May 2008

### The U.S.-Panama Trade Promotion Agreement Provides Enhanced Market Access

The U.S.-Panama Trade Promotion Agreement (TPA) offers tremendous opportunities for New Hampshire's exporters. Panama's strategic location as a major shipping route and the massive project underway to expand the capacity of the Panama Canal enhance the importance of the U.S.-Panama TPA for New Hampshire's exporters.

When the Agreement enters into force, 88 percent of U.S. consumer and industrial exports to Panama, including nearly all information technology products; aircraft and related equipment; agriculture and construction equipment; medical and scientific equipment; environmental products; pharmaceuticals; fertilizers; and agro-chemicals will become duty-free immediately. The remaining tariffs phase out over 10 years. U.S. farmers and ranchers will also become much more competitive, benefiting from immediate duty-free treatment of more than 60 percent of current U.S. agriculture exports. Key U.S. agriculture exports such as high-quality beef, other meat and poultry products, soybeans, most fresh fruit and tree nuts, distilled spirits and wines, and many processed food products, will be duty-free upon entry into force of the Agreement. Tariffs on most remaining U.S. farm products will be phased out within 15 years.

### Opportunities for New Hampshire's Businesses to Participate in the Panama Canal Expansion Project

The U.S.-Panama TPA will ensure that New Hampshire's firms can participate on a competitive basis in the \$5.25 billion Panama Canal expansion project that will offer many opportunities for U.S. providers of goods and services. Ultimately, the Canal expansion will benefit New Hampshire's exporters by increasing the Canal's capacity, which will reduce the costs of transporting goods while keeping up with the demands of a growing global economy.

### New Hampshire Depends on World Markets

Export shipments of merchandise from New Hampshire to the world in 2007 totaled \$2.9 billion.

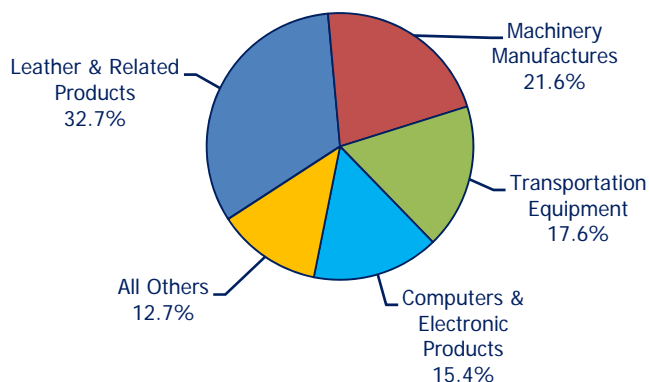

**Exports Support Jobs for New Hampshire's Workers** – Export-supported jobs linked to manufacturing account for an estimated 4.9 percent of New Hampshire's total private-sector employment. Over one-fifth (21.8 percent) of all manufacturing workers in New Hampshire depend on exports for their jobs. (2006 data are the latest available.)

**Exports Sustain Thousands of New Hampshire's Businesses** – A total of 2,012 companies exported goods from New Hampshire locations in 2006. Of those, 1,753 (87 percent) were small and medium-sized enterprises (SMEs), with fewer than 500 employees.

### The U.S.-Panama TPA Expands U.S. Services Providers' Access to Panama's Services Market

The U.S.-Panama TPA expands U.S. services providers' access to Panama's primarily service-based economy. The Panama Canal and the Colon Free Zone provide much of the stimulus for Panama's services sector. Key services include banking and financial services, accounting, legal and insurance services, inter-modal transportation services, container ports, flagship registry, tourism, and medical and health services. Panama made substantial commitments to liberalize its services trade. For example, Panama committed to open its telecommunications and financial services sector to U.S. companies, to lift restrictions on investment in retail services trade and to provide new access to professional services that previously had been reserved exclusively to Panamanian citizens.

### New Hampshire Exported \$774 Thousand in Goods to Panama in 2007

## The U.S.-Panama TPA Moves the Trade Relationship from One-Way Preferences to Reciprocity

In 2007, 91 percent of Panama's exports to the United States entered duty free under unilateral U.S. trade preference programs such as the Caribbean Basin Initiative and Generalized System of Preferences or under zero Normal Trade Relations tariffs. Because of high Panamanian tariffs, U.S. exporters do not have equivalent access to the Panamanian market. The U.S.-Panama TPA levels the playing field and enhances competition because it moves the U.S.-Panama commercial relations beyond one-way preferences to full partnership and reciprocal commitments.

