Dear FDA Commissioner:

I oppose FDA's proposed new regulations on "genetically engineered" and "genetically modified" foods. The proposed labelings and notifications do not support my citizen rights to be fully informed and fully protected.

Instead, I propose:

- 1) a long-term moratorium on the growth and sale of "GE" and "GM" foods until such time as long-term, scientific, and non-political studies conclusively prove their safety to human health and to environmental "health".
- 2) If "GE" and "GM" foods can unquestionably be proven safe for humans to consume and also environmentally safe, then I demand full and complete labeling on all "GE" foods and food ingredients because I have the right to be fully informed about what I consume and live among!

Hopefully,

*Lois J. Drobish*
