Re: Docket No. OON-1396 and OOD-1598

Dear Commissioner Henney:

I am outraged by your new policies on genetically engineered (GE) foods. Despite overwhelming consumer demand, your agency still fails to require safety testing and mandatory labeling for GE foods. Your "notification policy is an insult to consumers, and irresponsibly ignores strong scientific evidence of numerous potential health and environmental risks to GE foods. You should be aware that these foods could be toxic, could cause allergic responses, could have lower nutrition value, could compromise immune responses in consumers, and could cause irreparable damage to the environment.

I am also greatly opposed to your new "voluntary labeling" policy, which denies consumers a basic right to know. Without mandatory labeling, neither consumers nor health professionals will know if an allergic or toxic reaction was the result of a genetically engineered food. Consumers will also be deprived of the critical knowledge they need to hold food producers liable should any of these novel foods prove hazardous.

Your proposed rules ignore serious concerns, and appear to be a decision made to convenience industry at the expense of public health and the environment. I will not accept your attempt to make me a guinea pig of these untested foods, and I trust you will take my concern along with the thousands of others into serious consideration.

Sincerely yours,

*Genevieve B. Civetta*

OON 1396

C 1472

# STILL NOT LABELED AND YOU'RE EATING IT.

The Food and Drug Administration (FDA) has recently announced new rules and guidance on genetically engineered (GE) foods. Unfortunately, despite overwhelming consumer demand, the agency has still failed to require safety testing and mandatory labeling for GE foods. Instead of mandating safety testing, the FDA's new rule merely requires that food producers notify the agency before marketing a GE food. There is strong scientific evidence of numerous potential health and environmental risks of GE foods. These foods could be toxic, could cause allergic responses, could have lower nutrition value and could compromise immune responses in consumers. Under FDA's new notification rule GE foods will reach supermarket shelves without any required testing for these human health problems, much less any review of their environmental risks. As a result, millions of consumers will continue to be unknowing guinea pigs testing the safety of these foods. This is totally unacceptable.

As for labeling the FDA has decided to make all labeling of GE foods voluntary. Not surprisingly, no GE food producer has agreed to label their products. So consumers still will have no way of knowing which foods have been genetically engineered. This voluntary labeling scheme not only violates the consumer's right to know, it also has health consequences. Without labeling, neither consumers nor health professionals will know if an allergic or toxic reaction was the result of a genetically engineered food. Consumers will also be deprived of the critical knowledge they need to hold food producers liable should any of these novel foods prove hazardous.

The good news is that these rules are not final. The FDA, as required by law, has opened a comment period to hear from the public. This comment period lasts until April 3rd. It is critical that the FDA hears from hundreds of thousands of Americans. We have provided you with post-cards so that you and one other friend or family member can comment directly to the FDA (you can also comment directly to the FDA electronically through our website [www.foodsafetynow.org](http://www.foodsafetynow.org)). We need to let the FDA and the Bush Administration know that we will settle for nothing less than mandatory safety testing and labelling of all GE foods. Further, all GE foods should be taken off supermarket shelves until they have been safety tested and labeled.

For more information please visit The Center for Food Safety's website, [www.centerforfoodsafety.org](http://www.centerforfoodsafety.org), or submit comments directly to the FDA through our campaign website, [www.foodsafetynow.org](http://www.foodsafetynow.org). The Center for Food Safety is also a member of the Genetically Engineered Food Alert (GEFA) coalition, [www.gefoodalert.org](http://www.gefoodalert.org).

## DEAR FDA,

I am writing to express my opposition to the FDA's new proposed rule and guidance on genetically engineered (GE) foods. The agency's voluntary labeling and notification proposals are totally inadequate to protect human health, the environment, and my right to know. I fully support the following:

- All GE foods and food ingredients should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be safe and should be subject to mandatory pre-market safety testing.
- There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.
