4Q/2005 Performance Indicators

Licensee's General Comments: On November 30, 2005, a locked high radiation area was not secured against unauthorized access. Personnel failed to properly secure the 80-foot containment airlock after an immediate egress of personnel from the RCA as a result of a personnel illness. The air lock was verified not to have been opened during the time the airlock was not secure. Therefore, no personnel exposures were incurred. The PI remained within the Green band.
