.2	-2.2

National Volume, Trends, and Rates

In 2004, there were an estimated 1,367,009 violent crimes nationwide. Of these, aggravated assaults comprised 62.5 percent; robbery, 29.4 percent; forcible rape, 6.9 percent; and murder, 1.2 percent. (Based on Table 1.)

The UCR Program examines data in increments of 2, 5, and 10 years to formulate trend information. From 2003 to 2004, the estimated volume of violent crime in the United States fell by 1.2 percent. The 5- and 10-year trend data showed that the estimated number of violent crimes decreased 4.1 percent compared with the 2000 figure and 24.0 percent compared with 1995 data. The occurrence of violent crime throughout the Nation in 2004 was estimated at a rate of 465.5 violent offenses per 100,000 inhabitants, continuing a 13-year decline. (See Tables 1 and 1A.)

A look at the volume of individual offenses within the violent crime category showed that in a year-to-year comparison of 2003 and 2004 data, the estimated number of robberies decreased 3.1 percent, of murders 2.4 percent, and of aggravated assaults 0.5 percent. The only violent crime to show any increase from 2003 to 2004 was forcible rape at 0.8 percent. (See Tables 1 and 1A.)

In terms of the rate of offenses for each of the four violent crimes, aggravated assault had the highest rate, estimated at 291.1 offenses per 100,000 inhabitants. There were an estimated 136.7 robberies, 32.2 forcible rapes, and 5.5 murders for each 100,000 resident population in 2004. (See Table 1.)

Figure 2.2

Violent Crime
Percent Change from 2000

Regional Offense Trends and Rates

As explained in Appendix III, the UCR Program groups the states into four regions: the Northeast, the Midwest, the South, and the West. The population distribution of the regions is provided in Table 3, and the estimated volume and rate of violent crime by region are presented in Table 4. An examination of violent crime by region showed that:

The Northeast

The Northeast accounted for an estimated 18.6 percent of the Nation's population and an estimated 15.6 percent of violent crime in 2004. Of the four regions, the Northeast had the

largest decrease, 2.5 percent, in the volume of violent crime. In addition, each of the offense types comprising the violent crime category had decreases in the volume of violent crime when compared with 2003 data. The number of robbery offenses fell 3.3 percent; forcible rape, 2.7 percent; aggravated assault, 2.0 percent; and murder, 1.9 percent.

In this region, there were an estimated 390.7 violent crimes for each 100,000 resident population, a 2.8-percent decline from the 2003 rate. By offense, the rates were estimated at 220.6 aggravated assaults, 143.6 robberies, 22.4 forcible rapes, and 4.2 murders per 100,000 inhabitants.

The Midwest

With an estimated 22.4 percent of the Nation's population residing in the Midwest, the region accounted for an estimated 18.8 percent of violent crime. This region had a 1.7-percent decline in violent crime in 2004 compared with 2003 data. The number of murders in that region fell 3.4 percent, aggravated assaults declined 2.1 percent, and robberies decreased 1.6 percent. The offense of forcible rape was the only violent crime that showed an increase in volume (1.1 percent), compared with 2003 data.

Table 2.1

Violent Crime

Percent Distribution by Month, 2000-2004

Month	2000	2001	2002	2003	2004
January	7.9	7.7	7.9	7.8	7.8
February	7.2	6.7	6.8	6.4	7.0
March	8.1	7.9	7.9	8.2	8.3
April	8.1	8.1	8.1	8.3	8.2
May	8.9	8.7	8.7	8.9	9.0
June	8.6	8.7	8.8	8.8	8.6
July	9.3	9.3	9.3	9.2	9.2
August	9.1	8.9	9.3	9.2	9.0
September	8.6	8.7	9.2	8.6	8.5
October	8.7	9.0	8.6	8.8	8.6
November	7.8	8.2	7.7	7.9	7.8
December	7.7	8.1	7.7	7.8	7.9

The rate of violent crime in the Midwest was estimated at 391.1 offenses per 100,000 resident population, a 2.1-percent decrease from the 2003 rate. There were 233.2 aggravated assaults, 116.8 robberies, and 4.7 murders per 100,000 inhabitants. Forcible rape, with a rate of 36.4 offenses per 100,000 inhabitants, was the only violent crime with an increase (0.7 percent) in the rate from the 2003 figure.

The South

The South, the Nation's most populated region, had an estimated 36.1 percent of the Nation's inhabitants. An estimated 41.9 percent of the Nation's violent crimes occurred in this region. Overall, violent crime decreased slightly (0.3 percent) in the region when compared with 2003 figures. The number of robberies and murders decreased, 4.1 percent and 3.7 percent, respectively. However, from 2003 to 2004, the estimated volume of forcible rapes and aggravated assaults in that region increased 2.6 percent and 1.2 percent, respectively.

The estimated rate of violent crime in the South was 540.6 offenses per 100,000 in population, a decline of 1.6 percent compared with the 2003 rate. By offense, this region experienced 354.3 aggravated assaults (a 0.2-percent decline), 145.6 robberies (a 5.4-percent decrease), and 6.6 murders (a 5.0-percent decline) per 100,000 in population. Forcible rape was the lone violent crime to increase (1.2 percent) in the rate, 34.1 per 100,000 inhabitants.

The West

With an estimated 23.0 percent of the Nation's population, the West had an estimated 23.7 percent of violent crime. Overall in this region, violent crime declined 1.6 percent. Three of the four violent offenses decreased in the volume of violent crime compared with 2003 data—robbery decreased 2.5 percent,

aggravated assaults declined 1.4 percent, and forcible rape declined 0.4 percent. A comparison of the 2004 data with 2003 figures showed that murder was the only offense in the West to show an increase, 0.8 percent.

Overall in this region, the estimated rate of violent crime was 480.7 offenses per 100,000 inhabitants, a 3.0-percent decline from the 2003 rate. By offense, the murder rate, 5.7 per 100,000 in population, showed virtually no change from the 2003 data. The rate for aggravated assault was 305.4 per 100,000 inhabitants, a 2.8-percent decrease. The rate of robbery, 136.5, declined 3.9 percent, and the rate of forcible rape, 33.2, decreased 1.8 percent.

Community Types

The UCR Program aggregates crime data into three community types: Metropolitan Statistical Areas (MSAs), cities outside metropolitan statistical areas, and nonmetropolitan counties. Appendix III provides additional information regarding community types. Nearly 83 percent (82.9) of the Nation's population lived in MSAs in 2004. Residents of cities outside MSAs accounted for 6.8 percent of the country's population, and 10.4 percent of the Nation's population lived in nonmetropolitan counties. (Based on Table 2.)

A look at the volume of violent crime by community type showed that an estimated 90.0 percent of violent crime occurred in the Nation's MSAs, 5.5 percent of violent crime occurred in cities outside MSAs, and 4.5 percent of violent crime occurred in the Nation's nonmetropolitan counties. (Based on Table 2.) By community type, the violent crime rates were estimated at 505.8 violent offenses per 100,000 inhabitants within MSAs, 377.0 violent offenses per 100,000 inhabitants in cities outside

MSAs, and 201.5 violent offenses per 100,000 inhabitants in nonmetropolitan counties. (See Table 2.)

Population Groups: Trends and Rates

In the UCR Program, data are also aggregated into population groups, a description of which is provided in Appendix III. The Nation's cities collectively had a 1.9-percent decrease in the number of violent offenses in 2004 compared with 2003 data. By city population group, cities with populations of 25,000 to 49,999 inhabitants had the lone increase (1.0 percent) in the volume of violent crime. Violent crime decreased by 1.6 percent in the Nation's metropolitan counties but increased slightly (0.3 percent) in the Nation's nonmetropolitan counties. (See Table 12.)

The law enforcement agencies in the Nation's cities, collectively, reported 577.0 violent offenses per 100,000 in population in 2004. By population group with the *city* label, law enforcement agencies in the Nation's largest cities, those with 250,000 and over inhabitants, reported the highest rate, 932.6 violent crimes for each 100,000 inhabitants in 2004, and agencies in cities with 10,000 to 24,999 inhabitants reported the lowest rate, 303.7. Law enforcement agencies in the Nation's metropolitan counties reported a rate of 331.1 violent crimes per 100,000 resident population; those in nonmetropolitan counties reported a rate of 215.6 violent crimes per 100,000 resident population. (See Table 16.)

Weapons Distribution

The UCR Program collects weapon data for murder, robbery, and aggravated assault offenses. An examination of these data indicated that most violent crime (30.7 percent) involved the use of

personal weapons, such as hands, fists, feet, etc. Firearms were used in 26.4 percent and knives or cutting instruments were used in 15.5 percent of violent crime. Other dangerous weapons were used in 27.3 percent of violent offenses. (Based on Tables 2.9 and 19.)

Clearances

In the UCR Program, an offense may be cleared by an arrest when at least one person is arrested, charged with the commission of the offense, and remanded to the court for prosecution. An agency may also clear an offense by exceptional means when some force outside the agency's control prevents the arrest of the individual. More in-depth information regarding clearances is provided in Section III.

In 2004, 46.3 percent of violent crime in the Nation was cleared by arrest or exceptional means. Typical of the violent offenses, murder had the highest percentage of offenses cleared. In 2004, law enforcement agencies cleared 62.6 percent of murders, 55.6 percent of aggravated assaults, 41.8 percent of forcible rapes, and 26.2 percent of robberies. (See Table 25.)

A comparison of clearance data by region showed that law enforcement agencies in the Northeast cleared 50.3 percent of the violent crime reported to them; the West, 47.1 percent; the South, 46.2 percent; and the Midwest, 41.8 percent. (See Table 26.)

Collectively, in the Nation's cities, law enforcement agencies cleared 43.7 percent of violent crime. Of the population groups with the city designation, the Nation's smallest cities, those with 10,000 and less in resident population, had the highest percentage of violent offenses cleared, 57.7 percent. Cities with 250,000 and over inhabitants had the lowest percentage of violent offenses cleared, 38.5 percent. Law enforcement

agencies in the Nation's metropolitan counties cleared 54.5 percent of violent crime; agencies in the Nation's nonmetropolitan counties cleared 60.6 percent of violent crime. (See Table 25.)

Clearances and Juveniles

When an individual under the age of 18 (a juvenile) is cited to appear before juvenile authorities, the incident is cleared by arrest despite the lack of a physical arrest. In addition, the UCR Program considers any clearance that involves both adults (those aged 18 or older) and juveniles as an adult clearance. Therefore, the juvenile clearance data are limited to those clearances involving juveniles only.

In 2004, 12.1 percent of violent crime clearances nationwide involved only juveniles. In the Nation's cities collectively, 12.3 percent of violent crime clearances involved only juveniles. Of the Nation's city population groups, cities with 25,000 to 49,999 inhabitants had the highest percentage of clearances for violent crime solely involving juveniles, 14.2 percent; cities with 250,000 and over inhabitants had the lowest percentage, 10.5 percent. Law enforcement agencies in metropolitan counties reported that 12.3 percent of their clearances for violent crime involved only juveniles, and those in the Nation's nonmetropolitan counties, 9.3 percent of clearances. (See Table 28.)

Definition

The Uniform Crime Reporting (UCR) Program defines murder and nonnegligent manslaughter as the willful (nonnegligent) killing of one human being by another.

The classification of this offense is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. The UCR Program does not include the following situations in this offense classification: deaths caused by negligence, suicide, or accident; justifiable homicides; and

attempts to murder or assaults to murder, which are scored as aggravated assaults.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2003	16,528	5.7
2004	16,137	5.5
<i>Percent change</i>	-2.4	-3.3

National Volume, Trends, and Rates

The UCR Program’s homicide data for 2004 showed that for the first time in 4 years, the estimated number of murders in the United States decreased. An estimated 16,137 persons were murdered nationwide, a decline of 2.4 percent from the 2003 figure. An analysis of 5- and 10-year trend data showed that the 2004 estimate increased 3.5 percent from the 2000 estimate, but decreased 25.3 percent from the

estimated number of murders a decade ago (1995).

Nationwide, the 2004 data yielded an estimated rate of 5.5 murders per 100,000 inhabitants, a 3.3-percent decline from the 2003 rate and a 0.8-percent decrease compared with the 2000 rate. In addition, the 2004 rate was 33.2 percent lower than the national murder rate for 1995. (Based on Tables 1 and 1A.)

Figure 2.3

Murder
Percent Change from 2000

Regional Offense Trends and Rates

The UCR Program divides the United States into four regions: the Northeast, the Midwest, the South, and the West. (More details concerning geographic regions are provided in Appendix III.) A regional overview of the 2004 murder data follows.

The Northeast

In 2004, the Northeast accounted for 18.6 percent of the Nation’s population and 14.1 percent of the estimated number of murders. With an estimated 2,269 murders, the Northeast registered a 1.9-percent decline when compared with the 2003 estimate. The offense rate for this region was estimated at 4.2 murders per 100,000 residents, a 2.1-percent decline

compared with the 2003 rate. (See Tables 3 and 4.)

The Midwest

The Midwest accounted for 22.4 percent of the United States' total population and 19.3 percent of the estimated number of murders that occurred in 2004. There were an estimated 3,109 murders in this region, a figure 3.4 percent lower than the 2003 estimate. The Midwest experienced a murder rate of 4.7 offenses per 100,000 inhabitants, a 3.9-percent decrease from the 2003 rate. (See Tables 3 and 4.)

The South

The Nation's most populous region, the South, accounted for 36.1 percent of the total population in 2004. Forty-three (43.0) percent of the estimated number

of murders were reported in this region. The estimated 6,942 murders reflected a 3.7-percent decline when compared with the previous year's figure. The region posted an estimated rate of 6.6 murders per 100,000 in population, a 5.0-percent decline from the 2003 rate. (See Tables 3 and 4.)

The West

Twenty-three percent of the Nation's inhabitants lived in the West in 2004, and 23.7 percent of the estimated number of murders were reported in this region. The West was the only region of the country in which the number increased (0.8 percent) from 2003 to 2004 for an estimated 3,817 murders. This region experienced a murder rate (5.7 offenses per 100,000 inhabitants) that remained virtually unchanged from the 2003 rate. (See Tables 3 and 4.)

which accounted for 6.8 percent of the total and a rate of 3.6 murders per 100,000 inhabitants. (Based on Table 2.)

Population Groups: Trends and Rates

The UCR Program uses the following population group designations in its data presentations: cities (grouped according to population size) and counties (classified as either metropolitan or nonmetropolitan). A breakdown of these classifications is furnished in Appendix III.

A review of the data for the two-year period 2003 to 2004 revealed that the Nation's cities experienced a 5.1-percent decrease in the number of murders. Cities with populations under 10,000 residents had the greatest proportional decrease (-12.0 percent) in the number of murders. However, cities with 25,000 to 49,999 inhabitants were the only city group that experienced an increase (2.1 percent) in the number of homicides. A review of the county population groups showed that metropolitan counties also experienced an increase (1.9 percent) in the number when compared with the 2003 figure; however, nonmetropolitan counties had a 1.3-percent decrease. (See Table 12.)

An examination of the 2004 data showed that cities collectively had a rate of 6.6 murders per 100,000 residents. The largest cities (those with 250,000 and over in population) experienced the highest rate among the city population groups (12.5 murders per 100,000 inhabitants). The smallest cities (those under 10,000 in population) had the lowest murder rate (2.4 offenses per 100,000 inhabitants). The homicide rates for metropolitan and nonmetropolitan counties were 3.9 and 3.7 per 100,000 residents, respectively. (See Table 16.)

