1. BREAK LINK WITH INCORRECT SSN (OCSE REF #2389)

1.1 Summary of Changes

The FCR System is being modified to provide States with a means to notify the FCR that a verified SSN/Name combination does not belong to their case participant. States will be able to designate an SSN as incorrect for a person whom they are attempting to register on the FCR using a Person Add and Person Change input transactions (FP Record Identifier with Action Type Codes of 'A' and 'C'). If the State's incorrect SSN matches the final verified SSN that is provided from the SSN verification/identification process, the Acknowledgement record will contain an error code (**PE013**, **TE101**, or **TW104**) to identify if the transaction is accepted or rejected. If the incorrect SSN matches a verified "Additional SSN" or "Multiple SSN", that SSN will not be used or stored on the FCR Database.

This new functionality will provide States with a means to break the link with the incorrect SSN on the FCR. Breaking this link will prevent repeated errors that adversely affect other automated enforcement actions. This enhancement will also help prevent a person who is not associated with the child support case from being registered on the FCR.

1.2 Background

On occasion, the FCR has provided an SSN that States discover does not belong to their case participant. This occurs when the State has submitted an SSN that cannot be verified or the State does not have an SSN. The FCR provides an SSN that verifies, based on name and date of birth information that is submitted by the State. In the rare cases where the SSN does not belong to the case participant, automation of the processes may cause an income withholding order to be issued for the wrong person. This problem is exacerbated when the participant is deleted and added again with the same identifying information, causing the same incorrect SSN to be provided again.

1.3 Description of Changes

The FCR has added a new field, Incorrect SSN, to the FCR Input Person/Locate Request Record Add or Change Person transactions, and to the FCR Person/Locate Request Acknowledgement/Error Record.

The FCR will match the State's Incorrect SSN against the final verified SSN that is provided by the SSN verification/identification process:

- If the SSNs match and the Person Add transaction are without a State-submitted SSN, the FCR will reject the transaction and return a new reject error code **TE101** on the FCR Person/Locate Request Acknowledgement/Error Record.
- If the SSNs match and the Person Add transaction has an unverified State-submitted SSN, the FCR will register the person but this person will not be included in the Recycling of

Unverified SSN/Name combinations. The FCR Person/Locate Acknowledgement/Error Record will contain the new warning error code **TW104**.

If the SSNs match and the transaction is a Person Change, the transaction is rejected with existing error code **PE013** returned on the FCR Person/Locate Request Acknowledgement/Error Record.

The FCR will also match any verified “Additional SSN” and “Multiple SSN” against the State’s Incorrect SSN. If the SSNs match, that SSN will not be stored on the FCR Database.

1.4 Impact on States

This change requires that States track the incorrect SSN in their systems, so they can notify the FCR of the incorrect SSN when submitting the participant.

The new field, Incorrect SSN (in positions 589-597), has been added to the FCR Input Person/Locate Request Record (Record Identifier of ‘FP’) on Action Type Code of ‘A’ (add a person to case) and ‘C’ (change a person on case) and the FCR Person/Locate Request Acknowledgement/Error Record (Record Identifier ‘FS’). Two new Filler fields, positions 553-573 (21 bytes) and positions 574-588 (15 bytes), have been added before the Incorrect SSN field. The original Filler field (positions 553-640) has been adjusted from 88 to 43 bytes, and is now positions 598 to 640 in both records.

For Person Add transactions, the FCR is adding the new rejection error code **TE101** and new warning error code **TW104**. When the State’s Incorrect SSN matches the FCR’s final verified SSN, the new rejection or warning error code is returned to the States on the FCR Person/Locate Request Acknowledgement/Error Record (Record Identifier ‘FS’) in one of the error code fields (positions 779-803).

For Person Change transactions, if the State-submitted SSN is unverified and the final verified SSN is the Incorrect SSN, the Person Change transaction is rejected with the existing error code **PE013**.

Chart 1-1 displays the error codes **PE013**, **TE101** and **TW104** and description.

CHART 1-1: FCR RECORD ERROR AND WARNING CODES		
Error Code	Record Type	Error Message and Description
PE013	FP	Invalid Change An exception to one of the following conditions was found: <ul style="list-style-type: none"> • Submitted Person Change could not be verified. FCR information cannot be replaced with unverified information. • Cannot replace a verified or an unverified SSN with an unverified SSN.

CHART 1-1: FCR RECORD ERROR AND WARNING CODES		
TE101	FP	Break Link with Incorrect SSN. The Add Person transaction, without a submitted SSN, is rejected because the State has notified FCR that the verified SSN identified by the SSN verification/identification process is incorrect and does not belong to their case participant.
TW104	FP	Identifying Incorrect SSN for State's Submitted SSN The SSN verification/identification process is identifying the Incorrect SSN as verified and the State-submitted SSN as unverified. The State has notified FCR the Incorrect SSN does not belong to their case participant. Therefore, the unverified State-submitted SSN/name combination will be registered on the FCR but will not be included in FCR's Recycle Unverified process.

