

MARCH 10, 2001

Dear F.D.A.,

I think that it is criminal ^{3992 '01 MAR 16 AIO 57} that we are having gm foods foisted upon us. It is also criminal if we are not told fully and completely what gm components are in the food that we eat. As consumers, we must be given a choice to totally avoid gm foods. Many other countries, including Japan and England, are highly protective of their people regarding gm foods. What is wrong with our country? Is the greed and power of the companies that develop gm foods and crops more important than the health and future well-being of the American people?!

You must demand labelling of all gm foods — And you must not allow gm foods to be put on the market until there is no doubt that they are safe — both short-term and long-term.

Your job is to protect the American people.
Please do your job!

000-1598

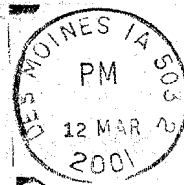

Thank you!

Sincerely,

Debra Mays
