

Docket #19 OOD-1549 2/3/01

and OON-1396

Dear Commissioner,  
The FDA should not promote the food industry but regulate it. I am very anxious about genetic engineering on foods, pesticide use, weed killer Roundup Ready, on soy and or genetically engineered soy, etc.

I ask you to require both labeling and pre market safety testing of these foods with unforeseen hazards health risks cancer producing foods.

Sincerely Jeanette Oliver

OOD-1396

OON-1396
