# Benefits from the U.S.-Korea Free Trade Agreement

## North Dakota

[www.export.gov/fta/korea/state](http://www.export.gov/fta/korea/state)

August 2008

### The U.S.-Korea Free Trade Agreement Provides Enhanced Market Access

The U.S.-Korea Free Trade Agreement (FTA) offers tremendous opportunities for U.S. exporters. Nearly 95 percent of U.S. exports of consumer and industrial products will enter Korea duty-free within three years of entry into force of the agreement, including computers and electronic products; auto parts; power generation equipment; chemicals; medical and scientific equipment; and certain wood products. Most remaining tariffs will be eliminated within 10 years. Almost two-thirds of U.S. agricultural exports will be immediately duty-free when the FTA is implemented (\$1.9 billion duty-free out of \$2.9 billion 2005-2007 average).

Recognizing that non-tariff barriers in Korea are often as much of an impediment to market access as tariffs, the FTA includes an extensive set of provisions that will eliminate such measures across sectors, including autos, high technology, pharmaceuticals and medical devices, financial services, and telecommunications. The agreement includes strong transparency provisions, including commitments to publish in advance proposed government regulations that affect trade and to allow a reasonable opportunity for interested parties to provide input. The agreement contains strong provisions on technical barriers to trade to enhance transparency of the regulatory process in Korea and ensure nondiscriminatory treatment for U.S. companies that test and certify products to Korean standards.

### North Dakota Depends on World Markets

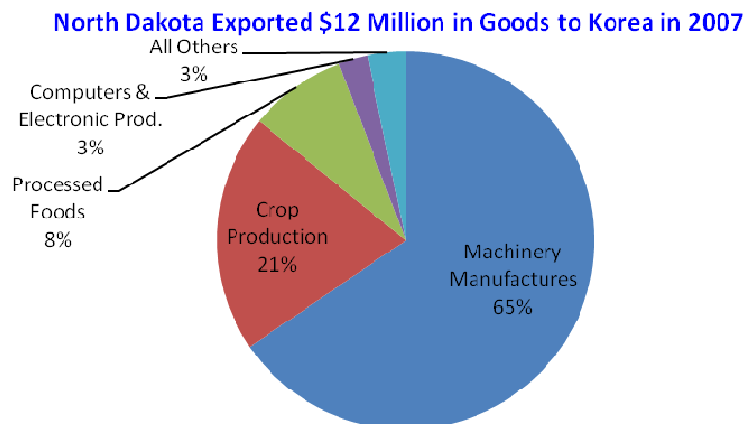

North Dakota's export shipments of merchandise in 2007 totaled \$2.0 billion. That is a 138 percent increase over the 2003 figure of \$854 million and the third fastest growth among the 50 states over that time period.

**Exports Support Jobs for North Dakota Workers-** Export-supported jobs linked to manufacturing account for an estimated 3.4 percent of North Dakota's total private-sector employment. One-seventh (14.3 percent) of all manufacturing workers in North Dakota depend on exports for their jobs. (2006 data are the latest available.)

**Exports Sustain Hundreds of North Dakota Businesses-** A total of 781 companies exported goods from North Dakota locations in 2006. Of those, 654, or 84 percent, were small and medium-sized enterprises (SMEs), with fewer than 500 employees.

### North Dakota SMEs Will Benefit from U.S.-Korea FTA Provisions

SMEs generated almost one-fourth (24 percent) of North Dakota's total exports of merchandise in 2006. SMEs particularly benefit from the tariff-eliminating provisions of free trade agreements (FTAs) and should benefit from the significant tariff cuts under the U.S.-Korea FTA. The transparency obligations, particularly those contained in the customs chapter, are also very important to SMEs, which may not have the resources to navigate customs and regulatory red tape.

## The U.S.-Korea FTA Moves the Trade Relationship to Full Partnership

The U.S.-Korea FTA will level the playing field by rectifying the significant tariff imbalance that currently favors Korean exporters over U.S. exporters. Korea's current applied tariffs on industrial goods average 6.2 percent. The average applied U.S. tariff rate is only 2.8 percent - less than half of the Korean rate. Because of these higher tariffs, U.S. exporters do not have equivalent access to the Korean market. The U.S.-Korea FTA levels the playing field and enhances competition because it moves the U.S.-Korea commercial relationship to full partnership and reciprocal commitments.

## The U.S.-Korea FTA Opens New Markets for Key North Dakota Exports

**Machinery Manufactures** – North Dakota's leading manufactured export category is machinery manufactures, which alone accounted for \$929 million, or 46 percent of North Dakota's total export shipments in 2007. Many machinery manufactures will receive duty-free treatment immediately upon entry into force of the agreement, including products such as refrigeration compressors, water filtering and purifying equipment. One hundred percent of agricultural and construction equipment, including bulldozers, mechanical shovels, boring and sinking machinery, and dumpers, will continue to receive duty-free treatment. The elimination of Korean tariffs on U.S. machinery manufactures will provide a competitive boost to U.S. exporters, who will no longer face tariffs as high as 8 percent.

**Processed Foods** – North Dakota exported \$209 million in processed food products in 2007. The U.S.-Korea FTA, when implemented, will stimulate new opportunities for North Dakota businesses in this sector. Korea is a growing market for consumer-oriented foods, creating new opportunities for U.S. exports of snack foods, cheese, and juices. The U.S.-Korea FTA will enhance these opportunities by eliminating tariff and non-tariff barriers that currently hamper exports of U.S. food and consumer products to Korea. Many processed food products will receive immediate duty-free treatment such as frozen french fries and all other processed food tariffs will be eliminated in five years or less.

**Transportation Equipment** – Transportation equipment is an important North Dakota export. In 2007, North Dakota exported \$162 million in transportation equipment. North Dakota's exporters of transportation equipment, including aircraft, fishing vessels, locomotives, and other transportation manufactures, will benefit from U.S.-Korea FTA tariff reductions. Duties on most transportation equipment products will be eliminated immediately, including duties on 87 percent of aircraft and

related parts. Duties on a small group of products will be eliminated over three or ten years.

## U.S.-Korea FTA Creates Opportunities for North Dakota's Agriculture

In 2006, North Dakota's agriculture exports to the world amounted to \$1.9 billion (latest data available). The U.S.-Korea FTA eliminates tariffs and other barriers on most agricultural products, increasing export opportunities for U.S. agricultural products like those produced in North Dakota such as wheat, beef, and soybeans. With immediate elimination of duties on more than 60 percent of current U.S. trade, the U.S.-Korea FTA gives U.S. exporters improved access to the Korean market for many of the products that have been highly protected. U.S. exporters shipped \$3.5 billion in farm products to Korea in 2007.

For more information on agricultural exports and the U.S.-Korea FTA, see the fact sheets posted by the U.S. Department of Agriculture at:

## Free Trade Works for North Dakota

In the first four years (2004-2007) of the U.S.-Chile FTA, North Dakota's exports to Chile increased by 312 percent. During the first four years of the U.S.-Singapore FTA (2004-2007), North Dakota's exports to Singapore increased by 321 percent and since entry into force of the North American Free Trade Agreement (NAFTA), North Dakota's combined exports to Canada and Mexico have grown 289 percent.

All state export data in this report are based on the Origin of Movement (OM) series. This series allocates exports to state based on transportation origin, i.e., the state from which goods began their journey to the port (or other point) of exit from the United States. The transportation origin of exports is not always the same as the location where the goods were produced. Thus conclusions about "export production" in a state should not be made solely on the basis of the OM state export figures.