Table 2.2

Murder

Percent Distribution by Month, 2000-2004

Unknown race	195	128	41	26
Total	14,121	10,990	3,099	32

Community Types

The UCR Program aggregates crime data for three community types: Metropolitan Statistical Areas (MSAs), cities outside MSAs, and nonmetropolitan counties outside MSAs. In 2004, MSAs accounted for 82.9 percent of the Nation's population and 88.8 percent of the total estimated number of murders that occurred in the United States. With 14,334 homicides, MSAs experienced a rate of 5.9 murders per 100,000 residents. Cities outside MSAs accounted for 6.8 percent of the U.S. population and, with an estimated 704 murders, accounted for 4.4 percent of the murders in the Nation. The murder rate for these cities was 3.5 offenses per 100,000 in population. (Based on Table 2.)

In 2004, a little over 10 percent (10.4) of the Nation's population was comprised of nonmetropolitan counties. These counties had 1,099 murders,

Offense Analysis

Supplementary Homicide Reports

The UCR Program's Supplementary Homicide Reports provide information regarding the age, sex, and race of both the murder victim and the offender; the type of weapon used in the offense; the relationship of the victim to the offender; and the circumstance surrounding the incident. Of the estimated 16,137 murders that occurred in the United States in 2004, law enforcement agencies contributing data to the UCR Program submitted Supplementary Homicide Reports for 14,121 of the murders. An overview of the information gleaned from these supplemental reports follows.

Table 2.6

Murder Victim/Offender Relationship by Age, 2004 [Single victim/single offender]

Age of victim	Total	Age of offender		
		Under 18	18 and over	Unknown
Total	7,039	355	6,042	642
Under 18	720	107	583	30
18 and over	6,216	245	5,372	599
Unknown	103	3	87	13

NOTE: This table is based upon incidents where some information about the offender is known by law enforcement. It excludes incidents reported with a value of "unknown offender."

Victims

Based on 2004 supplemental homicide data (where the age, sex, or race of the murder victims were *known*), 90.2 percent of murder victims were adults and 9.8 percent of the victims were juveniles. Of the total number of homicide victims, 78.0 percent were male and 22.0 percent were female. Where the races of the victims were known, 49.8 percent of the victims were white, 47.6 percent were black, and 2.6 percent were American Indian/Alaskan Native or Asian/Pacific Islander. (Based on Table 2.4.)

Offenders

The data for 2004 concerning the murders for which the offenders were known showed that 91.7 percent of the offenders were adults and 8.3 percent were juveniles. A breakdown of the data by gender showed that 90.1 percent of the offenders were male and 9.9 percent were female. In homicides where the race of the offender was known, 50.0 percent were black, 47.6 percent were white, and 2.4 percent were other races. (Based on Table 2.5.) Data from single victim/single offender incidents showed that 92.2 percent of black victims were murdered by black offenders, and 84.8

percent of white victims were murdered by white offenders. (Based on Table 2.7.)

Weapons

Of those incidents in which the murder weapon was specified, 70.3 percent of the homicides that occurred in 2004 were committed with firearms. Of those, 77.9 percent involved handguns, 5.4 percent involved shotguns, and 4.2 percent involved rifles. Approximately 12.4 of the murders were committed with other types or unspecified types of firearms. Knives or cutting instruments were used in 14.1 percent of the murders; personal weapons, such as hands, fists, and feet, were used in 7.0 percent of murders, and blunt objects (i.e., clubs, hammers, etc.) were used in 5.0 percent of the homicides. Other weapons, such as poison, explosives, narcotics, etc., were used in 3.6 percent of the murders. (Based on Table 2.9.)

Victim/Offender Relationships

Of the homicides for which law enforcement provided supplemental data to the UCR Program, the victim-offender relationship was unknown for 44.1 percent of the victims. For the incidents in which the relationships were known, 76.8 percent of the victims knew their killers and 23.2 percent were slain by

strangers. Among the incidents in which the victims knew their killers, 29.8 percent were murdered by family members and 70.2 percent were killed by acquaintances. (Based on Table 2.11.) The 2004 data also revealed that 33.0 percent of female victims were killed by their husbands or boyfriends, and 2.7 percent of the male victims were slain by their wives or girlfriends. (Based on Tables 2.4 and 2.11.)

Circumstances

The supplemental homicide data showed that the circumstances were unknown for 35.0 percent of the murders that occurred in 2004. For the murders for which the circumstances were known, 22.8 percent of the murders involved another felony, such as forcible rape, robbery, or burglary. Investigators suspected that another 1.3 percent of homicides likely resulted during another felonious activity. Law enforcement cited that arguments, including those over money or property, were the cause for 44.4 percent of the murders. Other circumstances, such as brawls and juvenile gang killings, were noted in 12.8 percent of the murders. Specific circumstances were not provided for 18.8 percent of the incidents. (Based on Table 2.13.)

Clearances

Law enforcement agencies reporting crime to the UCR Program can clear, or “close,” the offense in one of two ways: by arrest or, when elements beyond the control of law enforcement prevent the agency from arresting and formally charging the offender, by exceptional means. (Additional information regarding clearances is provided in Section III, Offenses Cleared.) Of all the crime categories, murder typically has the highest percentage of clearances. This trend continued in 2004 as law enforcement

2003	247	203	163	6	20	14	23	13	8
2004	229	170	139	14	7	10	38	10	11

¹The killing of a felon, during the commission of a felony, by a private citizen.

cleared 62.6 percent of the murders that occurred in the Nation. (See Table 25.)

In the Nation’s regions, law enforcement in the Northeast cleared 66.0 percent of their murders; agencies in the South and West cleared 65.7 percent and 58.3 percent, respectively; and law enforcement in the Midwest cleared 58.1 percent of their murder offenses. (See Table 26.)

Clearance data for the Nation’s cities, metropolitan counties, and non-metropolitan counties revealed that law enforcement agencies in these population groups cleared 61.2 percent, 64.4 percent, and 74.2 percent, respectively, of their murder offenses in 2004. Of the city population groups, law enforcement in cities with populations of 10,000 to 24,999 cleared the highest percentage of their homicides (74.4 percent), and law enforcement in the largest cities (those with 250,000 or more inhabitants) cleared the lowest proportion (58.0 percent). (See Table 25.)

Clearances and Juveniles

Special conditions exist concerning clearances and juveniles. Data users should know that when an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program consid-

ers the incident for which the juvenile is being held responsible to be cleared by arrest, although a physical arrest may not have occurred. In addition, clearances that include both adult and juvenile offenders are classified as clearances for crimes committed by adults. Additional details concerning clearances as they relate to juveniles are provided in Section III, Offenses Cleared.

The percentage of clearances reflecting juveniles’ involvement in crime is typically proportionately lower for murder than for any other offense. This trend continued in 2004 as individuals under age 18 accounted for nearly 5 percent (4.7) of the murder clearances nationwide.

In the Nation’s cities collectively, 4.8 percent of murder clearances involved only juveniles. Among the city population groups, the Nation’s largest cities (those with 250,000 or more residents) reported the highest percentage (5.7 percent) of clearances that involved solely juveniles. The lowest percentage of such clearances (1.8 percent) occurred in cities with populations of 10,000 to 24,999. In the two county groups, 5.8 percent of the murder clearances that involved solely juveniles were reported in the metropolitan counties and 2.3 percent of the

clearances were reported in the nonmetropolitan counties. (See Table 28.)

Justifiable Homicide

Certain willful killings must be reported as justifiable, or excusable. In the UCR Program, justifiable homicide is defined as and limited to:

- The killing of a felon by a peace officer in the line of duty.
- The killing of a felon, during the commission of a felony, by a private citizen.

Because these killings are determined through law enforcement investigation to be justifiable, they are tabulated separately from the murder and nonnegligent manslaughter classification.

During 2004, law enforcement agencies provided supplemental data for 666 justifiable homicides. A breakdown of those figures revealed that law enforcement officers justifiably killed 437 felons and private citizens justifiably killed 229 felons. Tables 2.15 and 2.16 provide additional information about justifiable homicides.

Forcible Rape content revised 02/17/06

Definition

Forcible rape, as defined in the Uniform Crime Reporting (UCR) Program, is the carnal knowledge of a female forcibly and against her will. Assaults and attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

Trend

Year	Number of offenses	Rate per 100,000 inhabitants
2003	93,883	32.3
2004	94,635	32.2
Percent change	+0.8	-0.2

Offense Methodology

The UCR Program counts one offense for each female victim of a forcible rape, attempted forcible rape, or assault with intent to rape, regardless of the victim's age. The Program classifies as Part II offenses all other crimes of a sexual nature and, as such, collects only arrest statistics concerning them. Statutory rape, in which no force is used but the female victim is under the age of consent, is included in the aggregated arrest total for the sex offenses category. Sexual attacks on males are counted as aggravated assaults or sex offenses, depending on the circumstances and the extent of any injuries.

National Volume, Trends, and Rates

During 2004, approximately 94,635 females nationwide were victims of forcible rape. (See Table 1.) This estimate represents a small increase of 0.8 percent from the 2003 number and a 4.9-percent rise from the 2000 figure. However, the 2004 data showed a 2.9-percent decrease when compared to the 1995 estimated volume of female forcible rapes.

In preparing rate tables for inclusion in this report, the UCR Program's computer system automatically calculates offense rates per 100,000 persons for all Part I crimes. Thus, the rate data that appear in the trend box above and in subsequent tables in this book are based upon the total U.S. population. However, in preparing this narrative, UCR Program staff manually recalculated the 2004 rate of female rapes based upon the national female population provided by the U.S. Bureau of the Census. The recalculation resulted in a rate of 63.5 (63.46) rape victims per 100,000 females. The 2004 rate was virtually unchanged from the prior year's estimate (63.54). Although the 2004 rate is 1.1 percent higher than the 2000 rate of 62.7, it is 12.4 percent lower than the 1995 rate, which was 72.5 forcible rapes per 100,000 females. (See Tables 1 and 1A.)

Figure 2.5

Forcible Rape

Percent Change from 2000

Of the forcible rapes in 2004, law enforcement agencies reported that 91.6 percent were completed; the remainder were attempts or assaults to rape. (Based on Table 19.)

Regional Offense Trends and Rates

The national UCR Program conducts regional analyses of crime by separating the United States into four areas: the Northeast, the Midwest, the South, and the West. (A map delineating these regions appears in Appendix III.) The following commentary offers estimates of the volume of female rapes, the percent change from the prior year's estimate, and the rate of rape per 100,000 female residents within each region. Although the 2-year trend (2004 vs 2003) indicated that the rate of female rapes was virtually unchanged nationally, the regional breakdowns revealed some variations from the prior year's data. (Based on Tables 3 and 4.)

The Northeast

During 2004, 12,243 forcible rapes of females—12.9 percent of the national total—occurred in the Northeastern states. The region's rate of 44.2 forcible rapes per 100,000 females was the Nation's lowest and reflected a 2.9-per-

cent decrease from the 2003 rate, which was 45.5.

The Midwest

Approximately one quarter of all female rapes during 2004 (25.3 percent) happened in the Midwest Region. With an estimated 23,900 forcible rapes of females, this region had the highest rate: 71.6. The 2004 rate represented a small increase (0.7 percent) over the 71.1 rate estimated for 2003.

The South

The South, the most populous region of the United States, accounted for 38.2 percent of the national total of female rapes. Based on an estimated 36,113 female victims in 2004, the rate of forcible rapes for the region was 67.1 per 100,000 females. This rate was a 1.3-percent increase compared with the 2003 estimate of 66.3 offenses per 100,000 females.

The West

In 2004, the West accounted for 23.6 percent of the total forcible rapes of females. The estimated 22,379 offenses yielded a rate of 65.4 rapes per 100,000 females. The 2004 rate declined 1.7 percent from the estimated 66.5 per 100,000 females in 2003.

Community Types

Using the U.S. Office of Management and Budget's designations, the UCR Program aggregates crime data by the type of community in which the offenses occur: Metropolitan Statistical Areas (MSAs), cities outside MSAs, and nonmetropolitan counties. (Appendix III provides more detailed information about community types.)

MSAs

Nearly 83 percent (82.9) of the U.S. population resided in an MSA during 2004, and this community type accounted for 84.0 percent of the

forcible rapes of females nationwide. An estimated 79,531 females were forcibly raped within metropolitan areas, a figure that yielded a rate of 64.4 offenses per 100,000 females. (Based on Table 2.)

Cities Outside MSAs

Cities outside MSAs are mostly incorporated areas served by city law enforcement agencies. Though accounting for only 6.8 percent of the national population in 2004, this type of community had the highest rate of forcible rapes of females, 76.4 per 100,000 females. By volume, cities outside metropolitan areas accounted for about 8.2 percent of the national total of forcible rapes of females, approximately 7,732 offenses. (Based on Table 2.)

Nonmetropolitan Counties

In 2004, approximately 10.4 percent of the Nation's inhabitants resided in a nonmetropolitan county, that is, one made up of mostly unincorporated areas served by noncity law enforcement agencies. Collectively, those areas had approximately 7,372 forcible rapes of females, 7.8 percent of the national total. Among the three community types, nonmetropolitan counties had the lowest rate of forcible rapes per 100,000 females—47.7. (Based on Table 2.)

Clearances

In the UCR Program, law enforcement agencies may clear an offense by the arrest of at least one person or by exceptional means. An exceptional clearance is reported when some element beyond the control of law enforcement precludes the agency from making an arrest that otherwise would be accomplished; for example, the victim refuses to cooperate with the prosecution. (Section III provides more information concerning clearances.)

Nationwide in 2004, law enforcement agencies cleared, either by arrest

Table 2.17

Forcible Rape Percent Distribution by Month, 2000-2004

Month	2000	2001	2002	2003	2004
January	8.0	7.7	7.6	7.9	8.1
February	7.5	7.1	7.0	6.8	7.7
March	8.5	8.4	7.8	8.3	8.7
April	8.0	8.3	8.6	8.0	8.4
May	9.0	8.8	9.0	9.0	9.0
June	9.1	8.7	9.0	8.8	8.5
July	9.5	9.7	9.6	9.5	9.2
August	9.3	9.4	9.5	9.6	9.0
September	8.4	8.6	9.1	8.9	8.4
October	8.3	8.5	8.4	8.4	8.5
November	7.5	7.6	7.4	7.8	7.6
December	6.9	7.2	6.9	7.1	7.0

or by exceptional means, 41.8 percent of reported forcible rapes. Among the Nation's cities, the overall clearance rate for forcible rape was 40.1 percent. Cities with fewer than 10,000 inhabitants had the highest clearance rate (43.8 percent), and those with populations of 100,000 to 249,999 had the lowest rate (38.1 percent). County law enforcement agencies cleared 46.8 percent of the forcible rapes that occurred in metropolitan counties and 45.8 percent of those that took place in nonmetropolitan counties. (See Table 25.)

By region, law enforcement agencies in the Northeast cleared 46.0 percent of reported forcible rapes in 2004, compared with 45.2 percent in the South, 39.9 percent in the West, and 35.2 percent in the Midwest. (See Table 26.)

Clearances and Juveniles

Juvenile clearances are reported when a person under the age of 18 is cited to appear in a juvenile court or is turned over to another juvenile authority; it is not necessary for an arrest to actually occur. Importantly, according to the UCR Program's definitions, when a law enforcement agency clears a crime involving both juveniles and adults, the agency classifies the action as an adult clearance. A juvenile clearance is recorded when a crime involves only juveniles. For this reason, juvenile clearance data may not reflect the total involvement in crime of youthful offenders.

