

3/10/01

Dear Commissioner,

RE: ~~Docket~~ # 00N-1396 + 00D-1598

I think it is very important that all genetically engineered foods be labeled so much by law, not on a voluntary basis. It would be unfair to consumers and health professionals to not know if allergic or toxic reactions are due to GE foods. We all deserve a choice, and without mandatory labeling that won't be possible.

Thank you for your attention.

Laura Henry
