

Docket # 00D-1598, 00N-1398

2-24-01

Dear FDA Commissioner,

I feel that my right to know what is in my food should outweigh the economic interests of biotech corporations. And, since it is the FDA's job to protect the American consumer, at the very least you should require independent ~~study~~ safety testing of all genetically engineered products and clear labeling of any GMO food on the market. Please, for once, consider people over profit!
