Dear FDA Commissioner

I have been studying the issues engendered by GE food production and am not able to buy groceries now without worrying that my two boys will or could be harmed. There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment. The FDA's proposed rule to allow voluntary labeling is ludicrous as very few producers would use labels. I am

vehemently opposed to anything but mandatory labelling. I have a right to know what I'm feeding my family!
