May 2008

The U.S.-Panama Trade Promotion Agreement Provides Enhanced Market Access

The U.S.-Panama Trade Promotion Agreement (TPA) offers tremendous opportunities for Wyoming's exporters. Panama's strategic location as a major shipping route and the massive project underway to expand the capacity of the Panama Canal enhance the importance of the U.S.-Panama TPA for Wyoming's exporters.

When the Agreement enters into force, 88 percent of U.S. consumer and industrial exports to Panama, including nearly all information technology products; aircraft and related equipment; agriculture and construction equipment; medical and scientific equipment; environmental products; pharmaceuticals; fertilizers; and agro-chemicals will become duty-free immediately. The remaining tariffs phase out over 10 years. U.S. farmers and ranchers will also become much more competitive, benefiting from immediate duty-free treatment of more than 60 percent of current U.S. agriculture exports. Key U.S. agriculture exports such as high-quality beef, other meat and poultry products, soybeans, most fresh fruit and tree nuts, distilled spirits and wines, and many processed food products, will be duty-free upon entry into force of the Agreement. Tariffs on most remaining U.S. farm products will be phased out within 15 years.

Opportunities for Wyoming's Businesses to Participate in the Panama Canal Expansion Project

The U.S.-Panama TPA will ensure that Wyoming's firms can participate on a competitive basis in the \$5.25 billion Panama Canal expansion project that will offer many opportunities for U.S. providers of goods and services. Ultimately, the Canal expansion will benefit Wyoming's exporters by increasing the Canal's capacity, which will reduce the costs of transporting goods while keeping up with the demands of a growing global economy.

Wyoming Depends on World Markets

Wyoming's global shipments of merchandise in 2007 totaled \$802 million, a 38 percent increase over the 2003 total of \$582 million.

Wyoming's export shipments of merchandise to Panama totaled \$1.5 million in 2007.

Exports Support Jobs for Wyoming's Workers –

Export-supported jobs linked to manufacturing account for an estimated 1.2 percent of Wyoming's total private-sector employment. Roughly one in ten (9.7 percent) of all manufacturing workers in Wyoming depend on exports for their jobs. (2006 data are the latest available.)

Exports Sustain Hundreds of Wyoming's Businesses –

A total of 296 companies exported goods from Wyoming locations in 2006. Of those, 220 (74 percent) were small and medium-sized enterprises (SMEs), with fewer than 500 employees.

The U.S.-Panama TPA Expands U.S. Services Providers' Access to Panama's Services Market

The U.S.-Panama TPA expands U.S. services providers' access to Panama's primarily service-based economy. The Panama Canal and the Colon Free Zone provide much of the stimulus for Panama's services sector. Key services include banking and financial services, accounting, legal and insurance services, inter-modal transportation services, container ports, flagship registry, tourism, and medical and health services. Panama made substantial commitments to liberalize its services trade. For example, Panama committed to open its telecommunications and financial services sector to U.S. companies, to lift restrictions on investment in retail services trade and to provide new access to professional services that previously had been reserved exclusively to Panamanian citizens.

Wyoming Exported \$1.5 Million in Goods to Panama in 2007

The U.S.-Panama TPA Moves the Trade Relationship from One-Way Preferences to Reciprocity

In 2007, 91 percent of Panama's exports to the United States entered duty free under unilateral U.S. trade preference programs such as the Caribbean Basin Initiative and Generalized System of Preferences or under zero Normal Trade Relations tariffs. Because of high Panamanian tariffs, U.S. exporters do not have equivalent access to the Panamanian market. The U.S.-Panama TPA levels the playing field and enhances competition because it moves the U.S.-Panama commercial relations beyond one-way preferences to full partnership and reciprocal commitments.

