Dear Mrs. Henney,

This letter is to urge you to consider
barring the use of human antibiotics
in the production of livestock. Also the
practice of using B6H in milk production
and the use of hormones in animal
production.

We have a family of four, we all
avoiding.

1. MEAT - BEEF - CHICKEN - PORK
(UNLESS ORGANIC)
2. MILK & MILK PRODUCTS. C2865
(WE ONLY BUY EUROPEAN CHEESE
OR ORGANIC)

SSP-0435

cont →

I felt it was important to share this with you and to let you know I am encouraging all the people I come in contact with to do the same.

I also have one final question.
How is it possible for companies to use cottonseed oil in cookies, crackers, cereal etc?
I thought cotton seed was not a food product and is one of the heaviest sprayed crops.
Everything seems to have it in them, these I also ~~am~~ avoiding.

Thank you for your attention to this letter.
