

12/27/00

Dear Dr. Henney

I am concerned about the potential ineffectiveness of antibiotics used in animal feeding when needed for human diseases.

7306 '01 JAN 25 110:08

The I.D.A. should step right up to this problem and stop the use of these antibiotics in animal growth.

It's too bad you are so slow taking care of this problem. It is very serious.