1.5 Input Record Specification

2. DISTINGUISH VERIFIED ADDITIONAL SSNS THAT ARE NOT A VALID SSA MULTIPLE (OCSE REF #2554)

2.1 Summary of Changes

The FCR System is being modified to provide States with a new code value to distinguish a State-submitted “Verified Additional” SSN from a valid “Multiple” SSN that was issued by SSA to the same person. This new code will be provided on Locates and Proactive Matches. If a State-submitted “Verified Additional” SSN is on record at SSA as a “Multiple”, that SSN will be stored on the person record in the FCR only as a “Multiple”, and Locates and Proactive Matches will not be made redundantly for the SSN as both a “Verified Additional” and a “Multiple”. The FCR will return a new warning code on the Person Acknowledgement records if a “Verified Additional” SSN being returned to the State is not an SSA-provided “Multiple”.

2.2 Background

States often identify an additional SSN for a person that becomes a “Verified Additional” on the FCR. However, unless a “Verified Additional” is actually a “Multiple” SSN at SSA, it is possible that the “Additional” SSN may not belong to the same person. With this new code, States will know that their additional SSN is actually identified as a valid “Multiple” for the same person at SSA.

2.3 Description of Changes

If the State’s “Verified Additional SSN” is a valid “Multiple SSN” that was issued by SSA, the FCR will store the SSN as “Multiple SSN” on the FCR Database. If the State’s “Verified Additional SSN” is **not** a valid “Multiple SSN”, the “Verified Additional SSN” is stored on the FCR Database as a “Verified Additional SSN” and the Acknowledgement record will contain a new warning error code, **PW012** (Additional SSN is not a valid Multiple SSN issued by SSA).

On proactive and Locate responses, the field SSN Match Code will indicate whether the match was on a State-submitted, corrected, additional or multiple SSN. The FCR has renamed the fields SSN Match Indicator on NDNH Response records, and the Multiple SSN Indicator on SVES Responses, to SSN Match Code, and has added new code values. The field Multiple SSN on SVES and Other SSN on Title II Pending Claim responses have been renamed to Corrected/Additional/Multiple SSN. The Corrected/Additional/Multiple SSN field definition has been standardized and appears on NDNH, SVES and Title II Pending Claim response records.

The Locate responses from DoD, VA, FBI, IRS, NSA and SSA will have a new field, SSN Match Code, added to a filler area. The DMDC Proactive response will have a new field, SSN Match Code for CH, NCP, PF and CP added to a filler area.

2.4 Impact on States

States will need to program for the new error warning code **PW012**. When the “Verified Additional SSN” is not a valid “Multiple SSN”, this new error warning code is returned to the States on the FCR Person/Locate Request Acknowledgement/Error Record (Record Identifier ‘FS’) in one of the error code fields (positions 779-803).

Chart 2-1 displays the new warning code **PW012** and description.

CHART 2-1: FCR RECORD ERROR AND WARNING CODES		
Error Code	Record Type	Error Message and Description
PW012	FP	Additional SSN is not a valid Multiple SSN issued by SSA. The State-submitted “Additional” SSN was verified but is not on record as a valid “Multiple” SSN issued by SSA to the same person.

In addition to the new error warning code, States will need to program for the modifications that are listed in Chart 2-2, “Summary of Record Modifications”.

2.5 Input Record Specification

There are no input record changes.

3. AWR SWEEP PROCESS (OCSE REF #2587)

3.1 Summary of Changes

The FCR System is being modified to provide States with the option to periodically match their participant types, non-custodial parent (NP) and putative father (PF), who are in a IV-D case with no family violence, against SSA's Annual Wage Reporting (AWR) database.

The FCR will return only the AWR positive results as a proactive match. States will have the option to receive only AWR self-employed responses.

3.2 Background

FCR participants have income information returned on the AWR record for more than 70% of Locate Requests. This new process will automate the match to ensure that States receive all of the available income information at SSA on a proactive basis. While the NDNH provides QW records proactively to States, these records do not include the self-employed, or those employed in what is termed "non-covered" employment (that is, not covered by State unemployment insurance laws). This enhancement will help States identify income for the self-employed and for those working in "non-covered" employment, which may include significant agricultural segments of the economy or non-profit institutions.

Conducting the AWR match proactively will provide States with additional income information that can be used to improve collections and location efforts. This enhancement will also benefit States that can only issue Locate Requests when an address is unknown for an NP. By receiving AWR information through this sweep process, income unreported by the NP may be discovered.

3.3 Description of Changes

The FCR will send an AWR request to SSA for those States that have opted for the AWR Sweep, and the person meets the following criteria: the person has a verified SSN/Name combination, is in a IV-D case, has no family violence indicated, and the participant type is 'NP' or 'PF'.

The FCR will return the AWR positive results in the FCR Locate Response Record as a proactive match. States will have the option to receive only AWR self-employed responses.

