Dear Dr Henney,

Even in my small Colorado community I have seen a rapid escalation of bacterial resistance to antibiotics. It is the rare M.D. who over/inappropriately prescribes antibiotics as we all feel the change. Yet our efforts are wasted if the farmers & ranchers dump antibiotics into their livestock. CDC considers Agri. overuse the main cause of Bac. Resistance in food borne Bacteria

Please don't drag your feet.

The European Union & WHO both know this is wrong.

Ban the use of human antibiotics in agriculture as growth promoters

Thank you C 2877
