Dear FDA:

0034 '01 MAR -6 11:32

Genetic Engineering is of great concern to me. I am writing to oppose your new proposed guidelines on genetically engineered food.

I feel all genetically engineered food should clearly labeled.

I feel genetically engineered foods really, should not be marketed until long term studies have proven their safety in our environment & for human health.

I request your help in this matter. At the least, those of us who chose to avoid genetically engineered food should be assured of this right.

Your, Barbara Barnett