In 2004, clearances nationwide involving only juveniles made up 12.2 percent of the total number of clearances for forcible rape. Among the Nation's cities, the proportion of forcible rape clearances classified as juvenile ranged from a low of 8.2 percent in the largest cities (250,000 and over in population) to a high of 14.1 percent in cities with populations of 25,000 to 49,999. County law enforcement agencies classified as juvenile clearances 14.3 percent of the total number of forcible rapes cleared in metropolitan counties and 15.2 percent of those cleared in nonmetropolitan counties. (See Table 28.)

Definition

The Uniform Crime Reporting (UCR) Program defines robbery as the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2003	414,235	142.5
2004	401,326	136.7
<i>Percent change</i>	-3.1	-4.1

National Volume, Trends, and Rates

Marking the third straight year of a decline in the number of robberies nationwide, the 2004 estimate of 401,326 offenses reflected a 3.1-percent decline from the 2003 estimate. The number of robberies also declined in the 5- and 10-year trends, though the number of robberies in 2004 showed a lesser decrease (1.6 percent) from the 2000 estimate, the drop was greater (30.9 percent) compared with the 1995 data.

A decline was also evident in the Nation’s robbery rate in the same target years. The rate of robbery in the Nation in 2004 was 136.7 robberies per 100,000

inhabitants, a decrease of 4.1 percent compared with the 2003 rate. The 5-year trend showed a decline of 5.7 percent from the 2000 rate, and, as with the trend for the volume of robberies, the 10-year trend for the robbery rate revealed a larger drop (38.1 percent) compared with the 1995 rate. (See Tables 1 and 1A.)

Regional Offense Trends and Rates

The UCR Program divides the United States into four regions: the Northeast, the Midwest, the South, and the West. (Appendix III provides a map delineating the regions.) The following paragraphs furnish a regional overview of robbery.

The Northeast

The Northeast, with an estimated 18.6 percent of the country’s population in 2004, accounted for 19.5 percent of the Nation’s robberies. (See Table 3.) The estimated number of robberies in the region was a 3.3-percent decline from the 2003 level. The rate in the Northeast was measured at 143.6 robberies per 100,000 inhabitants, a 3.5-percent drop from the 2003 rate. (See Table 4.)

The Midwest

In 2004, an estimated 22.4 percent of the Nation’s population resided in the Midwest, and 19.1 percent of all robberies

Figure 2.6

Robbery
Percent Change from 2000

took place there. (See Table 3.) Compared with the 2003 total, the number of robberies in the Midwest decreased 1.6 percent. The robbery rate (116.8 offenses per 100,000 persons) was the lowest among the four regions and declined 2.1 percent compared with the previous year's rate. (See Table 4.)

The South

The most populous region, the South, accounted for an estimated 36.1 percent of the country's population and an estimated 38.4 percent of the Nation's robberies. (See Table 3.) The number of estimated robberies showed a 4.1-percent drop from the 2003 level. The region experienced the highest rate (145.6 robberies per 100,000 inhabi-

tants) among the regions but, conversely, saw the greatest decline (5.4 percent) in the rate from the previous year. (See Table 4.)

The West

The West was home to an estimated 23.0 percent of the Nation's population in 2004 and accounted for 22.9 percent of the robbery total. (See Table 3.) The estimated number of robberies for the region was down 2.5 percent from the 2003 estimate. The rate in Western states (136.5 robberies per 100,000 persons) was down 3.9 percent from the 2003 rate. (See Table 4.)

Community Types

The UCR Program aggregates data by three community types: Metropolitan Statistical Areas (MSAs), cities outside metropolitan areas, and nonmetropolitan counties. MSAs include a central city or urbanized area with at least 50,000 inhabitants and the county that contains the principal city and other adjacent counties that have, as defined by the Office of Management and Budget, a high degree of economic and social integration with the principal city and county as measured through commuting. Cities outside MSAs are mostly incorporated areas, and nonmetropolitan counties are made up of mostly unin-

corporated areas served by noncity law enforcement agencies.

Nearly 83 percent (82.9) of the Nation's residents lived in MSAs in 2004, and 96 percent of the Nation's robberies occurred within these metropolitan areas. Robberies occurred in MSAs at a rate of 158.3 offenses per 100,000 persons. Nonmetropolitan counties comprised 10.4 percent of the Nation's total population and accounted for 1.2 percent of the robberies committed in the United States. The rate was 15.5 robberies per 100,000 inhabitants in this type of community. Cities outside metropolitan areas made up 6.8 percent of the U.S. population and had 2.9 percent of the total robberies. The rate in these areas was 57.7 robberies per 100,000 in population. (See Table 2.)

Population Groups: Trends and Rates

The national UCR Program aggregates data by various population groups, which include cities, metropolitan counties, and nonmetropolitan counties. A definition of these groups can be found in Appendix III. Most of the population groups experienced declines in the number of robberies in 2004 compared with the previous year's data. Robberies in cities as a whole decreased 3.7 percent. Among the population groups labeled *city*, the Nation's largest cities, those with 250,000 and over in population, had the greatest decrease (5.5 percent) in the number of robberies. Nonmetropolitan counties had the largest decline (7.1 percent) among all population groups compared with the prior year's data. Metropolitan counties showed a 2.3-percent decline in the robbery volume. (See Table 12.)

Among the population groups, the Nation's cities, collectively, had a rate of 190.2 robberies per 100,000 inhabitants. Of the population groups

Table 2.18

Robbery Percent Distribution by Month, 2000-2004

Month	2000	2001	2002	2003	2004

Figure 2.7

Robbery Categories

Percent Change from 2000

designated *city*, those with 250,000 and over in population had the highest rate (358.1 robberies per 100,000 inhabitants), and the Nation's smallest cities, those with under 10,000 persons, experienced the lowest rate (52.1 robberies per 100,000 in population). Of the two county groups, the Nation's metropolitan counties had a rate of 66.3 robberies per 100,000 residents, and nonmetropolitan counties, a rate of 15.7. (See Table 16.)

Offense Analysis

The UCR Program collects supplemental data about robberies to document the use of weapons, the dollar loss associated with the offense, and the location types.

Robbery by Weapon

An examination of the 2004 supplemental data regarding the type of weapons offenders used in the commission of the robbery revealed that assailants relied on strong-arm tactics in 41.1 percent of robberies during 2004; they employed firearms in 40.6 percent of robberies. Offenders used knives or other cutting instruments in 8.9 percent of these

crimes. In the remaining 9.4 percent of robberies, the offenders used other types of weapons. (See Table 19.)

Loss by Dollar Value

Based on law enforcement agencies' supplemental reports, robberies cost victims, collectively, an estimated \$525 million. (Based on Tables 1 and 23.) The average loss per robbery was \$1,308. Average dollar losses were highest for banks, which lost \$4,221 per offense. Gas and service stations lost an average of \$1,749. Commercial houses, which include supermarkets, department stores, and restaurants, had average losses of \$1,529. An average of \$1,488 was taken from residences; individuals lost an average \$923 from robberies on streets and highways. An average of \$653 per robbery was taken at convenience stores. An average of \$1,682 per robbery was taken in all other types of robberies, cumulatively. (See Table 23.)

Robbery Trends by Location

Among the location types, robberies from banks increased 14.6 percent from 2003 to 2004. Robberies that occurred at residences increased 11.4 percent,

and those at commercial houses rose 3.9 percent. However, the greatest decrease (7.4 percent) occurred in robberies of gas or service stations. The number of robberies on streets and highways dropped 5.6 percent, and robberies at convenience stores fell 5.2 percent. The cumulative total of robberies that took place in all other locations increased 5.1 percent in 2004 in relation to the totals from 2003. (See Table 23.)

Percent Distribution

By location type, the greatest proportion of robberies (42.8 percent) in 2004 occurred on streets and highways. Robbers targeted commercial houses in 14.7 percent of the offenses and residences in 13.8 percent. Convenience stores were the site of 6.1 percent of robberies, followed by gas or service stations, 2.7 percent. The smallest percentage of robberies (2.4 percent) occurred at banks. In addition, 17.4 percent of robberies occurred in other types of locations. (See Table 23.)

Table 2.20

Robbery, Location
Percent Distribution by Population Group, 2004

Type	Group I (60 cities, 250,000 and over; population 38,770,011)	Group II (155 cities, 100,000 to 249,999; population 23,517,968)	Group III (372 cities, 50,000 to 99,999; population 25,679,071)	Group IV (674 cities, 25,000 to 49,999; population 23,311,930)	Group V (1,482 cities, 10,000 to 24,999; population 23,442,914)	Group VI (6,225 cities, under 10,000; population 19,590,461)	County agencies (3,670 agencies; population 84,978,944)

¹ Because of rounding, the percentages may not add to 100.0.

Clearances

In the UCR Program, law enforcement can clear offenses either by arrest or by exceptional means, i.e., when elements beyond the control of law enforcement prevent the placing of formal charges against the offender. (Section III provides more information regarding clearances.) In 2004, law enforcement agencies cleared 26.2 percent of robberies through arrests or exceptional means. Law enforcement in the Nation's cities, collectively, cleared 25.3 percent of robberies. Within the city population groups, law enforcement in the smallest cities, those with populations under 10,000, cleared the highest percentage of robberies (34.8 percent) that occurred within their jurisdictions. Law enforcement in the largest cities—250,000 and over in population—cleared the smallest proportion of robberies (22.0 percent). For the Nation's two population groups labeled as *county*, law enforcement agencies in metropolitan counties cleared 31.7 percent of robberies and those in nonmetropolitan counties cleared 40.6 percent. (See Table 25.)

Among the Nation's four regions, law enforcement agencies in the Northeast cleared the highest percentage of their robberies (30.1 percent). Agencies in the South cleared 26.3 percent of robberies, followed by the West (26.1 percent) and the Midwest (22.3 percent). (See Table 26.)

Clearances and Juveniles

When a law enforcement agency clears a crime that involved only a juvenile(s), the clearance is not dependent upon an arrest. For instance, when an offender under the age of 18 is cited to appear before juvenile authorities, the UCR Program considers the incident cleared by arrest, even though a physical arrest may not have occurred. However, clearances of crimes that involved both adult

and juvenile offenders are reported as a clearance for an offense committed by an adult. For more information on clearances, see Section III, Offenses Cleared.

Nationally, 14.4 percent of the clearances for robbery involved juveniles only. By population group, robbery clearances involving juveniles only accounted for 14.6 percent of the total number of clearances in the Nation's cities, 13.7 percent in metropolitan counties, and 6.8 percent of robbery clearances in nonmetropolitan counties. (See Table 28.)

Table 2.21

¹ Because of rounding, the percentages may not add to 100.0.

Aggravated Assault content revised 02/17/06

Definition

The Uniform Crime Reporting (UCR) Program defines aggravated assault as an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. The Program further specifies that this type of assault is usually accompanied by the use of a weapon or by other means likely to produce death or great bodily harm. Attempted aggravated assault that involves the display of—or threat to use—a gun, knife, or other weapon is included in this crime category because serious personal injury would likely result if the assault

were completed. When aggravated assault and larceny-theft occur together, the offense falls under the category of robbery.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2003	859,030	295.4
2004	854,911	291.1
<i>Percent change</i>	-0.5	-1.5

National Volume, Trends, and Rates

For 11 consecutive years, the estimated number of aggravated assaults nationwide has declined. In 2004, occurrences of this offense decreased 0.5 percent compared with the 2003 number, down to 854,911 offenses. Five- and 10-year trend data for aggravated assault showed declines of 6.2 percent and 22.2 percent, respectively.

The 2004 data also showed a decline in the frequency of aggravated assaults per 100,000 inhabitants. The rate, estimated at 291.1 offenses per 100,000 inhabitants nationwide, decreased 1.5 percent compared with the 2003 rate, 10.1 percent from that in 2000, and 30.4 percent from the 1995 rate. (See Tables 1 and 1A.)

Among the four types of offenses classified as violent crime (murder, forcible rape, robbery, and aggravated assault), aggravated assault typically has the highest percentage of occurrences. The trend continued in 2004 with this offense accounting for an estimated 62.5 percent of violent crime.

Figure 2.8

Aggravated Assault
Percent Change from 2000

Regional Offense Trends and Rates

The UCR Program defines four regions within the United States: the Northeast, the Midwest, the South, and the West. (See Appendix III for a definition of each region.) Across three regions in 2004, both the estimated number and the estimated rate of aggravated assaults declined from the previous year; the South, however, experienced a 1.2-percent increase in the number of offenses and a slight decrease (0.2 percent) in the rate per 100,000 inhabitants. (See Table 4.)

The Northeast

The region with the smallest proportion of the population in the United States (18.6 percent), the Northeast also typically has the fewest aggravated assaults. This trend continued in 2004 as an estimated 14.1 percent of the total number of aggravated assaults took place in the Northeastern states. (See Table 3.) Occurrences of this offense fell 2.0 percent from the previous year's number, down to an estimated 120,374. The region also had the lowest rate of this offense nationwide: estimated at 220.6 aggravated assaults per 100,000 inhabitants, a 2.3-percent decline from the prior year's rate. (See Table 4.)

Table 2.23

Aggravated Assault, Types of Weapons Used
Percent Distribution by Region, 2004

Region	Total all weapons ¹	Firearms	Knives or cutting instruments	Other weapons (clubs, blunt objects, etc.)	Personal weapons (hands, fists, feet, etc.)
Total	100.0	19.3	18.6	35.6	26.6
Northeast	100.0	14.7	19.8	34.3	31.1
Midwest	100.0	19.7	17.4	33.7	29.2
South	100.0	20.8	19.7	37.7	21.8
West	100.0	18.4	16.7	33.3	31.5

¹ Because of rounding, the percentages may not add to 100.0.

The Midwest

With 22.4 percent of the Nation's population in 2004, the Midwest had approximately 17.9 percent of the aggravated assaults. (See Table 3.) Occurrences of this offense declined 2.1 percent from the previous year's number, down to an estimated 153,280. The rate, estimated at 233.2 offenses per 100,000 inhabitants, declined 2.5 percent. (See Table 4.)

The South

Accounting for an estimated 36.1 percent of the Nation's population in 2004, the South was the most populous region and had the highest percentage of aggravated assaults: an estimated 43.9 percent. (See Table 3.) From 2003 to 2004, the number of offenses increased 1.2 percent, to an estimated 375,413. In contrast, the frequency of this offense, estimated at 354.3 aggravated assaults per 100,000 inhabitants, decreased 0.2 percent. (See Table 4.)

The West

In 2004, the West was home to 23.0 percent of the U.S. population and experienced an estimated 24.1 percent of the Nation's aggravated assaults. (See Table 3.) From 2003 to 2004, the estimated number of offenses for this region declined 1.4 percent, down to 205,844. The rate, estimated at 305.4 offenses per

100,000 inhabitants, declined 2.8 percent. (See Table 4.)

Community Types

The UCR Program aggregates crime data by three community types: Metropolitan Statistical Areas (MSAs), cities outside metropolitan statistical areas, and nonmetropolitan counties. By definition, an MSA has a principal city with at least 50,000 inhabitants. It includes the county that contains the principal city and adjacent counties that share a high degree of economic and social integration with the principal city and county as measured by commuting. Cities outside the MSAs are mostly incorporated areas, and nonmetropolitan counties are composed of unincorporated areas. (For additional information regarding community types, see Appendix III.)

In 2004, most of the Nation's population (82.9 percent) lived in the MSAs, where the rate of aggravated assaults was an estimated 308.9 per 100,000 inhabitants. Cities outside the MSAs (with 6.8 percent of the U.S. population) had the next-highest rate of this offense (277.0 per 100,000 inhabitants). Nonmetropolitan counties (with 10.4 percent of the population) had 158.1 aggravated assaults per 100,000 inhabitants. (Based on Table 2.)