Wyoming's SMEs Will Benefit from U.S.-Panama TPA Provisions

SMEs generated 35 percent of Wyoming's exports of merchandise in 2006. SMEs particularly benefit from tariff-eliminating provisions of free trade agreements (FTAs) and should benefit from significant tariff cuts under the U.S.-Panama TPA. The transparency obligations, particularly those contained in the customs chapter, are also very important to SMEs, which may not have the resources to navigate customs and regulatory red tape.

The U.S.-Panama TPA Opens New Markets for Wyoming's Exports

Chemical Manufactures – Chemical manufactures accounted for \$566 million, or 71 percent, of Wyoming's global exports in 2007, making it the state's largest manufactured export category that year. Wyoming's exporters of chemicals and related products, including pharmaceuticals, cosmetics, fertilizers, and agro-chemicals, will benefit from U.S.-Panama TPA tariff reductions. Eighty percent of U.S. chemical exports will receive duty-free treatment immediately upon entry into force of the Agreement, including fertilizer, resins, and soda ash. Remaining tariffs will phase out within ten years. Current Panamanian tariffs average 3.5 percent and can be as high as 15 percent.

Machinery Manufactures – Wyoming's companies exported \$61 million in machinery manufactures to the world in 2007, increasing 202 percent from 2003 to 2007. Wyoming's exporters of machinery will benefit from U.S.-Panama TPA tariff reductions. Certain U.S. exports of machinery manufactures will receive duty-free treatment immediately upon entry into force of the Agreement, including turbines, machine tools, sewing machines and office machines. Tariffs on all U.S. exports of agricultural and construction equipment, which are currently as high as 10 percent, will fall to zero immediately upon entry into force of the Agreement. These tariff reductions will improve U.S. equipment manufacturers' access to the Panamanian market, especially during the bidding processes for the Panama Canal expansion project.

Computers and Electronic Products – In 2007, Wyoming's global exports of computers and electronic products totaled \$7.6 million. Wyoming's exporters of computers and other information technology equipment will benefit from U.S.-Panama TPA tariff reductions. Certain U.S. exports of information technology equipment will receive duty-free treatment immediately upon entry into force of the Agreement, including DVDs, telephone and fax equipment, semiconductors, and medical and laboratory instruments.

The U.S.-Panama TPA Creates Opportunities for Wyoming's Agriculture

In 2006, agriculture exports from Wyoming to the world amounted to \$53 million (latest data available). Despite high tariffs and other barriers on agricultural products, including key Wyoming farm products such as beef, pork, wheat, dried peas, beans, and sugar, U.S. exporters shipped \$304 million in U.S. farm products to Panama in 2007, up \$95 million from 2006. A primary U.S. objective was to change the "one-way street" of duty-free access currently enjoyed by most Panama exports into a "two-way street" that provides U.S. suppliers with access to Panama's market and levels the playing field with competitors. This objective was achieved. The U.S.-Panama TPA also includes far-reaching bilateral provisions concerning sanitary and phytosanitary (SPS) measures and technical standards that will help to eliminate long-standing regulatory barriers faced by a variety of U.S. products in the Panamanian market.

For more information on agriculture exports and U.S.-Panama TPA, see the fact sheets prepared by the U.S. Department of Agriculture at <http://www.fas.usda.gov/itp/us-panama.asp>

Free Trade Works for Wyoming's Exporters

Since the entry into force of the U.S.-Singapore FTA in 2004, Wyoming's exports to Singapore increased by 203 percent. Since the North American Free Trade Agreement's (NAFTA) entry into force in 1994, Wyoming's exports to Canada and Mexico combined have grown by 524 percent and in the last three years (2005-2007) the state's exports to the DR-CAFTA region have grown 184 percent.

All state export data in this report are based on an unrevised Origin of Movement (OM) series. This series allocates exports to state based on transportation origin, i.e., the state from which goods began their journey to the port (or other point) of exit from the United States. The transportation origin of exports is not always the same as the location where the goods were produced. Thus conclusions about "export production" in a state should not be made solely on the basis of the OM state export figures.
