## **ANNOUNCING A TECHNICAL FORUM AND ROUNDTABLE DISCUSSION**

### **Controlling Global Warming and Local Air Pollution – Identifying Synergies, Conflicts, and Priorities**

June 28, 2007 -- 9 a.m. to 4 p.m.  
South Coast AQMD Headquarters Auditorium  
21865 Copley Drive  
Diamond Bar, CA 91765

California's landmark global warming legislation, AB 32, requires that the state's greenhouse gas emissions be reduced to 1990 levels by 2020. What effect will reducing greenhouse gases have on reducing criteria and toxic pollutants? Can we prioritize control efforts to maximize synergies and avoid negative impacts?

The AQMD is hosting this one-day forum at which a panel of experts will discuss the potential benefits and conflicting effects of efforts to control greenhouse gas and other pollutant emissions. There will be a series of presentations by the panelists, followed by a roundtable discussion – first among the panelists and then open to the audience.

The AQMD encourages anyone interested in this topic to attend this forum free of charge (lunch will be on your own). The forum will also be webcast live, and copies of the agenda, presentations and the webcast will be posted on the AQMD's Technology Forum/Roundtable website at:

<http://www.aqmd.gov/tao/ConferencesWorkshops/techforum.htm>.

If you have any questions about this forum, contact Jill Whynot at (909) 396-3104.