Population Groups: Trends and Rates

To calculate 2-year trend data for population groups, the UCR Program staff reviewed reports from all agencies that submitted statistics on aggravated assaults for at least 6 common months in 2003 and 2004. (For an explanation of population-group designations and the number of agencies contributing to the UCR Program, see Appendix III; for the methodology used in tabular presentations, see Appendix I.)

From 2003 to 2004, the number of aggravated assaults in four of six city population groups decreased. Cities with populations of 50,000 to 99,999 experienced the smallest decline in this offense, 0.6 percent. The greatest decline was in the Nation's largest cities, those with populations of 250,000 and over, where the number of offenses decreased 1.7 percent. In two city groups the number of offenses increased: 0.2 percent in cities with populations under 10,000 and 1.3 percent in cities with 25,000 to 49,999 in population. Within metropolitan counties, the number of aggravated assaults decreased 1.5 percent; in nonmetropolitan counties, however, it increased 1.2 percent. (See Table 12.)

Based on reports from agencies submitting 12 months of complete data for 2004, aggravated assault occurred at an estimated rate of 302.5 offenses per 100,000 inhabitants nationwide. In cities collectively, the rate was 343.9. Among the city population groups, the rate ranged from a high of 520.2 offenses per 100,000 inhabitants (cities with populations of 250,000 and over) to a low of 201.8 offenses (cities with populations of 10,000 to 24,999). The rate was 234.9 in metropolitan counties, and 171.2 in nonmetropolitan counties. (See Table 16.)

Offense Analysis

Aggravated Assault by Weapon

The UCR Program collects data about the type of weapons used in aggravated assaults. During 2004, personal weapons (i.e., hands, fists, feet, etc.) were used in 26.6 percent of the offenses; fire-arms, 19.3 percent; and knives or cutting instruments, 18.6 percent. Weapons in the category of "other" were used in the remaining 35.6 percent of this offense. (Based on Table 19.)

An analysis by weapon type showed that the rate of aggravated assaults per 100,000 persons was 77.8 with personal weapons, 56.5 with fire-arms, 54.3 with knives or cutting instruments, and 104.1 with weapons in the "other" category. (See Table 19.)

Clearances

In the UCR Program, an offense can be cleared either by arrest or by exceptional means, i.e., when conditions beyond the control of law enforcement prevent placing formal charges against the offender. (For a further explanation of clearances, see Section III.) In 2004, law enforcement agencies nationwide collectively cleared 55.6 percent of aggravated assaults. Data in Table 26, a breakdown of clearances by region, showed that the percent of offenses cleared was lowest in the Midwest (51.9 percent) and highest in the Northeast (62.9 percent). In the South, agencies cleared 54.2 percent of aggravated assaults; in the West, 57.1 percent. Law enforcement in cities collectively cleared 53.4 percent of their aggravated assaults. In a breakdown by city population group, clearances ranged from a high of 64.1 percent (cities under 10,000 in population) to a low of 48.5 percent (250,000 and over in population). Law enforcement agencies in metropolitan counties cleared 61.5 percent; those in nonmetropolitan counties cleared 64.4 percent of their aggravated assaults. (See Table 25.)

Clearances and Juveniles

In certain circumstances involving juveniles, a law enforcement agency may report that an offense is cleared by arrest even when no physical arrest is made. This type of clearance must meet the following criteria: the offender is under the age of 18 and is cited to appear in juvenile court or before other juvenile authorities. When a clearance

involves both adult and juvenile offenders, it is reported as an adult clearance.

In 2004, of the clearances for aggravated assault reported nationwide, 11.8 percent involved only juveniles. A breakdown of this statistic by population group shows that law enforcement in cities collectively reported that 12.0 percent of clearances involved only juveniles. Agencies in cities with populations of 10,000 to 24,999 reported the highest percent of clearances involving only juveniles (14.2 percent), and those agencies in cities having 250,000 and over in population reported the lowest (9.7 percent). In metropolitan counties, 12.1 percent of clearances for aggravated assault involved only juveniles; in nonmetropolitan counties, 9.0 percent involved only juveniles. (See Table 28.)

Property Crime content revised 02/17/06

Definition

In the Uniform Crime Reporting (UCR) Program, property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. The property crime category includes arson because the offense involves the destruction of property; however, arson victims may be subjected to force. Because of limited participation and varying collection procedures by local agencies, only limited data are available for arson. Arson statistics are included in trend, clearance, and arrest tables throughout

Crime in the United States, but they are not included in any estimated volume data. The arson section in this report provides more information on that offense.

Trend

Year	Number of offenses ¹	Rate per 100,000 inhabitants ¹
2003	10,422,862	3,591.2
2004	10,328,255	3,517.1
Percent change	-1.1	-2.1

¹Does not include arson. See Offense Tabulations.

National Volume, Trends, and Rates

An estimated 10,328,255 property crimes were committed in the Nation in 2004, representing a 1.1-percent decrease from the 2003 estimate, a 1.4-percent increase compared with the 2000 estimate, and a 14.4-percent decrease from the 1995 estimate.

Figure 2.9

Property Crime Percent Change from 2000

In 2004, each of the individual property crimes showed a decrease from the 2003 estimates. The number of motor vehicle thefts was down 1.9 percent, the number of larceny-thefts was down 1.1 percent, and the number of burglaries was down 0.5 percent. (See Tables 1 and 1A.)

The estimated property crime rate per 100,000 inhabitants (3,517.1) in 2004 declined 2.1 percent when compared with the 2003 rate. When compared with data from 2000, the rate was down 2.8 percent, and when compared with the 1995 figure, the rate had decreased 23.4 percent. (See Tables 1 and 1A.)

Regional Offense Trends and Rates

The UCR Program separates the United States into four regions: the Northeast, the Midwest, the South, and the West. (Geographic region breakdowns can be found in Appendix III.) Property crime data collected by the UCR Program and aggregated by region reflected the following:

The Northeast

The Northeast Region accounted for 18.6 percent of the Nation's population

in 2004; 12.5 percent of the estimated number of property crimes that were committed in the Nation occurred in that region. (See Table 3.) In 2004, law enforcement in the Northeast had a 2.1-percent decrease in property crimes from the previous year's figure. The property crime rate, estimated at 2,358.9 per 100,000 inhabitants, decreased 2.4 percent from the 2003 number. (See Table 4.)

The Midwest

The Midwest, comprised of 22.4 percent of the Nation's population in 2004, accounted for 20.9 percent of the estimated number of property crimes in the United States. (See Table 3.) Law enforcement in the Midwest Region had a 2.5-percent decrease in property crimes from the previous year's figure. Estimated at a rate of 3,281.0 property crimes per 100,000 in population, the 2004 figure decreased 2.9 percent from the 2003 data. (See Table 4.)

The South

Just over 36 percent (36.1) of the Nation's population resided in the South in 2004, and law enforcement agencies in the region had an estimated 41.3 percent of the country's property crimes. (See Table 3.) When compared with data from the previous year, the South

had a decrease of 0.8 percent in the estimated number of property crimes. The 2004 property crime rate, 4,022.2 per 100,000 inhabitants, was 2.2 percent lower than the 2003 rate. (See Table 4.)

The West

In 2004, the West accounted for 23.0 percent of the Nation's total population, and 25.4 percent of the country's property crimes. (See Table 3.) From 2003 to 2004, the estimated number of property crimes in the West increased slightly (+0.2 percent). The rate was estimated at 3,891.2 property crimes per 100,000 inhabitants, a 1.3-percent decline from the 2003 rate. (See Table 4.)

Community Types

The UCR Program aggregates data by three community types: Metropolitan Statistical Areas (MSAs), cities outside metropolitan statistical areas, and nonmetropolitan counties. (Additional in-depth information regarding community types is located in Appendix III.) In 2004, an estimated 82.9 percent of the Nation's population resided in an MSA. The rate in this community type was 3,697.1 property crimes per 100,000 inhabitants. Cities outside metropolitan areas, comprising 6.8 percent of the Nation's population, had a rate of 4,109.5 property crimes per 100,000 in population. Nonmetropolitan counties accounted for an estimated 10.4 percent of the Nation's inhabitants. These counties had a rate of 1,690.5 property crime offenses per 100,000 inhabitants. (See Table 2.)

Population Groups: Trends and Rates

The UCR Program organizes the agencies that contribute data into population groups, which include cities, metropolitan counties, and nonmetropolitan counties. (Appendix III of this book provides an explanation of these groups.) From

2003 to 2004, law enforcement in the Nation's cities collectively reported a 1.8-percent decrease in the number of property crimes. All city population groups experienced decreases, with the largest decrease, 3.3 percent, in cities with populations of 250,000 or more. Nonmetropolitan and metropolitan counties experienced decreases of 1.1 and 0.9 percent, respectively. (See Table 12.)

The country's cities collectively had a rate of 4,240.2 property crime offenses per 100,000 inhabitants. Nonmetropolitan counties had a property crime rate of 1,743.9 per 100,000 people, and metropolitan counties experienced a rate of 2,529.6 offenses per 100,000 inhabitants. Property crime rates for each of the population groups are furnished in Table 16.

Offense Analysis

The estimated dollar loss attributable to property crimes (excluding arson) in 2004 was \$16.1 billion, representing a 5.0-percent decrease when compared with the 2003 estimate. Among the individual property crimes, the dollar losses were an estimated \$3.5 billion for burglary, nearly \$5.1 billion for larceny-theft, and \$7.6 billion for motor vehicle theft. (Based on Table 1 and Table 23.) Arson had an average dollar loss of \$12,017 for the 63,215 offenses for which monetary figures were reported. (See Table 2.31.)

Clearances

Law enforcement agencies reporting crime to the UCR Program can clear, or "close," the offense in one of two ways: by arrest or, when elements are beyond the control of law enforcement prevent the agency from arresting and formally charging the offender, by exceptional means. (Additional information regarding clearances is provided in Section III, Offenses Cleared.)

Table 2.24

Property Crime Percent Distribution by Month, 2000-2004

Month	2000	2001	2002	2003	2004
January	7.8	7.8	8.3	8.0	8.0
February	7.3	6.8	7.0	6.7	7.1
March	8.2	7.8	7.8	8.0	8.2
April	7.9	7.9	8.0	8.2	8.1
May	8.6	8.5	8.5	8.6	8.5
June	8.6	8.5	8.4	8.5	8.6
July	9.1	9.1	9.2	9.1	9.0
August	9.2	9.1	9.0	9.0	8.9
September	8.5	8.5	8.6	8.7	8.4
October	8.8	9.2	8.8	8.8	8.7
November	8.1	8.5	8.1	8.1	8.3
December	8.0	8.5	8.3	8.3	8.3

Nationwide in 2004, law enforcement agencies, collectively, cleared 16.5 percent of property crimes. Agencies in cities cleared 16.4 percent of property crimes. Law enforcement in cities with populations of 10,000 to 24,999 cleared the largest proportion of their property crimes (20.9 percent) and those in cities with populations of 250,000 and over cleared the smallest percentage of their property crimes, slightly less than 13 percent (12.9). Metropolitan county law enforcement agencies reported 16.9 percent of property crimes cleared by arrest or exceptional means, and agencies in nonmetropolitan counties reported 17.8 percent of property crimes cleared. (See Table 25.)

Regionally, law enforcement agencies in the Northeast cleared the highest percentage of property crimes at 20.2 percent. Law enforcement agencies in the South cleared 16.9 percent; those in the Midwest, 16.2 percent; and agencies in the West cleared 14.6 percent of property crimes. (See Table 26.)

Clearances and Juveniles

Special conditions exist concerning clearances and juveniles. Data users should know that when an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program considers the incident for which the juvenile is being held responsible to be cleared by arrest, although a physical arrest may not have occurred. In addition, clearances that include both adult and juvenile offenders are classified as clearances for crimes committed by adults. Additional details concerning clearances as they relate to juveniles are provided in Section III, Offenses Cleared.

In 2004, 18.9 percent of the property crime clearances nationwide involved persons under the age of 18. In cities collectively, 19.6 percent of the clearances for property crime involved

juveniles only. Among the population groups labeled *city*, the percentages of clearances involving only juveniles ranged from a low of 16.4 percent in cities with populations of 250,000 and over to a high of 21.7 percent in cities with populations of 50,000 to 99,999. Law enforcement in metropolitan counties reported 16.4 percent of property crime clearances involved persons under the age of 18 and those in nonmetropolitan counties, 14.8 percent. (See Table 28.)

Definition

Burglary is defined in the Uniform Crime Reporting (UCR) Program as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as a burglary. Burglary in the UCR program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

Trend

Year	Number of offenses	Rate per 100,000 inhabitants
2003	2,154,834	741.0
2004	2,143,456	729.9
Percent change	-0.5	-1.5

National Volume, Trends, and Rates

In 2004, an estimated 2.1 million burglary offenses were committed in the United States. This figure (approximately 2,143,456) is a 0.5-percent decline from the 2003 estimate. An examination of 5- and 10-year trends demonstrated a 4.5-percent increase in the number of burglaries when compared with the 2000 estimate, and a 17.4-percent decrease from the 1995 number. Calculated at 729.9 burglaries per 100,000 people, the 2004 rate was a decrease of 1.5 percent from the 2003 rate. Although the

2004 burglary rate was slightly higher (0.2 percent) than the 2000 rate, it was 26.0 percent lower than the 1995 rate. (See Tables 1 and 1A).

Regional Offense Trends and Rates

The UCR Program divides the United States into four regions: the Northeast, the Midwest, the South, and the West. (Details regarding the geographic regions are included in Appendix III.) An analysis of burglary data by region showed the following details.

The Northeast

In 2004, 18.6 percent of the Nation's population inhabited Northeastern states where 11.0 percent of the estimated number of burglary offenses (236,366) occurred. This figure represents a decrease of 2.9 percent when compared to the 2003 estimate. The region's burglary rate, estimated at 433.1 offenses per 100,000 persons, marks a decrease of 3.2 percent from the 2003 rate. (See Tables 3 and 4.)

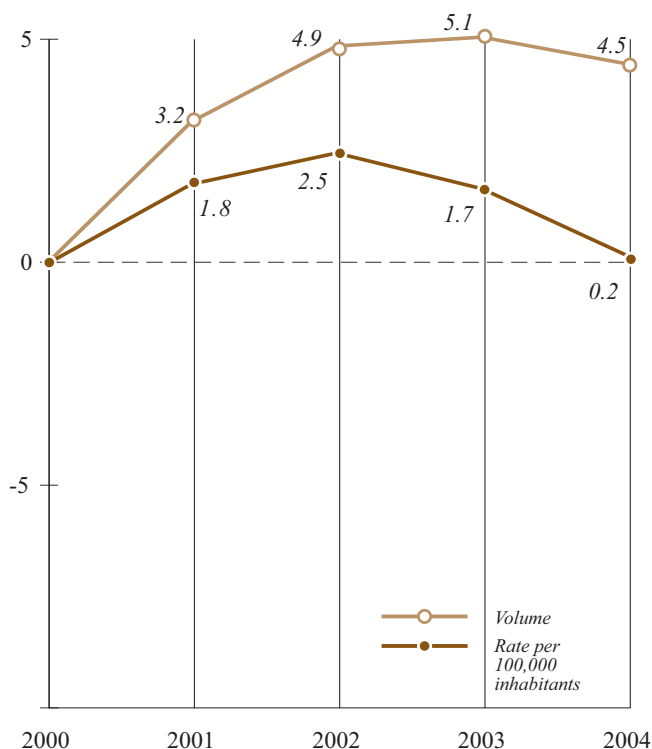

The Midwest

The Midwest accounted for 22.4 percent of the Nation's population in 2004 and 19.8 percent, or about 424,892, of the country's burglary offenses. With a rate of 646.4 offenses per 100,000 inhabi-

Figure 2.10

Burglary

Percent Change from 2000

tants, the Midwest had the lowest rate of burglaries among the regions. By volume, the number of burglaries declined 2.1 percent from the 2003 number, and the rate decreased 2.6 percent from that of the prior year. (See Tables 3 and 4.)

