RE: Notification of Nutritional Support Statements

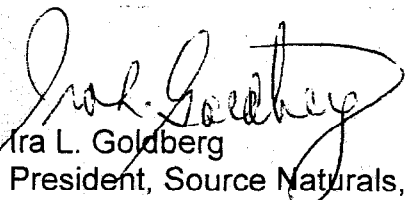

Dear Sir or Madam:

I hereby notify the Food and Drug Administration (FDA) of the use of statements of nutritional support in the labeling of N-Acetyl L-Tyrosine a dietary supplement. Source Naturals® is the manufacturer of N-Acetyl L-Tyrosine.

Statements being made in the labeling of N-Acetyl L-Tyrosine:

- (1) N-Acetyl L-Tyrosine is a more rapidly absorbed and bioavailable form of the amino acid L-tyrosine, and is less prone to urinary excretion.
- (2) L-Tyrosine is converted in the body to key biologic compounds, including the neurotransmitter hormones epinephrine, dopamine, L-dopa, CoQ10, thyroid hormones, and melanin. The B vitamins pyridoxine (B-6) and folic acid are provided to assist in the conversion process.

To the best of my knowledge, and based upon information and belief present at the time of the execution of this notice, I certify that the above information is accurate and complete. Source Naturals possesses substantiation that the statements are truthful and not misleading.

Ira L. Goldberg
President, Source Naturals, Inc.
