

2-8-01

Dear F.D.A.,

I am writing you concerning GE modified foods.

I am very concerned, for my health, my childrens health + my Grandchildrens health.

I feel we are knowingly by yourselves and the GE industry, being used for GE experiments against our will + right to know.

If you allow this industry to go forth without safty testing, enviromental review, proper labeling, limits on non-GE labeling. How are we to protect ourselves from the unforeen effects these products will have on our health?

At least with labeling, those that don't want to be gunea pigs can choose not too.

If they dont have to label the foods it allows them from resposibility & liability of their products. (no recourse by possible defects, + illness & allergies caused by GE foods)

Please use you job to protect ^{our} country by requireing proper labeling on these foods! I think Americans have the right to know!

Thank you for considering this.