The South

The most populous region, the South, had the most burglaries in 2004. With 36.1 percent of the Nation's population, this region accounted for an estimated 968,932 (45.2 percent) of the Nation's burglary offenses. The estimated number of burglaries yielded a rate of 914.6 offenses per 100,000 people, a 1.5-percent decrease from the region's 2003 rate. (See Tables 3 and 4.)

The West

The West accounted for 23.0 percent of the Nation's total population in 2004 and an estimated 23.9 percent (513,266) of the burglaries that occurred. Overall, the region had a 1.1-percent increase in burglaries from the 2003 total. The estimated rate of 761.4 offenses per 100,000 people was 0.3 percent lower than the 2003 rate. (See Tables 3 and 4.)

Community Types

The UCR Program aggregates data by three community types: Metropolitan

Statistical Areas (MSAs), cities outside MSAs, and nonmetropolitan counties. (See Appendix III for more information regarding community types.) In 2004, residents in MSAs accounted for 82.9 percent of the population and experienced an estimated 84.5 percent of the Nation's burglaries. The MSAs' rate of burglaries per 100,000 people was 744.8. Inhabitants of cities outside MSAs accounted for 6.8 percent of the Nation's population in 2004 and 7.6 percent of the number of burglary offenses. The burglary rate in these areas was 822.8 offenses per 100,000 people, the highest rate by community type. Nonmetropolitan counties accounted for 10.4 percent of the Nation's inhabitants, and about 7.8 percent of its burglaries. Burglary offenses in nonmetropolitan counties occurred at an estimated rate of 550.0 per 100,000 people. (Based on Table 2.)

Population Groups: Trends and Rates

In addition to analyzing data by region and community type, the UCR Program aggregates crime statistics by population groups; cities are categorized into six groups based on the number of inhabitants, and counties are categorized into two groups, metropolitan and nonmetropolitan. (Appendix III offers further details regarding these population groups.)

An examination of data from law enforcement agencies that provided statistics at least 6 common months in 2003 and 2004 showed that the Nation's cities overall experienced a 0.7-percent decrease in burglaries during the 2-year period. Burglaries declined in four of the city groups and increased in two of the city groups. The Nation's largest cities, those with 250,000 or more inhabitants, showed the largest decline, 2.1 percent. Cities with populations of

50,000 to 99,999 had an increase of 1.9 percent, and cities with populations of 10,000 to 24,999 had an increase of 0.6 percent in the number of burglaries in 2004 compared with 2003.

The volume of burglaries declined in both metropolitan and nonmetropolitan counties in 2004. In metropolitan counties, burglary offenses decreased 2.2 percent from the 2003 level, and in nonmetropolitan counties, these offenses went down 2.6 percent. (See Table 12.)

The UCR Program calculates burglary rates for population groups from information provided by participating agencies that submitted all 12 months of offense data for the year. In 2004, the Nation's cities overall had 821.6 offenses per 100,000 people. The largest cities (those with 250,000 or more inhabitants) had the highest rate, 972.9 offenses per 100,000 people, and cities with 10,000 to 24,999 residents had the lowest rate among the city groups, 631.8 burglaries per 100,000 people. Metropolitan counties had a rate of 605.5 offenses per 100,000 people, and nonmetropolitan counties had a rate of 574.4. (See Table 16.)

Offense Analysis

The UCR program requests that participating law enforcement agencies provide details regarding the nature of burglaries in their jurisdictions, such as type of entry, type of structure, time of day, and dollar loss associated with each offense.

An examination of data from agencies that provided burglary data for all 12 months of 2004 revealed that 61.4 percent of all burglaries involved forcible entry. Unlawful entry marked 32.4 percent of offenses, and attempted forcible entry accounted for 6.2 percent of burglaries reported to the Program in 2004. (See Table 19.)

As in the past, burglars targeted homes more often than nonresidential

Table 2.25

Figure 2.11

Burglary

Percent Change from 2000

structures. An analysis of data from agencies that provided supplemental burglary data for at least 6 months of 2004 showed that 65.7 percent of burglaries were of residences, and 34.3 were of nonresidential structures. (See Table 23.) Law enforcement agencies were unable to determine the time burglaries occurred in 25.3 percent of offenses. However, of the burglaries for which the time could be established, most (62.2 percent) residential burglaries occurred during the day, from 6 a.m. to 6 p.m. Nonresidential structures were targeted more often at night with 58.0 percent of these offenses occurring from 6 p.m. to 6 a.m. The average dollar loss per burglary offense was \$1,642. Losses from residential burglaries averaged \$1,607 per offense and losses from nonresidential burglaries averaged \$1,708 per offense. (See Table 23.)

Clearances

The UCR Program considers an offense to be cleared when at least one person is arrested in connection with the offense, or law enforcement officials have identified the offender, but are unable to make an arrest because of circumstances beyond their control (e.g., the suspect is incarcerated or is in custody for another crime). This type of clearance is known as a clearance by exceptional means. (Section III furnishes more information about clearances.) The following paragraphs offer an overview of burglary clearances. The data are based on information from law enforcement agencies that provided at least 6 months of data for 2004.

In 2004, law enforcement agencies cleared 12.9 percent of the Nation's burglary offenses. By region, agencies

in the Northeast cleared the highest percentage (17.1 percent) of burglary offenses occurring within that region. In the South, agencies cleared 13.1 percent of burglary offenses, in the West, 11.8 percent, and in the Midwest, 11.2 percent. (See Table 26.)

By population group, agencies in cities collectively cleared 12.1 percent of burglary offenses. Agencies in the smallest cities, those with less than 10,000 in population, cleared the highest percentage (16.2 percent) of burglary offenses occurring in those jurisdictions. Agencies covering cities with 250,000 and over in population cleared the lowest percentage, 10.3 percent. The Nation's county law enforcement agencies cleared 14.5 percent of burglary offenses occurring in metropolitan counties, and 15.8 percent of those occurring in non-metropolitan counties. (See Table 25.)

When grouped by classification and type, data showed that the highest percent (14.2 percent) of burglary clearances in the Nation were of offenses that involved unlawful entry of structures. Of the burglaries where force was used to enter structures, agencies cleared 12.2 percent of offenses, and of attempted burglary offenses, they cleared 10.6 percent. (See Table 27.)

Clearances and Juveniles

The UCR Program has established reporting guidelines that are unique to clearances involving juvenile offenders. First, law enforcement agencies may clear an offense by arrest even though no physical arrest may have occurred, e.g., when a juvenile is turned over to juvenile authorities. Second, when clearing a crime that involves both juvenile and adult offenders, law enforcement reports the clearance as an adult clearance.

Based on data from law enforcement agencies that provided at least 6 months of statistics to the UCR Program in 2004, arrests of juveniles accounted for 16.0 percent of burglary clearances. In the Nation's cities overall, clearances by juvenile arrests made up a slightly higher percentage, 16.1 percent. Clearances involving only juveniles accounted for 19.6 percent of the total number of burglary clearances in the Nation's smallest cities (those with fewer than 10,000 residents). The largest cities, those with 250,000 or more inhabitants, had the smallest percentage of clearances involving solely juveniles, 12.5 percent. Of the two county population groups, clearances involving only juveniles made up 15.9 percent of burglary clearances in metropolitan counties, and 15.5 percent in nonmetropolitan counties. (See Table 28.)

Definition

The Uniform Crime Reporting (UCR) Program defines larceny-theft as the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another; attempts to do these acts are included in the definition. This crime category includes shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, and so forth, in which no use of force, violence, or fraud occurs. Excluded from larceny-theft is motor vehicle theft, which is classified in a separate

offense category; also excluded are crimes that involve embezzlement, confidence games, forgery, and worthless checks—all of which are UCR Part II offenses.

Trend

Year	Number of offenses	Rate per 100,000 inhabitants
2003	7,026,802	2,416.5
2004	6,947,685	2,365.9
Percent change	-1.1	-2.1

National Volume, Trends, and Rates

In 2004, larceny-theft accounted for an estimated 67.3 percent of the Nation's property crimes. (See Table 1.) Trend data showed that the number of larceny-thefts decreased 1.1 percent from the 2003 estimate, a slight 0.3 percent from the 2000

estimate, and 13.1 percent from the 1995 estimate.

Two-, 5-, and 10-year trend data also showed a decline in the frequency of larceny-theft per 100,000 inhabitants. With an estimated 6,947,685 occurrences of this offense in 2004, there were 2,365.9 larceny thefts per 100,000 inhabitants nationwide. This rate reflects declines of 2.1 percent from the 2003 estimate, 4.5 percent from the 2000 estimate, and 22.3 percent from the 1995 estimate. (See Tables 1 and 1A.)

Figure 2.12

Larceny-theft

Percent Change from 2000

Regional Offense Trends and Rates

The UCR Program defines four regions within the United States: the Northeast, the Midwest, the South, and the West. (See Appendix III for a geographical description of each region.) A comparison of 2003 and 2004 data showed that both the estimated number and the estimated rate of larceny-theft offenses declined across all regions. (See Tables 3 and 4.) The following paragraphs provide a regional overview of larceny-theft.

The Northeast

The region with the smallest proportion (18.6 percent) of the U.S. population in 2004, the Northeast experienced the fewest larceny-theft offenses nationwide: an estimated 13.1 percent.

(See Table 3.) The estimated number of offenses (907,670) declined 0.6 percent compared with 2003 data, and the estimated rate of occurrences (1,663.3 per 100,000 inhabitants) declined 0.9 percent. (See Table 4.)

The Midwest

Accounting for 22.4 percent of the population in 2004, the Midwest had an estimated 21.7 percent of the Nation's

larceny-thefts. (See Table 3.) The estimated number of offenses (1,507,171) declined 2.3 percent compared with 2003 data, and the estimated rate of occurrences (2,293.0 per 100,000 inhabitants) declined 2.8 percent. (See Table 4.)

The South

With more than one-third of the U.S. population (36.1 percent) in 2004, the South had the Nation's highest percentage of larceny-theft offenses: an estimated 41.3 percent. (See Table 3.) There were an estimated 2,870,994 offenses, which reflected a 0.8-percent decline from the 2003 estimate. The rate, estimated at 2,709.9 larceny-thefts per 100,000 inhabitants, decreased 2.1 percent from the 2003 estimated rate. (See Table 4.)

The West

In 2004, an estimated 23.0 percent of the U.S. population lived in the West, which accounted for 23.9 percent of the Nation's larceny-theft offenses. (See Table 3.) Occurrences of this offense declined 0.9 percent from the 2003 data, down to an estimated 1,661,850 larceny-theft offenses. The rate, estimated at 2,465.3 larceny-thefts per 100,000 inhabitants, declined 2.3 percent. (See Table 4.)

Community Types

The UCR Program aggregates crime data by three community types: Metropolitan Statistical Areas (MSAs), cities outside MSAs, and nonmetropolitan counties. By definition, an MSA has a principal city with at least 50,000 inhabitants. It includes the county that contains the principal city and adjacent counties that share a high degree of economic and social integration with the principal city and county as measured by commuting. Cities outside the MSAs are mostly incorporated areas, and nonmetropolitan counties are composed of unincorporated areas. (For additional information regarding community types, see Appendix III.)

In 2004, most of the Nation's population (an estimated 82.9 percent) lived in the MSAs, where an estimated 86.7 percent of the larceny-theft offenses occurred. Cities outside the MSAs (with 6.8 percent of the population) had 8.9 percent of the offenses, and nonmetropolitan counties (with 10.4 percent of the population) had an estimated 4.4 percent of the offenses. (Based on Table 2.)

Population Groups: Trends and Rates

To calculate 2-year trend data for population groups, the UCR Program reviewed reports from all agencies that submitted statistics on larceny-theft offenses for at least 6 common months in 2003 and 2004. (For an explanation of population groups and the number of agencies contributing to the UCR Program, see Appendix III; for the methodology used in tabular presentations, see Appendix I.)

In cities collectively, occurrences of larceny-theft in 2004 declined 1.9 percent compared with 2003 data. Among the city groups, cities with populations of 250,000 and over had the

¹ Because of rounding, the percentages may not add to 100.0.

Figure 2.13

Larceny-theft Categories
Percent Change from 2000

largest decrease (3.4 percent) in larceny-theft offenses compared with 2003 data; cities with populations of 10,000 to 24,999 had the smallest decrease (0.1 percent). In metropolitan counties, the decline was 0.7 percent, and in nonmetropolitan counties, 0.5 percent.

Based on reports of larceny-theft offenses from U.S. law enforcement agencies submitting 12 months of complete data for 2004, this offense occurred at a rate of 2,418.1 per 100,000

inhabitants nationwide. In cities collectively, the rate was 2,884.4 offenses per 100,000 inhabitants. Among the city population groups, cities with populations of 100,000 to 249,999 experienced the highest rate of larceny-theft: 3,218.7 offenses per 100,000 inhabitants. Cities with populations of 10,000 to 24,999 had the lowest rate: 2,519.3. In metropolitan counties, the estimated rate was 1,619.6; in nonmetropolitan counties, it was 1,030.6 offenses. (See Table 16.)

Offense Analysis

Distribution

Thefts from motor vehicles accounted for the majority of offenses in the category of larceny-theft: 25.3 percent. Table 23 provides a further breakdown of larceny-theft offenses, including shoplifting, thefts from buildings, thefts of motor vehicle accessories, thefts of bicycles, thefts from coin-operated machines, purse-snatching, and pocket-picking. "All other," a category that includes the less-defined larceny-theft offenses, accounted for 31.6 percent of the total.

Loss by Dollar Value

Larceny-theft offenses cost victims an estimated \$5.1 billion in lost property in 2004, up from \$4.9 billion in 2003. (Based on Tables 1 and 23.) The average value of property stolen was estimated at \$727 per offense, up 4.2 percent from the 2003 figure. The category with the highest average loss in dollar value was theft from buildings (\$1,106 per offense). Thefts from motor vehicles were valued at \$697 per offense; thefts of motor vehicle accessories, \$428; purse-snatching, \$416; pocket-picking, \$360; thefts from coin-operated machines, \$244; thefts of bicycles, \$240; and shoplifting, \$156.

