

FACT

DO GENERIC DRUGS TAKE LONGER TO WORK IN THE BODY?

No. Generic drugs work in the same way and in the same amount of time as brand-name drugs.

FACT

WHY ARE GENERIC DRUGS LESS EXPENSIVE?

Creating a drug costs lots of money. Since generic drug makers do not develop a drug from scratch, the costs to bring the drug to market are less. But they must show that

their product performs in the same way as the brand-name drug. All generic drugs are approved by FDA.

Your medication guide should be kept with you and up to date. List your prescription and over-the-counter medicines as well as your dietary supplements.

Name of my medicine	How much do I take?	When do I take it?	What do I use it for?
xxxx (Example)	1 Tablet 400 mg	Morning	Arthritis

FACTS

ABOUT GENERIC DRUGS

FDA FOOD AND DRUG
ADMINISTRATION

FACT **WHAT ARE GENERIC DRUGS?**

A generic drug is the same as a brand-name drug in:

- dosage
- safety
- strength
- quality
- the way it works
- the way it is taken
- the way it should be used

FACT **ARE GENERIC DRUGS AS SAFE AS BRAND-NAME DRUGS?**

Yes. The FDA says that all drugs must work

well and be safe. Generic drugs use the same active ingredients as brand-name drugs and work the same way. So they have the same risks and benefits as the brand-name drugs.

FACT **ARE GENERIC DRUGS AS STRONG AS BRAND-NAME DRUGS?**

Yes. FDA requires generic drugs must be as:

- high quality
- strong
- pure, and
- stable as brand-name drugs

FACT **ARE BRAND-NAME DRUGS MADE IN BETTER FACTORIES THAN GENERIC DRUGS?**

No. All factories must meet the same high standards. If the factories do not meet certain standards, the FDA won't allow them to make drugs.

FACT **IF BRAND-NAME DRUGS AND GENERIC DRUGS HAVE THE SAME ACTIVE INGREDIENTS, WHY DO THEY LOOK DIFFERENT?**

In the United States, trademark laws do not allow generic drugs to look

exactly like the brand-name drug. However, the generic drug must have the same active ingredients.

Colors, flavors, and certain other parts may be different. But these things don't affect the way the drug works and they are looked at by FDA.

Generic Drugs:
Safe. Effective. FDA Approved.

FACT **DOES EVERY BRAND-NAME DRUG HAVE A GENERIC DRUG?**

No. When new drugs are first made they have drug patents. Most drug patents are protected for 17 years. The patent protects the company that made the drug first. The patent doesn't allow anyone else to make and sell the drug. When the patent expires, other drug companies can start selling the generic version of the drug. But, first, they must test the drug and the FDA must approve it.

FACT **WHAT IS THE BEST SOURCE OF INFORMATION ABOUT GENERIC DRUGS?**

Contact your doctor, pharmacist or other healthcare worker for information on your generic drugs. For more information, you can also visit the FDA website at: <http://www.fda.gov/cder> and click on Consumer Education.
