VITAL STATISTICS REPORT

Summary Report

Final Divorce Statistics, 1972

FROM THE

NATIONAL CENTER FOR HEALTH STATISTICS

Divorces increased in 1972 for the 10th consecutive year. Provisional data indicate a continued upward trend through 1974.

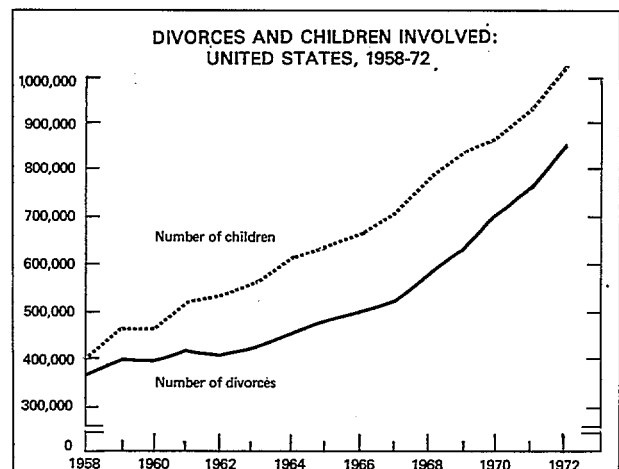

For 1972 the national divorce total including annulments was 845,000, 9.3 percent above the 1971 figure (773,000) and more than twice the total observed 10 years earlier (413,000 in 1962). Divorce rates increased correspondingly. The divorce rate per 1,000 total population was 4.1 in 1972, 3.7 in 1971, and 2.2 in 1962. Similarly, the rate per 1,000 married women was 17.0, 15.8, and 9.4 for the respective years.

The number of divorces and the divorce rate per 1,000 total population increased from 1971 to 1972 in all regions and divisions for which information is available and in almost all States (the number and rate declined in Arizona and the rate decreased

in Delaware and did not change in West Virginia and California).

For the divorce-registration area (DRA), the median duration of marriage at time of decree was 6.7 years for the third consecutive year (table 3). This median was higher in 1972 than in 1971 in nine reporting States, lower in 17 States, and showed no change in three States.

The number of children under 18 years of age whose parents were divorced was 1,021,000 in 1972 (table 4). This is the first year that more than 1 million children were affected by divorce. This number was 7.9 percent above that of the preceding year (946,000 in 1971) and 92 percent above the comparable figure 10 years earlier (532,000 in 1962). In spite of the growth in the total number of children, their average number per decree was the lowest since 1960, 1.20 compared with 1.22 children per decree in 1970 and 1971 and 1.36 in 1964, the highest average number of children per decree on record. The distribution of divorces by the reported number of children under 18 years of age is shown in table 5 for the DRA and every reporting State.

MONTHLY VITAL STATISTICS REPORT

Table 1. DIVORCES AND RATES: UNITED STATES, EACH REGION, DIVISION, AND STATE, 1970-72

[Data are counts of decrees granted (including reported annulments and dissolutions of marriage) supplied by States except as noted. Figures for the divorce-registration States differ slightly from those based on sample data shown in table 5. Rates per 1,000 population in each area estimated as of July 1, 1971 and 1972 and enumerated as of April 1, 1970]

MONTHLY VITAL STATISTICS REPORT

This report presents summary tabulations from the final divorce statistics for 1972. More detailed tabulations for 1972 will be published in *Vital Statistics of the United States, Volume III-Marriage and Divorce*. Prior to the publication of that volume, the National Center for Health Statistics will respond to requests for unpublished data whenever possible.

Table 4. ESTIMATED NUMBER OF CHILDREN INVOLVED IN DIVORCES AND ANNULMENTS: UNITED STATES, 1954-72

[Refers only to events occurring within the United States. For 1960-72 estimated from frequencies based on sample; for all other years estimated from total counts]

Year	Estimated number of children involved	Average number of children per decree	Year	Estimated number of children involved	Average number of children per decree
1972 ¹	1,021,000	1.20	1952 ²	562,000	1.31
1971 ¹	946,000	1.22	1962 ²	532,000	1.29
1970 ¹	870,000	1.22	1961 ²	516,000	1.25
1969	840,000	1.31	1960	463,000	1.18
1968	784,000	1.34	1959	468,000	1.18
			1958	398,000	1.08
1967	701,000	1.34	1957	379,000	0.99
1966	669,000	1.34	1956	361,000	0.95
1965	630,000	1.32	1955	347,000	0.92
1964 ²	613,000	1.36	1954	341,000	0.90

¹Estimates are based on DRA frequencies instead of the 15 States previously used.

²Revised.

Table 5. DIVORCES AND ANNULMENTS BY NUMBER OF CHILDREN REPORTED: DIVORCE-REGISTRATION AREA AND EACH REGISTRATION STATE, 1972

[Based on sample data. Data relate to children under 18 years of age except as noted]

Area	All divorces and annulments	Number of children reported						Not stated

¹Data are for number of children affected by decree.

MONTHLY VITAL STATISTICS REPORT

TECHNICAL NOTES

Place and Time of Occurrence

Divorces and annulments are shown in all tables by State where decree was granted, which is also the State of legal residence of the plaintiff. The time of divorce or annulment is based on the date the decree was granted.

Sources of Data

Figures in tables 1 and 2 are based on totals of divorce or annulment decrees tabulated and reported by States and counties. Figures in tables 3 and 5 are based on probability samples of divorce and annulment records that were coded and tabulated in this office.

Figures in table 4 were estimated by using several methods. Estimates for 1954-59 were prepared on the assumption that the average number of children per decree for the Nation was identical with that for the reporting States. The figure for 1960 was based on a nationwide sample. Figures for 1961-72 were prepared by multiplying the national divorce total by the average number of children per decree found in the combined States with satisfactory reporting of the number of children. There were 16 such States in 1961-69, all 28 registration States in 1970, and all 29 registration States in 1971-72.

SAMPLING ERROR OF ESTIMATED FREQUENCY EXPRESSED AS PERCENTAGE OF AREA TOTAL: DIVORCE-REGISTRATION AREA, 1970-72 AND THE 29 REGISTRATION STATES, 1972

[Figures for Alaska, Hawaii, Montana, Rhode Island, South Dakota, Vermont, and Wyoming have no sampling errors because all records were tabulated]

Divorce Samples

Sample data used to estimate the 1972 frequencies in table 5 and the frequencies used to compute median duration of marriage for 1970-72 in table 3 were selected by using four different sampling rates, depending on the size of the annual divorce total for a State. The rates were 10, 20, 50, or 100 percent of the divorces granted in a State. Samples were selected only from the States that participated in the divorce-registration area.

Sampling errors are given in the table for the estimates which constitute 1, 10, 25, 50, 75, 90, and 99 percent of the annual divorce totals. These sampling errors are given for the divorce-registration area and each registration State for 1972 data and only for the divorce-registration area for 1970 and 1971 data.