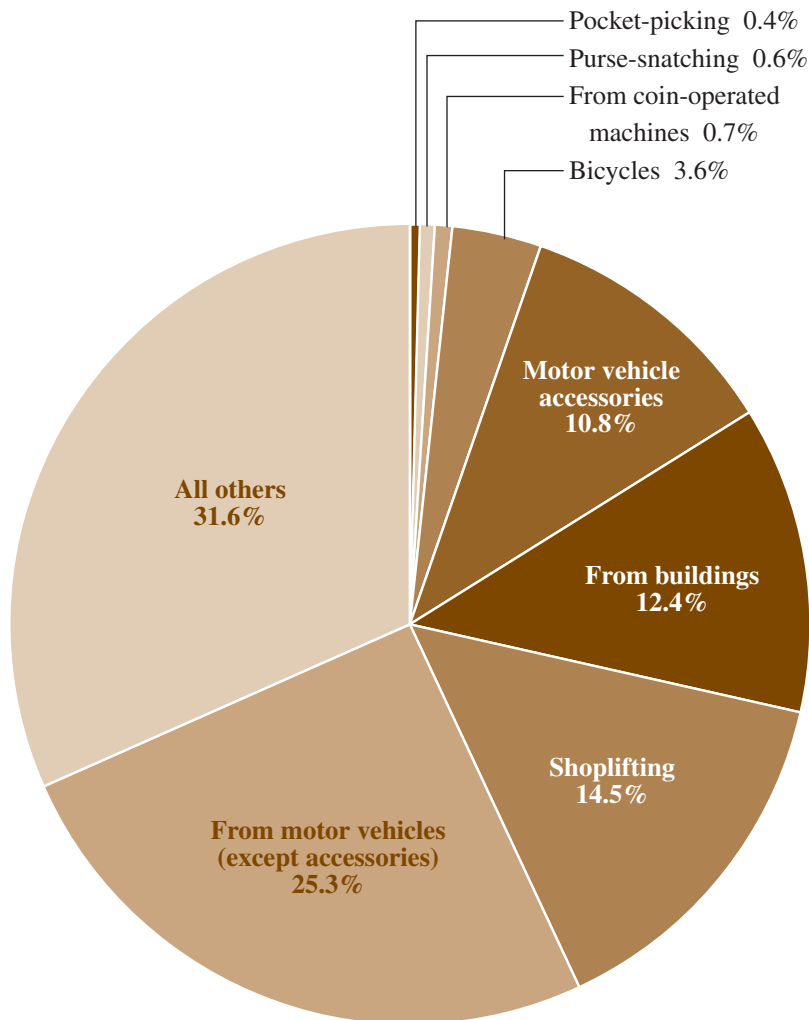

Offenses in which the stolen property was valued at more than \$200 accounted for 39.1 percent of the crimes in the category of larceny-theft. Table 23 provides a further analysis, including the average dollar value per offense, of all offenses in the overall category of property crime.

Clearances

In the UCR Program, an offense can be cleared either by arrest or by exceptional means, i.e., when conditions beyond the control of law enforcement prevent placing formal charges against the offender.

Figure 2.14

Larceny-theft
Percent Distribution,¹ 2004

¹ Due to rounding, the percentages may not add to 100.0.

(For a further explanation of clearances, see Section III.) In 2004, law enforcement agencies across the Nation collectively cleared 18.3 percent of reported larceny-theft offenses.

Among the population groups, law enforcement in cities collectively cleared 18.4 percent of reported larceny-theft offenses. The highest percentage of larceny-theft offenses cleared (22.5 percent) occurred in cities with populations of 10,000 to 24,999. The lowest percentage of larceny-theft offenses cleared (14.7 percent) took place in cities with populations of 250,000 and over. Law enforcement agencies in metropolitan counties cleared 18.0 percent of offenses in this category, and those in nonmetropolitan counties cleared 17.7 percent. (See Table 25.)

An analysis of clearances by region shows that law enforcement agencies in the Northeast cleared the largest proportion of their larceny-theft offenses: 21.9 percent. Agencies in the South cleared 18.4 percent; in the Midwest, 17.9 percent; and in the West, 16.6 percent. (See Table 26.)

Clearances and Juveniles

In certain circumstances involving juveniles, a law enforcement agency may report that an offense is cleared by arrest even when no physical arrest is made. This type of clearance must meet the following criteria: the offender is under the age of 18 and is cited to appear in juvenile court or before other juvenile authorities. When a clearance involves both adult and juvenile offenders, it is classified as an adult clearance.

In 2004, of the total number of larceny-theft offenses cleared nationwide, 19.8 percent involved juveniles alone. In cities collectively, 20.6 percent of such clearances involved only juveniles. Law enforcement agencies in cities with populations of 50,000 to 99,999 reported the highest percentage of

clearances that involved solely juveniles, 23.0 percent. The lowest percentage of such clearances (17.0 percent) occurred in cities having a population of 250,000 and over.

In metropolitan counties, agencies reported that 16.7 percent of clearances for larceny-theft offenses involved only juveniles; in nonmetropolitan counties, 14.2 percent involved only juveniles. (See Table 28.)

Motor Vehicle Theft content revised 02/17/06

Definition

The Uniform Crime Reporting (UCR) Program defines motor vehicle theft as the theft or attempted theft of a motor vehicle. The offense includes the stealing of automobiles, trucks, buses, motorcycles, snowmobiles, etc. The taking of a motor vehicle for temporary use by persons having lawful access is excluded from this definition.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2003	1,261,226	433.7
2004	1,237,114	421.3
<i>Percent change</i>	-1.9	-2.9

National Volume, Trends, and Rates

In 2004, there were an estimated 1,237,114 motor vehicle thefts in the Nation. Two-, 5-, and 10-year trend data showed considerable volatility: the number of motor vehicles estimated to have been stolen in 2004 decreased 1.9 percent from the 2003 estimate, increased 6.6 percent from the 2000 estimate, and decreased 16.0 percent from the 1995 estimate.

This volatility in trend data was also apparent in the estimations for rates. With 2004 as the base year, the rate of motor vehicle thefts was estimated at 421.3 motor vehicles stolen per 100,000 inhabitants. Changes at the 2-, 5-, and

10-year points showed that this 2004 rate decreased 2.9 percent from the 2003 estimate, increased 2.2 percent from the 2000 estimate, and decreased 24.8 percent from the 1995 estimate. (See Tables 1 and 1A.)

Regional Offense Trends and Rates

In order to analyze crime by geographical area, the UCR Program divides the United States into four regions: the Northeast, the Midwest, the South, and the West. (Appendix III provides a map delineating the regions.) The following paragraphs furnish a regional overview of motor vehicle theft.

The Northeast

The Northeast Region accounted for an estimated 18.6 percent of the Nation's population in 2004 and 11.6 percent of its motor vehicle thefts. (See Table 3.) An estimated 143,253 motor vehicle thefts occurred in the Northeastern states in 2004. This figure represented a 9.7-percent decrease compared with the previous year's estimate, and it was the largest decline among the regions. Estimated at a rate of 262.5 motor vehicle thefts per 100,000 inhabitants, the 2004 figure decreased 9.9 percent from the 2003 rate. (See Table 4.)

Figure 2.15

Motor Vehicle Theft
Percent Change from 2000

The Midwest

An estimated 22.4 percent of the country's population resided in the Midwestern states in 2004, and 18.1 percent of the Nation's motor vehicle thefts occurred in this region. (See Table 3.) The Midwest had an estimated 224,517 motor vehicle thefts in 2004. This number represented a 4.4-percent decrease in the previous year's volume. The rate, estimated at 341.6 motor vehicles stolen per 100,000 inhabitants, decreased 4.8 percent from the 2003 number. (See Table 4.)

The South

The Nation's most populous region is the South, where an estimated 36.1 percent of the U.S. population resided in 2004. This region accounted for over one-third (34.1 percent) of the Nation's

motor vehicle thefts. (See Table 3.) The estimated 421,414 motor vehicle thefts in the South decreased 2.9 percent from the 2003 estimate. It is estimated that motor vehicles in the South were stolen at a rate of 397.8 offenses per 100,000 population. The 2004 rate decreased 4.2 percent when compared with the 2003 rate. (See Table 4.)

The West

With approximately 23.0 percent of the U.S. population, the Western states accounted for 36.2 percent of all motor vehicle thefts in the Nation in 2004. (See Table 3.) By volume, the largest number of motor vehicle thefts, an estimated 447,930, occurred in this region. The only region to show an increase, the estimated number of motor vehicle thefts went up 3.2 percent from last year's number. Also on the rise from the 2003 number was the rate, estimated at 664.5 offenses per 100,000, an increase of 1.7 percent. (See Table 4.)

10.4 percent of the Nation's population, respectively. The former accounted for 3.2 percent of motor vehicle thefts and the latter 3.3 percent. The Program estimated a rate of 198.0 motor vehicles stolen for every 100,000 persons inhabiting cities outside MSAs and a rate of 132.7 motor vehicles stolen per 100,000 inhabitants of nonmetropolitan counties. (Based on Table 2.)

Population Groups: Trends and Rates

The national UCR Program aggregates data by various population groups, which include cities, metropolitan counties, and nonmetropolitan counties. A definition of these groups can be found in Appendix III. In cities collectively, the number of motor vehicle thefts decreased 2.9 percent in 2004 compared with the previous year's data. From 2003 to 2004, the number of motor vehicle thefts reported by law enforcement in all city population groups decreased. The Nation's largest cities, those with populations of 250,000 and over, experienced the greatest decline—4.0 percent; cities with populations of 25,000–49,999 experienced the smallest decline—0.7 percent. Within metropolitan and nonmetropolitan counties, however, the number showed a slight increase, +0.3 percent and +0.2 percent respectively. (See Table 12.)

Among the population groups, in 2004 cities overall had a motor vehicle theft rate of 534.2 per 100,000 inhabitants. The largest cities, those with 250,000 and over in population, experienced the highest rate of motor vehicle thefts with 873.5 thefts per 100,000 inhabitants. Conversely, the Nation's smallest cities, those with populations under 10,000, had the lowest rate of motor vehicle theft with 217.2 per 100,000 in population. Within the county groups, metropolitan counties

West	100.0	72.3	20.8	6.9

¹ Because of rounding, the percentages may not add to 100.0.

Community Types

The UCR Program aggregates data by three community types: Metropolitan Statistical Areas (MSAs), cities outside metropolitan areas, and nonmetropolitan counties. MSAs are areas that include a principal city or urbanized area with at least 50,000 inhabitants and the county that contains the principal city and other adjacent counties that have, as defined by the Office of Management and Budget, a high degree of economic and social integration.

The vast majority (82.9 percent) of the U.S. population resided in MSAs during 2004, where approximately 93.5 percent of motor vehicle thefts occurred. For 2004, the UCR Program estimated an overall rate of 475.7 motor vehicles stolen per 100,000 MSA inhabitants. Cities outside MSAs and nonmetropolitan counties, comprised 6.8 and

had a rate of 304.6 motor vehicles stolen per 100,000 inhabitants and nonmetropolitan counties, a rate of 138.9 per 100,000 persons. (See Table 16.)

Offense Analysis

Based on law enforcement agencies' reports, the UCR Program estimated the combined value of motor vehicles stolen nationwide in 2004 at approximately \$7.6 billion. (Based on Tables 1 and 23.) Automobiles were, by far, the most frequently stolen vehicle type—accounting for 72.8 percent of all vehicles stolen. Trucks and buses accounted for 18.4 percent, and other vehicles accounted for 8.7 percent. (Based on Table 19.)

By type of vehicle, automobiles were stolen at a rate of 320.5 cars per 100,000 in population in 2004. Trucks and buses were stolen at a rate of 81.1 vehicles per 100,000 in population, and other types of vehicles were stolen at a rate of 38.4 vehicles per 100,000 people. (See Table 19.)

Clearances

In the UCR Program, law enforcement may clear offenses either by arrest or by exceptional means, i.e., when elements beyond the control of law enforcement prevent the placing of formal charges against the offender. (Section III provides more information regarding clearances.) In 2004, law enforcement agencies in the United States, collectively, cleared 13.0 percent of motor vehicle theft offenses. Law enforcement in cities cleared 12.0 percent of motor vehicle thefts. Among the Nation's population groups labeled *city*, law enforcement in cities with populations of fewer than 10,000 inhabitants cleared the largest proportion of motor vehicle thefts (24.6 percent) reported in their jurisdic-

tions. Law enforcement in the Nation's largest cities, those with 250,000 and over in population, cleared the smallest proportion of motor vehicle thefts (9.4 percent) reported to them. Law enforcement agencies in metropolitan counties cleared 15.4 percent of motor vehicle thefts in their jurisdictions, and nonmetropolitan counties cleared 26.0 percent of motor vehicle thefts. (Table 25.)

Regionally, law enforcement agencies in the South cleared the highest percentage of motor vehicle thefts (15.0 percent, collectively) within their jurisdictions. Law enforcement agencies in the Northeast cleared 14.7 percent; agencies in the Midwest, 14.0 percent; and agencies in the West, 10.2 percent of motor vehicle thefts. (See Table 26.)

Clearances and Juveniles

Before analyzing data involving clearances and juveniles, the data user should consider two important pieces of information. First, when an offender under the age of 18 is cited to appear before juvenile authorities, the UCR Program considers the offense to be cleared by arrest, even though a physical arrest may not have occurred. Second, clearances involving both adult and juvenile offenders are classified as adult clearances. For more information on clearances, see Section III, Offenses Cleared.

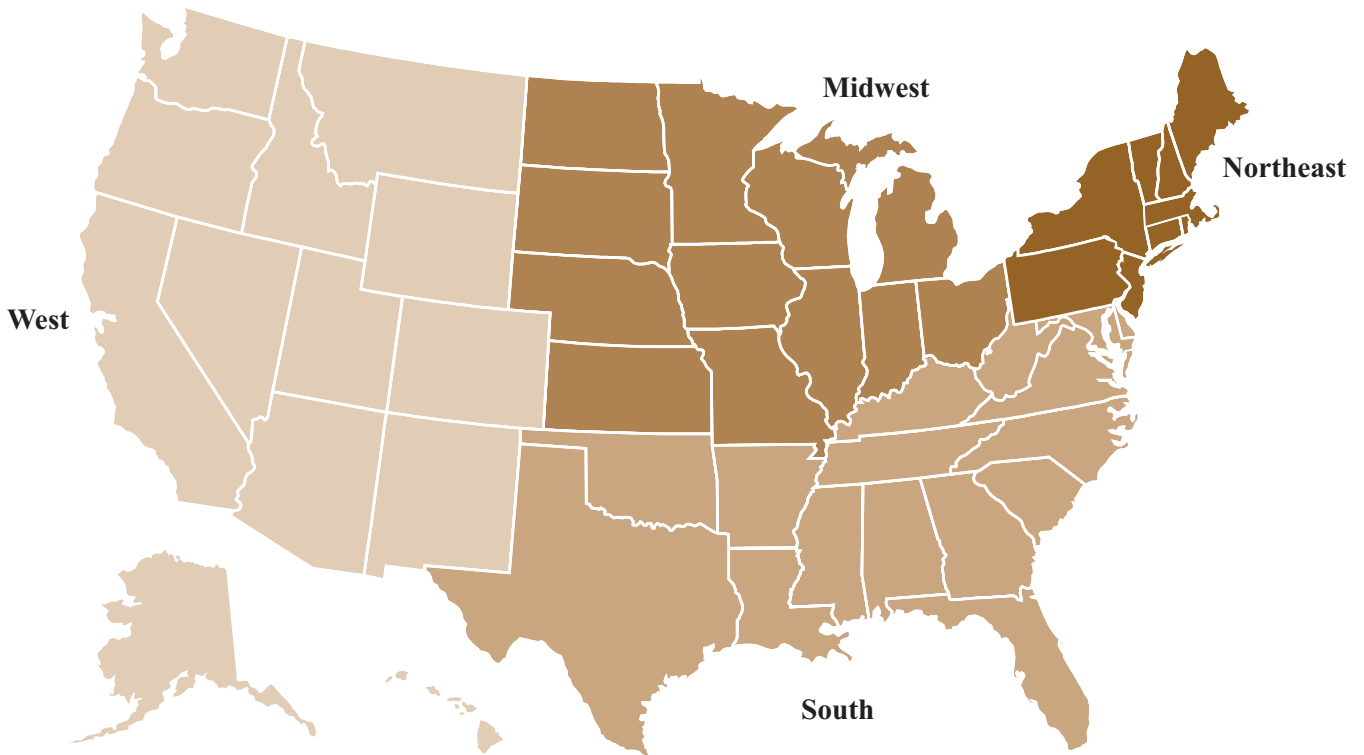

Nationwide, 16.4 percent of all clearances of motor vehicle thefts in 2004 involved juveniles only. In cities collectively, 16.7 percent of all clearances of motor vehicle thefts involved only persons under 18 years of age. Within the city population groups, law enforcement agencies in cities with populations of 50,000 to 99,999 reported the highest percentage of clearances (17.5 percent) for motor vehicle thefts that involved only juveniles. The lowest per-

centage of clearances for motor vehicle thefts involving juveniles (15.5 percent) was reported by law enforcement in both cities with 100,000 to 249,999 in population and in the Nation's smallest cities, those with under 10,000 inhabitants. Law enforcement agencies in metropolitan counties reported that 15.2 percent of motor vehicle theft clearances within their jurisdictions involved juveniles only. Agencies in nonmetropolitan counties reported that juveniles only comprised 16.2 percent of their total clearances for motor vehicle theft. (See Table 28.)

