Dear Mr Henney -

4086 '01 JAN 17 AIO:43

I am writing a guide note to express my great concern regarding the use of medically valuable antibiotics, or antimicrobials generally, for growth promotion in livestock. I am sure you are aware that the World Health Organization has formally recognized and broadcast the serious detrimental consequences to human health of this unnecessary feeding of antibiotics to healthy animals.

Please exercise your considerable authority to protect the medical value of antimicrobial drugs!

Sincerely,

Sally Levering
