

Dear FDA, [Docket # 00D-1598  
00N-1396] ~~Feb~~ March 5, 2001

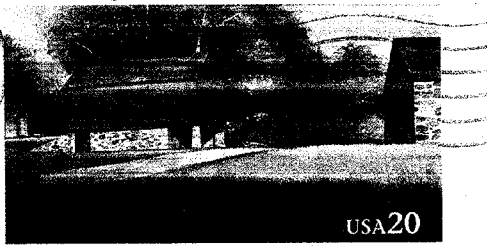

As a physician, I remain  
very concerned re: the informed  
consent of the American public  
for genetically altered foods.  
People need to understand the full  
complications of what goes into  
their food, and the evidence is  
piling on the possible effects of  
genetically altered food on health.

Paul Chen M.D.