Figure 2.16

Regional Crime Rates 2004

Violent and Property Crimes per 100,000 Inhabitants

Definition

The Uniform Crime Reporting (UCR) Program defines arson as any willful or malicious burning or attempting to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Offense Methodology and Tabular Presentation

According to the UCR Program’s guidelines, only fires that law enforcement investigation determined to have been willfully or maliciously set may be classified as arson. Participating agencies do not report fires of suspicious or unknown origin. Data users should consider several points regarding arson statistics:

- The UCR Program staff does not include arson data in the national offense rates. Rates are computed separately based upon arson data received from all law enforcement agencies that provide data for 12

complete months. Data concerning the rate of arson per 100,000 inhabitants is presented in Table 2.30.

- Because of fluctuations in law enforcement agencies’ reporting of arson offenses, the FBI does not estimate for arson offenses. Therefore, arson offenses are excluded from Tables 1-7, all of which contain offense estimations.

However, the UCR Program presents the number of arsons reported by individual law enforcement agencies (Tables 8-11), trend data (Tables 12-15), and arson clearance data (Table 2.31 and Tables 25-28). Appendix I of this publication contains more information about the methodology of individual tables.

National Coverage

In 2004, 13,286 agencies (providing 1 to 12 months of data) reported 68,245 arson offenses. Supplemental data, such as the type of structure burned and the estimated dollar loss, were received for 63,215 arsons. (See Table 2.31.) The Program received 12 complete months of arson data from 10,142 agencies representing 73.5 percent of the U.S. population. (See Table 2.30.)

Population Groups: Trends and Rates

The UCR Program aggregates data into population groups; six of these population groups have the *city* label (based on the number of inhabitants), and two have the *county* label. Appendix III contains

more information about the individual population groups.

Trends

The number of arsons reported in 2004 fell 6.4 percent when compared with 2003 data. Law enforcement agencies in the Nation’s cities collectively reported a 6.8-percent decline in the number of arsons from the 2003 figure. Among the population groups labeled *city*, those with 100,000 to 249,999 inhabitants had the largest year-to-year decrease in reported arsons, 11.1 percent; cities with populations of less than 10,000 had the smallest decrease in reported arsons, 0.5 percent. Agencies in the Nation’s metropolitan counties had a 5.8-percent decrease in the number of arsons; and those in nonmetropolitan counties, a 3.5-percent decline. (See Table 12.)

Rates

Arson rates were based on information received from 10,142 agencies that provided 12 months of complete arson data to the UCR Program. An examination of data from those agencies indicated that in 2004, the highest rate—48.8 arsons per 100,000 inhabitants—was reported in the Nation’s largest cities, those with 250,000 or more inhabitants. Cities with 10,000 to 24,999 residents had the lowest arson rate, 18.9 per 100,000 in population. Metropolitan counties had 24.1 arsons per 100,000 inhabitants, and nonmetropolitan counties had 17.1 arsons per 100,000 inhabitants, the lowest of all the population groups. (See Table 2.30.)

Table 2.30

Arson Rate by Population Group, 2004

[10,142 agencies; 2004 estimated population 215,865,707; rate per 100,000 inhabitants]

<i>Population group</i>	<i>Rate</i>
Total	28.2
Total cities	31.2
Group I (cities 250,000 and over)	48.8
(cities 1,000,000 and over)	42.7
(cities 500,000 to 999,999)	52.2
(cities 250,000 to 499,999)	52.9
Group II (cities 100,000 to 249,999)	30.1
Group III (cities 50,000 to 99,999)	26.0
Group IV (cities 25,000 to 49,999)	22.9
Group V (cities 10,000 to 24,999)	18.9
Group VI (cities under 10,000)	22.3
Metropolitan counties	24.1
Nonmetropolitan counties	17.1
Suburban area ¹	21.9

¹ Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

Table 2.31

Arson

by Type of Property, 2004

¹ Because of rounding, the percentages may not add to 100.0.

² Includes offenses cleared by arrest or exceptional means.

Offense Analysis

The UCR Program breaks down arson offenses into three property categories: structural, mobile, and other. In addition, the structural property type is comprised of seven types of structures, and the mobile property type consists of two subgroupings. The Program also collects information on the estimated dollar value of the damaged property.

Property Type

The number of arsons decreased for all three property types in 2004 compared with the 2003 number, particularly for the mobile type, which dropped 13.1 percent from the prior year’s figure. Arsons of structural property decreased 3.9 percent, and arsons of other property types declined 2.9 percent. (See Table 15.)

Distributions by Property Type

In 2004, arsons of structures accounted for 44.6 percent of all arsons. Of those, 62.2 percent involved residential properties. Of the residential arsons, most (72.8 percent) were single-occupancy

residences such as houses, townhouses, duplexes, etc. Mobile arsons accounted for 30.2 percent of all arsons. Within this category, 94.7 percent of the offenses involved the burning of motor vehicles. Other types of property, such as crops, timber, fences, etc., comprised 25.2 percent of reported arson offenses. (See Table 2.31.)

Dollar Loss

In monetary terms, the average dollar loss in 2004 for an arson was \$12,017. The average dollar loss for a structural arson was \$22,071. Mobile property had an average dollar loss of \$6,382. Other property types had an average dollar loss of \$1,705. (See Table 2.31.)

Within the structural arson category, the industrial/manufacturing subcategory had the highest average dollar loss at \$92,201. Within that same category, single-occupancy dwellings had an average dollar loss of \$21,819. Other residential dwellings had an average dollar loss of \$21,959. (See Table 2.31.)

Clearances

In the UCR Program, law enforcement agencies may clear an offense by the arrest of at least one person or by exceptional means. An agency may clear an offense by exceptional means if some force outside the agency’s control prohibits the arrest of the individual. Section III provides additional information regarding clearances by exceptional means.

Overall in 2004, law enforcement agencies cleared 17.1 percent of arson offenses by arrest or exceptional means. Among the four regions by which the UCR Program aggregates clearance data, law enforcement agencies in the Northeast cleared the highest percentage of arson offenses, 21.5 percent, occurring in that region. Agencies in the South cleared 18.8 percent of arsons by arrest or exceptional means. Fifteen percent of arson offenses (the lowest percentage) were cleared in the Midwest as well as in the West. (See Table 26.)

An examination of the data collected about arson clearances by population groups indicated that law enforcement agencies in the Nation's smallest cities (under 10,000 in population) and in nonmetropolitan counties cleared the highest percentage of their arsons, 26.7 and 24.3 percent, respectively. The largest cities (250,000 and over in population) and metropolitan counties cleared their reported arsons at 10.0 and 17.8 percent, respectively. (See Table 25.)

Clearances by Property Type

A review of the 2004 data from 13,205 agencies that provided supplemental information concerning arsons showed that 21.2 percent of structural arson offenses were cleared by arrest or exceptional means. Slightly more than 7 percent (7.1) of mobile arson offenses and 20.1 percent of other arson crimes were cleared by arrest or exceptional means. (See Table 2.31.)

Clearances and Juveniles

Juvenile clearances are reported when a person under the age of 18 is cited to appear in a juvenile court or is turned over to another juvenile authority; it is not necessary for an arrest actually to occur. According to the UCR Program's definitions, when a law enforcement agency clears a crime involving both juveniles and adults, the agency classifies the action as an adult clearance. A juvenile clearance is recorded only when the crime involves only juveniles.

During 2004, clearances of juveniles for the offense of arson were proportionally higher than for any other crime. Nearly 43 percent (42.7) of arson clearances nationwide involved only juveniles. A breakdown of the data by population groups showed that among the Nation's cities, collectively, juvenile clearances accounted for 46.9 percent of all arson clearances. Of all the popula-

tion groups, cities with populations of 100,000 to 249,999 inhabitants had the highest percentage of their arson clearances involving only juveniles, 51.5 percent. Agencies in nonmetropolitan counties had the lowest percentage of their arson clearances involving only juveniles, 26.1 percent. In the country's metropolitan counties, 35.5 percent of arson clearances involved only juveniles. (See Table 28.)

Juvenile Clearances by Property Type

Of the clearances for structural arsons, 40.2 percent involved only juveniles. Of those, the majority (76.3 percent) involved community or public buildings such as churches, jails, schools, etc. Twenty-one percent of clearances for mobile arsons and 53.5 percent of other property type arsons involved only juveniles. (See Table 2.31.)

Hate Crime

Definition

A hate crime, also known as a bias crime, is a criminal offense committed against a person, property, or society that is motivated, in whole or in part, by the offender's bias against a race, religion, disability, sexual orientation, or ethnicity/national origin.

Background

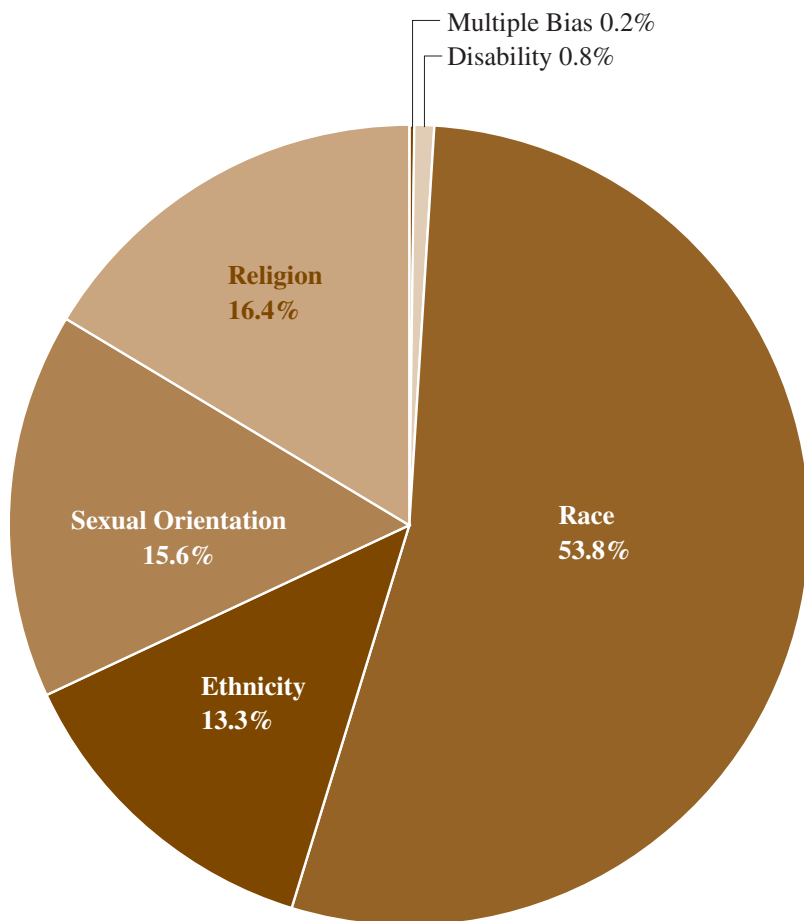

In response to mounting national concern over crimes motivated by bias, Congress enacted the Hate Crime Statistics Act of 1990. The law directed the Attorney General to collect data “about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity.” The Attorney General delegated the responsibility for developing and implementing a hate crime data collection program

to the Director of the FBI, who assigned the task to the Uniform Crime Reporting (UCR) Program. In September 1994, Congress passed the Violent Crime Control and Law Enforcement Act, which amended the Hate Crime Statistics Act to include both physical and mental disabilities. The UCR Program began collecting statistics on offenses motivated by bias against physical and mental disabilities in January 1997. The Church Arson Act of 1996 mandated that hate crime data collection become a permanent part of the UCR Program.

Those who developed the guidelines for hate crime data collection recognized that hate crimes are not separate, distinct crimes; instead, they are traditional offenses motivated by the offender's bias. After much consideration, the developers decided that hate crime data could be derived by capturing the additional element of bias in those offenses already being reported to the UCR Program. Attaching the collection of hate crime statistics to the established UCR data collection procedures, they concluded, would fulfill the directives of the Hate Crime Statistics Act without placing an undue additional reporting burden on law enforcement and, in time, would develop a substantial body of data about the nature and frequency of bias crimes occurring throughout the Nation. As a result, the law enforcement agencies that participate in the national hate crime program collect details about an offender's bias motivation associated with the following offense types:

Figure 2.17

Disability:	57	71	73	54
Anti-Physical	23	23	24	16
Anti-Mental	34	48	49	38
Multiple-Bias Incidents ³	7	14	14	9

¹The term *victim* may refer to a person, business, institution, or society as a whole.

²The term *known offender* does not imply that the identity of the suspect is known, but only that an attribute of the suspect has been identified, which distinguishes him/her from an unknown offender.

³A *multiple-bias incident* occurs only when two or more offense types are committed in a single incident. In a situation where there is more than one offense type, the agency can indicate a different bias motivation for each offense type. In the case of a single offense type, only one bias motivation can be indicated.

Table 2.33**Incidents, Offenses, Victims, and Known Offenders by Offense Type, 2004**

<i>Offense type</i>	<i>Incidents¹</i>	<i>Offenses</i>	<i>Victims²</i>	<i>Known offenders³</i>
Total	7,649	9,035	9,528	7,145
Crimes against persons:	4,503	5,642	5,642	5,710
Murder and nonnegligent manslaughter	5	5	5	5

Motor vehicle theft	15	15	15	8
Arson	44	44	57	45
Destruction/damage/vandalism	2,812	2,812	3,220	1,115
Other ⁴	35	35	37	38
Crimes against society ⁴	60	60	60	75

¹The actual number of incidents is 7,649. However, the column figures will not add to the total because incidents may include more than one offense type, and these are counted in each appropriate offense type category.

²The term *victim* may refer to a person, business, institution, or society as a whole.

³The term *known offender* does not imply that the identity of the suspect is known, but only that an attribute of the suspect has been identified, which distinguishes him/her from an unknown offender. The actual number of known offenders is 7,145. However, the column figures will not add to the total because some offenders are responsible for more than one offense type, and they are, therefore, counted more than once in this table.

⁴Includes additional offenses collected in the NIBRS.

murder and nonnegligent manslaughter, forcible rape, aggravated assault, simple assault, intimidation, robbery, burglary, larceny-theft, motor vehicle theft, arson, and destruction/damage/vandalism of property. The law enforcement agencies participating in the National Incident-Based Reporting System also collect data on additional bias-motivated crimes against persons or crimes against property (e.g., fraud) and publishes these crimes as Other.

An abstract based on the information received from law enforcement agencies that provided 1 to 12 months of hate crime reports during 2004 follows. More detailed information concerning the characteristics of hate crime can be found in the UCR Program's annual publication *Hate Crime Statistics*.

