

0515 6 FEB 16 P2:33
JAN 26 2006

President
Beulah Land Corporation
715 Lake Street, Suite 706
Oak Park, IL 60301

Dear Sir:

This is in response to your letters received by the Food and Drug Administration (FDA) on January 19, 2005. These letters appear to be submissions to FDA pursuant to 21 U.S.C. 343(r)(6) (section 403(r)(6) of the Federal Food, Drug, and Cosmetic Act (the Act)). Your letters state that Beulah Land Corporation intends to make the following statements, among others, for the following products:

**Female Age Well
Menstrual Support**

"[M]ay help with...chronic fatigue."

EnhanceMENT Plus

"Natural alternative to Viagra...."

Paracid-B-Gone

"[A]ssist in conditions such as parasite infections, intestinal dysbiosis...."

De-Yeast Plus

"[H]elpful for conditions such as Candida Albicans, intestinal dysbiosis, stomach flu, and irritable bowel syndrome."

Pro-Cartilage

"[H]elp with joint injuries...."

"[H]elp to relieve pain and arthritis symptoms...."

"[R]educe pain and accelerate the inflammatory healing response for painful joint conditions, sports injury...."

"[M]ay help rebuild cartilage and alleviate pain in joint injury and other painful joint conditions."

97S 0163
97S 0163 LET 859

You also submitted a letter for the product **Lipid Balance** that uses the claim [M]ay be used to help normalize cholesterol levels." In the preamble to the January 6, 2000 final rule on structure/function claims (see 65 FR 1000 at 1018), FDA stated that claims about the maintenance of normal cholesterol levels did not necessarily constitute implied disease claims. We stated, however, that because "many people think of cholesterol solely in terms of the negative role of elevated cholesterol in heart disease," in order to avoid implying that the product prevents or treats heart disease, a cholesterol maintenance claim would have to clarify that the product is only for maintenance of cholesterol levels that are already within the normal range. Therefore, because the claim you are making for this product represents that the product is intended to normalize an abnormal blood cholesterol level but does not also include a statement about it being intended to affect blood cholesterol that is already in the normal range, it is an implied disease claim.

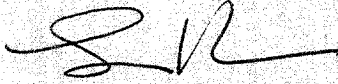

21 U.S.C. 343(r)(6) makes clear that a statement included in labeling under the authority of that section may not claim to diagnose, mitigate, treat, cure, or prevent a specific disease or class of diseases. The statements that you are making for these products suggest that they are intended to treat, prevent, or mitigate diseases. These claims do not meet the requirements of 21 U.S.C. 343(r)(6). These claims suggest that these products are intended for use as drugs within the meaning of 21 U.S.C. 321(g)(1)(B), and that they are subject to regulation under the drug provisions of the Act. If you intend to make claims of this nature, you should contact FDA's Center for Drug Evaluation and Research (CDER), Office of Compliance, HFD-310, Montrose Metro II, 11919 Rockville Pike, Rockville, Maryland 20855.

We would also like to note one other issue with your notices. 21 CFR 101.93(a)(3) requires that the notice submitted pursuant to 21 U.S.C. 343(r)(6) and this section be signed by a responsible individual who can certify the accuracy of the information presented and contained in the notice, and that the individual certify that the information contained in the notice is complete and accurate, and that the notifying firm has substantiation that the statement is truthful and not misleading. Your submission does not meet this requirement in that the notice does not contain the name and signature of a responsible individual; as such, it does not certify that the firm is in compliance with the requirements of the Act and the regulation. Therefore, your firm has not complied with the notification requirement in 21 U.S.C. 343(r)(6) and must submit notifications in accordance with the requirements in 21 CFR 101.93(a). The failure to submit a valid notice as required by the Act and the agency's regulation may subject the products that are the subject of the notification to regulation under the drug provisions of the Act.

Page 3 - President, Beulah Land Corporation

Please contact us if we may be of further assistance.

Sincerely yours,

A handwritten signature in black ink, appearing to be 'S. Walker', written in a cursive style.
