RE: Docket No. # 01P-0230

September 9, 2001

Dear Commissioner,

On behalf of our membership of nearly 10,000 persons in Ohio, we ask the FDA for a moratorium on the domestic marketing and importation of genetically engineered fish. The health and environmental consequences must be very carefully studied before unleashing altered species into lakes and oceans, and allowing humans to eat these untested, new foods that contain new proteins that we have never before consumed.

We strongly support a permanent ban on the release of these fish into open waters, including net pens and ponds.

Sincerely,

Jim Toth, chairperson

01P-0230