Participation

The UCR Program published the first national hate crime data in 1992 with participation from 6,200 law enforcement agencies. Since then, the hate crime data collection program has been marked by a slow but steady increase in participation. A total of 12,711 law enforcement agencies took part in the national hate crime program during 2004. This number represents a 6.7-percent increase in agency participation from 2003. Of those agencies that participated, 2,046 (16.1 percent) reported hate crime incidents. (See Table 2.35.) By way of comparison, 11,909 agencies participated in the program in 2003, and 1,967 (16.5 percent) contributed hate crime incident reports.

Law Enforcement Reports

The national UCR Program views each hate crime as an incident, which may have multiple offenses, victims, and offenders. When aggregating the number of hate crime offenses committed

against individuals, the UCR Program counts one offense for each victim. The offense types of murder, forcible rape, aggravated assault, simple assault, and intimidation are crimes against persons. When counting crimes against property, the UCR Program allots one offense for each distinct incident regardless of the number of victims. Robbery, burglary, larceny-theft, motor vehicle theft, arson, and destruction/damage/vandalism comprise the offense types that the Program considers crimes against property.

For 2004, the hate crime program tallied 7,649 bias-motivated incidents involving 9,035 offenses directed at 9,528 victims. The offenses were committed by 7,145 known offenders.

Incidents

The great majority of hate crime incidents involve a single bias, although the hate crime program accepts reports of multiple-bias incidents. By definition, a multiple-bias incident is one in which two or more offense types were motivated by two or more bias types. Of the 7,649 incidents reported by law enforcement agencies in 2004, 7 were multiple-bias incidents. (See Table 2.32.)

Law enforcement investigators found that racial prejudice motivated more than half of all the reported single-bias incidents (52.9 percent). They

attributed 18.0 percent of the incidents to a religious bias, 15.7 percent to a sexual-orientation bias, and 12.7 percent to an ethnicity/national origin bias. The remaining incidents were ascribed to a disability bias. (Based on Table 2.32.)

Offenses

In the hate crime program, bias-motivated offenses can be directed at persons, property, or society. During 2004, law enforcement agencies identified 9,035 offenses within the reported 7,649 incidents. Of these offenses, 62.4 percent were directed against persons, 36.9 percent against property, and the remainder (0.7 percent) against society.

Table 2.35

Agency Hate Crime Reporting by State, 2004

Participating state	Number of participating agencies	Population covered	Agencies submitting incident reports	Total number of incidents reported

Table 2.34

Known Offenders¹ Known Offender's Race, 2004

Total	7,145
White	4,327
Black	1,408
American Indian/Alaskan Native	48
Asian/Pacific Islander	70
Multiple Races, Group ²	367
Unknown Race	925

¹ The term *known offender* does not imply that the identity of the suspect is known, but only that an attribute of the suspect has been identified, which distinguishes him/her from an unknown offender.

² The term *multiple races, group* is used to describe a group of offenders comprised of individuals of varying races.

Approximately one-half of all bias-motivated offenses against persons involved the crime of intimidation (50.1 percent). Nearly all of the other offenses directed at persons involved assaults: simple assaults made up 31.0 percent and aggravated assaults accounted for 18.4 percent of the offenses.

The majority of hate motivated offenses directed against property (84.4 percent) involved destruction, damage, or vandalism.

An analysis of the total reported offenses showed that intimidation accounted for 31.3 percent of the 9,035 offenses; destruction/damage/vandalism, 31.1 percent; simple assault, 19.4 percent; and aggravated assault, 11.5 percent of the total offenses. (Based on Table 2.33.)

Victims

Of the 9,528 victims of hate crimes in 2004, 9,514 were associated with an incident involving a single bias. More than half of that number (53.8 percent) were victims of racial prejudice. Of those, 67.9 percent were victimized because of anti-black attitudes, and 20.1 percent were targets of anti-white sentiments.

Victims of religious intolerance made up 16.7 percent of the victims of incidents involving a single bias. Of those, 67.8 percent were victims of anti-Jewish bias, and 12.7 percent were targets of anti-Islamic bias.

Of the total number of victims of single-bias incidents, 15.6 percent were attacked because of a sexual-orientation bias. The majority of those victims, 60.9

percent, were the objects of anti-male homosexual attitudes on the part of the offenders.

Approximately 13 percent (13.2) of the victims in single-bias incidents were targeted because of the offenders' ethnicity/national orientation bias. Of those, 51.5 percent were marked because of the perpetrators' anti-Hispanic views. (Based on Table 2.32.)

Less than 1 percent of the total victims of crimes motivated by a single bias were targets of an anti-disability bias. Of the 73 victims of this type of bias, 49 were the subjects of a bias against a mental disability.

Fourteen of the total 9,528 victims of hate crimes were the objects of multiple biases on the part of the offenders. (See Table 2.32.)

Offenders

The hate crime incident reports for 2004 contained a total of 7,145 known offenders. The term *known offender* does not imply that the identity of the perpetrator was known but only that a distinguishing attribute of the individual, race, was noted on the incident report.

Of those persons who committed a crime based upon their perceived biases, 60.6 percent were white, and 19.7 percent were black. Nearly 13 percent (12.9) were classified as unknown race. Groups containing persons of various races accounted for 5.1 percent of the perpetrators, and the remainder were American Indian/Alaskan Natives or Asian/Pacific Islanders. (Based on Table 2.34.)

Offense Tabulations: A Summary of the Tables in this Section

The data in the tables of Section II—Offenses Reported are organized in several ways. First, the data are categorized for the Nation as a whole, then by geographic divisions; individual states; Metropolitan Statistical Areas (MSAs); and cities, towns, and counties. Appendix III of this publication provides a comprehensive explanation of the UCR Program's definitions of areas.

Crime Volume and Rate

The data are presented in the tables of this section as crime volume and/or crime rate (occurrence per 100,000 U.S. inhabitants). The exact number of crimes occurring within the United States is unknown. In Tables 1 through 7 of this book, the UCR Program provides estimates based upon the number of offenses that are known to law enforcement and, using these estimates, computes crime rates for each 100,000 in population. The Program uses current, resident population counts in computing crime rates. The reader should be aware that

all communities are affected to some degree by seasonal or transient population changes, and the Program's crime rates do not account for these short-term variations. In addition, the reader should remember that many factors influence the amount and type of crime occurring from place to place, and shifting variables may cause crime to vary from time to time within the same place. Other factors contributing to the level of crime in a given area are discussed in Crime Factors, (page v).

National Data: An Important Instrument for Crime Analysis

One tool that law enforcement administrators and others can use in analyzing the volume of local crime and the performance of the law enforcement agencies is national data. That analysis, however, should not end with a comparison based solely on data presented in this publication. Only by analysis that considers the numerous unique factors that shape local crime can one make a true assessment of a community's crime problem or the effectiveness of law enforcement operations.

A Brief Description of the Tables' Contents

An in-depth discussion of table construction methodology can be found in Appendix I of this publication. The following summarizes the contents of the tables contained in this Section.

- **Table 1**—20-year table that presents national estimates of the volumes and rates per 100,000 inhabitants for the Part I offenses. Table 1A presents percent changes in volume and rate for 2 years, 5 years, and 10 years.
- **Table 2**—estimated crime volumes and rates for 2004 for the Nation as a whole and for the Nation broken down by community type: MSAs, nonmetropolitan counties, and cities and towns outside metropolitan areas. Definitions of these community types can be found in Appendix III.
- **Table 3**—data showing the regional distribution of estimated number of Part I crimes and population estimates. A map of the United States illustrating the regions and divisions employed by the UCR Program appears in Appendix III.
- **Table 4**—a percent change (2003-2004) in the volume and rate estimates by region, geographic division, and state.

- **Table 5**—estimated volume and rate of Part I offenses for each state by community type.
- **Table 6**—estimated offense volume and rate for Part I crimes for each individual MSA.
- **Table 7**—breakdowns for the offenses of robbery (by location), burglary (by time of day), and larceny-theft (by type) over the past 5 years.
- **Table 8**—offenses known to police for cities over 10,000 in population.
- **Table 9**—number of offenses occurring on college and university campuses as reported to the UCR Program by college and university law enforcement agencies. The UCR Program does not assign population to educational institutions, but does provide student enrollment information when available.
- **Table 10**—offenses reported by metropolitan and nonmetropolitan county law enforcement agencies.
- **Table 11**—offenses reported by state law enforcement agencies, including state police, and federal agencies.
- **Tables 12 through 19**—crime trends for volumes and rates by population groupings. The UCR Program’s definition of the population groups can be found in Appendix III.
- **Tables 20 through 22**—data concerning weapons used in the violent crimes of murder, robbery, and aggravated assault.
- **Table 23**—analysis of the value of property lost through the crimes of robbery, burglary, motor vehicle theft, and larceny-theft. This table provides a percent change (2003-2004) in offense volume, percent distribution of offense breakdowns, and the average value of property lost.
- **Table 24**—breakdowns by type and value of property stolen and recovered.

A Note concerning Arson

Because of the limited reporting of arson offenses by law enforcement agencies, the UCR Program does not estimate for arson; therefore, arson offenses are not included in the estimated offense tables (Tables 1-7). However, arson offenses reported by individual law enforcement agencies are displayed in Tables 8–11. Two-year arson trends are shown in Tables 12–15.

Advisory

Information regarding the UCR Program’s statistical methodology and table construction can be found in Appendix I.

Table 1**Crime in the United States**

by Volume and Rate per 100,000 Inhabitants, 1985-2004

¹ Populations are U.S. Census Bureau provisional estimates as of July 1 for each year except 1990 and 2000, which are decennial census counts.² The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, are not included in this table.³ The 2003 crime figures have been adjusted.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

¹ Populations are U.S. Census Bureau provisional estimates as of July 1, 2004, and July 1, 2003.² The 2003 crime figures have been adjusted.³ Limited data for 2004 were available for Illinois. See Offense Estimation, Appendix I, for details.⁴ Includes offenses reported by the Zoological Police and the Metro Transit Police.^{*} Less than one-tenth of 1 percent.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

¹ Includes offenses reported by the Zoological Police and the Metro Transit Police.

² Limited data for 2004 were available for Illinois. See Offense Estimation, Appendix I, for details.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Therefore, no arson data are published in this table.

¹ The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

² The population for the city of Mobile, Alabama, includes 55,864 inhabitants from the jurisdiction of the Mobile County Sheriff's Department.

³ Because of changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

⁴ Limited data for 2004 were available for Illinois.

⁵ The data collection methodology for the offense of _____ with national UCR guidelines. Consequently, their figures for forcible rape and violent crime (of which forcible rape is a part) are not included in this table.

⁶ The data collection methodology for the offense of aggravated assault used by these agencies does not comply with national UCR guidelines. Consequently, their figures for aggravated assault and violent crime (of which aggravated assault is a part) are not included in this table.

¹ The student enrollment figures provided by the United States Department of Education are for the 2002 school year, the most recent available. The enrollment figures include full-time and part-time students. See Appendix I for details.

² The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

³ Because of changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

⁴ Student enrollment figures were not available.

NOTE: Caution should be exercised in making any intercampus comparisons or ranking schools because university/college crime statistics are affected by a variety of factors. These include demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

¹ Data provided for nonmetropolitan counties are inclusive of only those counties that are 25,000 and over in population.

² The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

³ Because of changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

¹ The FBI does not publish arson data unless it receives data from either the agency or the state for all 12 months of the calendar year.

² Because of changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

³ Figures reported are the number of crimes occurring in New Jersey.

⁴ Figures reported are the number of crimes occurring in New York.

¹ The data collection methodology for the off comply with national UCR guidelines. Consequently, their figures for forcible rape and violent crime (of which forcible rape is a part) are not included in this table.

² Includes state police agencies that report aggregately for the entire state.

³ Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

* Less than one-tenth of 1 percent.

¹ Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

* Less than one-tenth of 1 percent.

Rate	312.6	3.2	25.7	69.1	214.6	2,820.8	590.7	1,937.6	292.6

¹ The data collection methodology for the offense comply with national UCR guidelines. Consequently, their figures for forcible rape and violent crime (of which forcible rape is a part) are not included in this table. See Appendix I for details.

² Includes state police agencies that report aggregately for the entire state.

³ Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

¹ The number of aggravated assaults for which breakdowns by type of weapon were received from agencies that submitted 12 months of data in 2004.

Table 23**Offense Analysis**

Number and Percent Change, 2003-2004

[12,720 agencies; 2004 estimated population 240,056,595]

<i>Classification</i>	<i>Number of offenses 2004</i>	<i>Percent change over 2003</i>	<i>Percent distribution¹</i>	<i>Average value</i>
Murder	12,423	+6.7	—	
Forcible rape	75,569	+5.3	—	
Robbery:				
Total	301,040	*	100.0	\$1,308
Street/highway	128,832	-5.6	42.8	923
Commercial house	44,245	+3.9	14.7	1,529
Gas or service station	8,168	-7.4	2.7	1,749
Convenience store	18,486	-5.2	6.1	653
Residence	41,635	+11.4	13.8	1,488
Bank	7,330	+14.6	2.4	4,221
Miscellaneous	52,344	+5.1	17.4	1,682
Burglary:				
Total	1,709,322	+5.3	100.0	1,642
Residence (dwelling):	1,123,305	+6.0	65.7	1,607
Night	323,266	+2.7	18.9	1,302
Day	531,139	+9.0	31.1	1,690
Unknown	268,900	+4.5	15.7	1,808
Nonresidence (store, office, etc.):	586,017	+3.9	34.3	1,708
Night	245,267	+1.8	14.3	1,475
Day	177,761	+6.6	10.4	1,738
Unknown	162,989	+4.4	9.5	2,026
Larceny-theft (except motor vehicle theft):				
Total	5,598,224	+0.4	100.0	727
By type:				
Pocket-picking	24,081	-16.8	0.4	360
Purse-snatching	34,172	+12.9	0.6	416
Shoplifting	814,435	+5.1	14.5	156
From motor vehicles (except accessories)	1,418,899	+2.4	25.3	697
Motor vehicle accessories	604,582	+11.6	10.8	428
Bicycles	201,599	-18.9	3.6	240
From buildings	694,985	-6.9	12.4	1,106
From coin-operated machines	37,063	+3.1	0.7	244
All others	1,768,408	-1.0	31.6	1,045
By value:				
Over \$200	2,188,226	+1.3	39.1	1,778
\$50 to \$200	1,261,075	-3.4	22.5	111
Under \$50	2,148,923	+1.8	38.4	19
Motor vehicle theft	1,026,063	+9.8	—	6,108

¹ Because of rounding, the percentages may not add to 100.0.

* Less than one-tenth of 1 percent.

Table 24**Property Stolen and Recovered**

by Type and Value, 2004

[12,638 agencies; 2004 estimated population 239,291,299]

<i>Type of property</i>	<i>Value of property</i>		<i>Percent recovered</i>
	<i>Stolen</i>	<i>Recovered</i>	
Total	\$13,522,543,196	\$4,521,729,928	33.4
Currency, notes, etc.	997,650,525	42,143,588	4.2
Jewelry and precious metals	1,128,143,845	49,664,722	4.4
Clothing and furs	218,638,036	28,112,098	12.9
Locally stolen motor vehicles	6,388,264,377	4,022,264,459	63.0
Office equipment	491,107,222	23,153,476	4.7
Televisions, radios, stereos, etc.	863,582,581	32,922,112	3.8
Firearms	95,487,885	9,068,485	9.5
Household goods	222,943,917	10,512,666	4.7
