

Dear FDA,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) foods to ask that the agency's policies be changed, and to support all the comments on docket # OOP-1211/CP.

- All GE foods should be labeled so I am informed and have a choice.
- GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing.
- There should be a moratorium on GE foods and crops until long term studies show they are safe for human health and the environment.

**GE Food Moratorium