3.4 Impact on States

The FCR has added two new fields to the filler areas in FCR Locate Response Record (Record Identifier 'FF'). The first new field is Match Type Code and is in position 3. The 16-byte original Filler field (in positions 3-18) has been adjusted to 15 bytes and is now in positions 4-18. The second new field, Participant Type Code (positions 911-912), is being

added to the Locate Source Specific Information for SSA, (the Locate Source Response Agency Code 'E01'). The 189-byte Filler field (in positions 724-912) has been adjusted to 187 bytes and now is positions 724-910.

When the proactive response is the result of the AWR Sweep, the Match Type Code is 'P' (proactive request), the Locate Source Response Agency Code (positions 61-63) is 'E01', and the Participant Type Code of 'NP' or 'PF' will be populated.

States that want to participate in this process must complete an FCR SSA Annual Wage Reporting (AWR) Sweep Election Form, shown in Figure 3-1, and must send the form to the FCR Options Coordinator, as indicated below. States will be notified when an AWR Sweep will occur.

The completed form should be mailed to:

Joan O'Connor
Department of Health and Human Services
Administration for Children and Families
Office of Child Support Enforcement
Federal Parent Locator Service, 4th floor
370 L'Enfant Promenade, S.W.
Washington, DC 20447

The form may also be faxed to Joan O'Connor at (202) 401-5553 or (202) 401-5647.

On the form, States will have the option to receive all of the positive AWR proactive responses or only 'Self-Employed' AWR proactive responses. 'Self-Employed' AWR are those AWR responses with value 'SE' in positions 706-707 (Self Employment Indicator) in the FCR Locate Response Record.

If a State has signed up for filter positive redundant AWR Locate Responses, (refer to FCR Release 08-01 Specifications, OCSE REF #2304), the redundant positive results from the AWR sweep are filtered. Otherwise, all positive results from AWR sweep are returned unfiltered.

CHART B-1: FCR PERSON/LOCATE REQUEST ACKNOWLEDGEMENT/ERROR RECORD

Field Name	Location	Length	A/N	Comments
				If the State finds a new SSN for the rejected person, the person must be re-submitted as an Add Transaction.
Provided/Corrected SSN	642-650	9	A/N	If present, this field is the identified or corrected SSN for the person who was found during the SSN verification routines. The Provided/Corrected SSN is used to store the person record on the FCR Database. If the SSN Validity Code equals 'C', 'E', 'P', 'R' or 'S', this field contains a valid SSN. If the SSN Validity Code does not equal 'C', 'E', 'P', 'R' or 'S', this field contains spaces.
Multiple SSN 1	651-659	9	A/N	If the SSA SSN verification routines identified multiple valid SSNs for the person, this field contains the first additional SSN.
Multiple SSN 2	660-668	9	A/N	If the SSA SSN verification routines identified multiple valid SSNs for the person, this field contains the second additional SSN.
Multiple SSN 3	669-677	9	A/N	If the SSA SSN verification routines identified multiple valid SSNs for the person, this field contains the third additional SSN.
SSA Date of Birth Indicator	678	1	A/N	If the Date of Birth that was submitted on the input record is within one year (plus or minus) of the Date of Birth that is stored on the FCR Database, this field contains an 'N'. If the Date of Birth that is returned on this record is not within one year (plus or minus) of the Date of Birth that is stored on the FCR Database, or if it was not sent by the State but is identified by SSA, this field contains a 'Y'. If Warning Code PW010 is returned, this field contains a 'Y'.

Batch Number	679-684	6	A/N	This field contains the submitter-assigned number of the batch that contained the input record. If the acknowledgement is being returned from the FCR's Recycle Unverified SSN/Name Combination process, this field will contain the value '000000'.
Date of Death	685-692	8	A/N	This field contains the SSA-recorded Date of Death in CCYYMMDD format, for the person. If no DOD is available, this field contains spaces. Note: If the SSA Death Master File contained '00' in the day, the FCR System returns '01' in the day portion of the Date of Death.
SSA Zip Code of Last Residence	693-697	5	A/N	This field contains the valid Zip Code of the person's last residence based on SSA's Death Records. Invalid or incomplete Zip Codes on the SSA death record are not returned. If a Zip Code is not available, this field contains spaces. If FINALIST did not validate the Zip Code that was provided by the Death Master File, this field contains spaces.
SSA Zip Code of Lump Sum Payment	698-702	5	A/N	This field contains the valid Zip Code of where the lump sum death benefit payment was sent based on SSA's death records. Invalid or incomplete Zip Codes on the SSA Death Record are not returned. If a Zip Code is not available, this field contains spaces. If FINALIST did not validate the Zip Code that was provided by the Death Master File, this field contains spaces.
FCR Primary SSN	703-711	9	A/N	This field contains the SSN that is stored on the FCR Database as the person's primary SSN.
FCR Primary First Name	712-727	16	A/N	This field contains the first name of the person who is stored on the FCR Database that verified with the Primary SSN.
