RE: Notification of Nutritional Support Statements

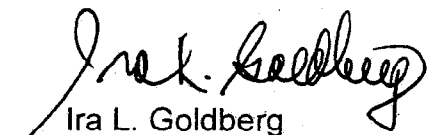

Dear Sir or Madam:

I hereby notify the Food and Drug Administration (FDA) of the use of statements of nutritional support in the labeling of K-Mag KG™ a dietary supplement. Source Naturals® is the manufacturer of K-Mag KG™.

Statements being made in the labeling of K-Mag KG™:

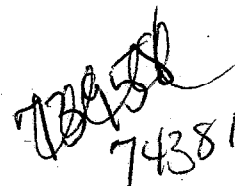

- (1) K-Mag KG™ is a combination of the essential minerals potassium and magnesium, with alpha-ketoglutaric acid (AKG). Potassium, magnesium, and AKG all have important roles in the Krebs cycle, one of the body's main energy production systems. Potassium is important for muscle strength and glycogen formation, while magnesium help store body energy as magnesium ATP (adenosine triphosphate, the body's chief energy molecule). AKG combines with the harmful ammonia generated by intense muscle activity to create glutamine, and important energy fuel.

To the best of my knowledge, and based upon information and belief present at the time of the execution of this notice, I certify that the above information is accurate and complete. Source Naturals possesses substantiation that the statements are truthful and not misleading.

Ira L. Goldberg
President, Source Naturals, Inc.
