

Dear Commissioner,

I am deeply concerned ^{625 III MAR 15 11:47} about the FDA not regulating the food I eat. I urge you to change your position on GM food to require:

- 1) Labeling of new foods
- 2) Safety-testing on pre-market foods.

As a consumer, it is my right to know what I am buying and subsequently eating. For example, if I were to have an allergic reaction to the food I ate, how would anyone know what my allergies were. Your job is to protect the public, please do so!

Sincerely,

Lonnie M. Southworth
Lonnie M. Southworth
