Commissioner Jane Henigson  
FDA

Rockville MD

I write to oppose the FDA's  
voluntary labeling and notification  
proposals

- 1) There should be a moratorium  
on genetically engineered foods  
until long-term studies show they  
are safe for health and the environment.
- 2) All ~~GE~~ GE foods should be required  
to be labeled and should be subject  
to mandatory pre-market testing.

The FDA is responsible for protecting  
our health. This issue seems to me  
urgent.

Sincerely yours,  
Yvonne Pappenheim
