

Hallo-Genetically Engineered
Foods are not acceptable to
many American citizens.
Recent incidents illustrate
the need to require mandatory
pre-market ~~safety~~ testing +
mandatory labeling of GE foods.
We can't tolerate the likely damage
to the environment which GE
crops may cause. Please require
mandatory pre-market environ-
mental review. The new rules
announced on 1/18/01 appear to
pander to the convenience of
industry at the expense of
public health, consumer infor-
mation, and the environment.
Please pay attention to consumer
needs and keep our food safe.
Thank you. Ellen Brooks
