Food Allergen Labeling

To whom it may concern: MAY 13 02 '08

Two years ago I was diagnosed with celiac sprue... a disease which makes me gluten intolerant. Ingesting gluten greatly increases my chances of many serious diseases - among them, intestinal cancers and Lymphoma.

Please require companies to be specific about their ingredients.
"natural flavor" from what?
"Food Starch" from what?

I am a public school teacher, and I have found getting the specifics of what I'm eating to be very difficult! Help me with this alarming curvè!

Thank you!