## New Hampshire's SMEs Will Benefit from U.S.-Panama TPA Provisions

SMEs generated 41 percent of New Hampshire's exports of merchandise in 2006. This was the eighth highest share among the states and well above the national average of 29 percent. SMEs particularly benefit from tariff-eliminating provisions of free trade agreements (FTAs) and should benefit from significant tariff cuts under the U.S.-Panama TPA. The transparency obligations, particularly those contained in the customs chapter, are also very important to SMEs, which may not have the resources to navigate customs and regulatory red tape.

## The U.S.-Panama TPA Opens New Markets for New Hampshire's Exports

**Computers and Electronic Products** – In 2007, New Hampshire's global exports of computers and electronic products totaled \$796 million, accounting for 27 percent of the state's total exports. New Hampshire's exporters of computers and other information technology equipment will benefit from U.S.-Panama TPA tariff reductions. Certain U.S. exports of information technology equipment will receive duty-free treatment immediately upon entry into force of the Agreement, including DVDs, telephone and fax equipment, semiconductors, and medical and laboratory instruments.

**Machinery Manufactures** – New Hampshire's companies exported \$727 million in machinery manufactures in 2007, increasing 87 percent from 2003 to 2007. New Hampshire's exporters of machinery will benefit from U.S.-Panama TPA tariff reductions. Certain U.S. exports of machinery manufactures will receive duty-free treatment immediately upon entry into force of the Agreement, including turbines, machine tools, sewing machines and office machines. Tariffs on all U.S. exports of agricultural and construction equipment, which are currently as high as 10 percent, will fall to zero immediately upon entry into force of the Agreement. These tariff reductions will improve U.S. equipment manufacturers' access to the Panamanian market, especially during the bidding processes for the Panama Canal expansion project.

**Electrical Equipment, Appliances and Parts** – In 2007, New Hampshire's global exports of electrical equipment, appliances and parts totaled \$172 million. New Hampshire's exporters of electrical equipment, appliances and parts will benefit from the U.S.-Panama TPA tariff reductions. Tariffs on high-priority electrical equipment, such as fiber optic cable, transformers and fluorescent lamps will be eliminated immediately upon implementation of the Agreement. Panama will eliminate tariffs on 81 percent of U.S. appliance exports immediately upon implementation of the Agreement including household appliances, such as vacuums, fridges, dishwashers, toasters, and coffee makers.

## The U.S.-Panama TPA Creates Opportunities for New Hampshire's Agriculture

Despite high tariffs and other barriers on agricultural products, including key New Hampshire farm products such as poultry, wheat, and corn, U.S. exporters shipped \$304 million in farm products to Panama in 2007, up \$95 million from 2006. A primary U.S. objective was to change the "one-way street" of duty-free access currently enjoyed by most Panama exports into a "two-way street" that provides U.S. suppliers with access to Panama's market and levels the playing field with competitors. This objective was achieved. The U.S.-Panama TPA also includes far-reaching bilateral provisions concerning sanitary and phytosanitary (SPS) measures and technical standards that will help to eliminate long-standing regulatory barriers faced by a variety of U.S. products in the Panamanian market.

For more information on agriculture exports and U.S.-Panama TPA, see the fact sheets prepared by the U.S. Department of Agriculture at <http://www.fas.usda.gov/itp/us-panama.asp>

## Free Trade Works for New Hampshire's Exporters

In the first four years (2004-2007) of the U.S.-Chile FTA, New Hampshire's exports to Chile increased by 60 percent and in the first two years of the U.S.-Morocco FTA, (2006-2007) the state's exports to Morocco grew 85 percent. Since the North American Free Trade Agreement's (NAFTA) entry into force in 1994, New Hampshire's combined exports to Canada and Mexico have grown 80 percent.

All state export data in this report are based on an unrevised Origin of Movement (OM) series. This series allocates exports to state based on transportation origin, i.e., the state from which goods began their journey to the port (or other point) of exit from the United States. The transportation origin of exports is not always the same as the location where the goods were produced. Thus conclusions about "export production" in a state should not be made solely on the basis of the OM state export figures.
