

Near FDA

I am ~~opposed~~ to the new
FDA's proposed rule + guidance
on genetically engineered (GE)
foods.

Voluntary labeling + notification
is not adequate to protect
my health + the
environment.

Have you ever compared
genetically engineered
tomatoes? Compared to home
grown

- I want all G.E. (Genetically Engineered) foods + ingredients to be labeled so I can choose
- G.E. foods should not be considered safe unless tested
- I want a moratorium of these foods until shown to be safe by testing.
