Subject: Errata Sheet for the Final Environmental Impact Statement (FEIS) for Colorado River Interim Surplus Criteria

During review of the FEIS Reclamation discovered that a number of tables in the document had not been updated with correct values and will be updated by this Errata Sheet. The correct values were used in all model runs, graphs and impact analyses presented in the FEIS. Accordingly, revisions to the following tables do not change the effects analysis or represent new information not already addressed in the document.

Please make the following changes:

1. Volume I, Chapter 2, Page 2-13, Table 2-2, Basin States Alternative Potential Surplus Water Supply - Unit: thousand acre-feet (kaf). Please replace this table with the corrected Table 2-2 below. Please note the corrected values are in the Tier 1 (70R) column and are in bold type.
