Dear FDA,

I'm outraged by your new policies on genetically engineered (GE) foods. Despite overwhelming consumer demand, your agency still fails to require safety testing and mandatory labeling for GE foods

Your "notification" policy is an INSULT to consumers, and irresponsibly ignores strong scientific evidence of numerous potential health and environmental risks to GE foods. **THESE FOODS COULD BE TOXIC!**

I will not accept your attempt to make a guinea pig of these untested foods, and I trust you will take my concern along with the thousands of others into Serious consideration.
