

Dear Sec. Shalala,

Oct. 26, 2000

We are very concerned about the use of radiation on our food. It:

- 1) Depletes nutrients in food
- 2) creates mutant life forms
- 3) kills beneficial microorganisms
- 4) masks filthy slaughterhouse conditions.
- 5) marginalizes family farmers.

Please ban the practice - or at least require labeling so that we can choose not to buy it!

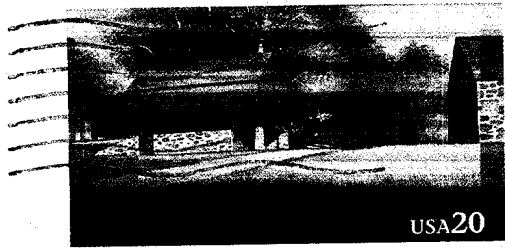

Thank you.

M + Ms J. L. Devison
