re: Docket # ODP-0586 CP2

Dear Ms Butler,

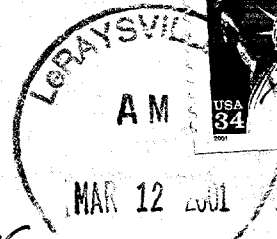

I'm writing to OPPOSE the request of the National Cheese Institute to allow the use of wet & dry ultra filtered milk, or "Milk Protein Concentrate." I and other U.S. cheese manufacturers are committed to maintaining the image and reality of milk and milk products as safe, wholesome and ideally nutritious foods. The adoption of this petition request by the FDA can only damage our business, besides forcing thousands of family farms to the wall as milk prices must fall still further under this program.

Yours Truly  
James Emory, Manager  
Le Raysville Cheese Factory
