Dear Ms. Henney,

I am writing to urge you to do all in your power to ban the use of human antibiotics to make livestock grow faster.

We hear, every day, about people for whom the anti-biotics no longer work. There is no reason except desire for excess profits that these precious medicines are used on animals. We are setting ourselves up for disaster - please stop it now!

*If animals are ill,  
they shouldn't be  
used for meat!*

Sincerely yours,

*Marjorie Williams*
